#### Hazardous Driving

How often the last few weeks we have heard the warning: hazardous driving, be careful! It is miserable driving under such conditions but it is good to know it, so we can be careful. As a result, there are often fewer serious accidents in such weather than in good weather and under good conditions. The difference is the care we exercise. The same thing is true of life. The Bible ever warns the christian: hazardous driving conditions in life as you travel through a world of sin and temptation. How sad many ignore that warning, and before they know it, destruction and death result. This is especially true in times of prosperity. All seems to be so well, but men hurry farther and farther from God. Be wise. Be careful. Watch and pray and study God's Word, the only safe guide that leads us to God through Jesus Christ.

PASTOR - REV. ROY BOESKOOL

Today's sleek-styled ski, a popular piece of equipment to thousands of winter recreationists in Michigan, had its beginning at least 5,000-6,000 years ago somewhere in central Asia. At that dawning stage in its history, the ski was a crude plank-type affair shaped much like the snowshoe. From this birthpoint, it journeyed westward into Scandinavia, Europe, and northern Russia where two basic designs came into being: The Arctic and The Southern. Both of these ski types are still used today and The Southern. Both of these ski types are still used today in that region. The Southern type is the direct ancestor of modern racing skis. Somewhat later, the Bothnian ski appeared, featuring ornamental carvings on the toe and heel. Unlike the earlier styles, the toe of this ski has a pronounced upward curl, similar to the present-day design. Finally, the narrow Central Nordic or Modern Type ski entered the picture. Although the ski has passed through many changes in styling, its basic design is pretty much the same as it was thousands of years ago. Perhaps the biggest change is in the use of skis. Originally developed as a vital means of survival, they are now mainly used for recreation. Upwards of 165,000 skiers are expected to streak down mountains, hills, and slopes in Michigan this winter.
