Nevada is now known to be Democratic and in California the rote is so close that it will re-quire the official count to decide. The Repub-licans will get one California elector, however, as Judge Terry on the Democratic ticket is known to be scratched several hundred. SCATTERING NOTES. The following circular letter, signed by Wm. A. Fowler, Chairman of the executive Com-mittee of the Democratic State Committee, of New York has been issued: Reports of frauds in the elections held in this city and Brookyn on November 2 are such that if the frauds re-ported are established the electoral vote of this State will be cast for Hancock and English, and steps for a thorough investigation are now being considered. The California official returns are not yet all in, but enough have been received to deter-mine that the Hancock electors, except Jadge Terry have carried the state by a majority of 250 to 300, while the Republicans have elected forty-one Assemblymen, giving a majority of two in the Assembly, and of twelve on joint failot. Bitate Democratic Committee, in commenting upon the proposed attempt to count that state for Hancock says: The only way in which any contest could be made, with even a shadow of probable success, would be by the rejection of the Republican electoral ticket on which the word "electors" has been twice printed. This, I believe, cannot and should not b done. To change the result in any other way, more than 20000 separate cases of fraudulant or corrupt roling would have to be proved—an evident impossibility. It certainly cannot be expected that the present state board of canvasers will declare otherwise than is shown by the face of the returns, and my view of the Democratic doctrince leads me to hold that congress cannot go behind the seal of the state to investigate frauds at the polis in the choice of presidential electors.

What days are meant by the word "holidays" is shown explicitly.
