EDITORIAL COMMENT.

-Protection to honest labor and home industries, says the Republican party. As the opposing parties are always fighting the Republican party they will of course denounce and fight against "protection to honest labor and home industries." And such action will be entirely tion party which denounced the greenback currency during the war and sneered at and fought against resumption after the war. Somehow the Republican party has alwas been found on the right side of all national issues, and while the opposing parties have been fighting with zeal worthy of a good cause they have invariably been found on the wrong side and in after years have been frank enough to admit it. They have openly acknowledged that the war was not a failure, that resumption did not bankrupt the country, etc., and in a few years they will admit that the Republican party was right in 1884 when it elected a president on a platform demanding protection to honest labor and home industries. There was never a political party better qualified by nature and by education to fight against a good cause than the Democratic party. This is due in part to bad leadership which that party has blindly followed. It is due more, perhaps, to the fact that it has always felt its mission to be to oppose every measure and issue inaugurated and advocated by the Bepublican party. History proves that the Republican party from its birth has always been on the right side of all national questions and that it has won its victories over the opposition known as the Democratic party. Until the Democratic party comes squarely out and takes the advance step in a good cause it can never hope to win. This, of course, it cannot do without stultifying its past record, but it will never win a national victory by merely following and barking at the heels of the Republican party.

HOW WATCHES ARE MADE.

In a SOLID GOLD WATCH, aside from the necessary thickness for engraving and polishing, a large proportion of metal is needed only to stiffen and hold the engraved portions in place, and supply strength. The surplus gold is actually needless. In James Boss' Patent Gold Watch Cases this WASTE is saved, and SOLIDITY and STRENGTH increased by a simple process, at one-half the cost. A plate of SOLID GOLD is soldered on each side of a plate of hard nickel composition metal, and the three are then passed between polished steel rollers. From this the cases, backs, centers, bezels, etc., are cut and shaped by dies and formers. The gold is thick enough to admit of all kinds of chasing, engraving and engine turning. These cases have been worn perfectly smooth by use without removing the gold. This is the only case made under this process. Each case is accompanied with a valid guarantee signed by the manufacturers warranting it to wear 20 years. 150,000 of these Cases now carried in the United States and Canada. 257,981,000, the total annual expenditure of the French Government are about 1,-000,000,000, although the population of France is not much more than two thirds of that of the United States. There are more than 5,500,000 farmers in France who own the land they till, and the great mass of the people are indus-

trious and frugal, but the Nation cannot always endure the drain of such extravagant administration of government. Those who wish to see the restoration of the throne in France may rejoice to see lavish expenditures from the public purse, but the spectacle should make triends of the Republic very grave .-[G. R. The Time of Beauty.

Says a recent writer: "Woman joins in an insurrection against the universe when she acts as though her life were all involved in those few years covered by her personal beauty. Physical beauty is only one of the gifts of heaven to the daughters of earth. That form of worth may fade away into beauty of mind and heart, but it should be as dawn passes up into morning, and not as evening passes down into night. Woman is fully authorized by nature to make her fiftleth year as noble as her sixteenth, her learning, her conversation, her taste, her matchless purity, her infinite friendship, which has not enough worlds to conquer, being more than able to atone for the tints that may have faded from her cheek. When physical beauty is made the aim of being, life is limited to about twenty years. Thus are fifty years left without an adequate reason of being except that a part of the period was the approach to beauty, the other part the retreat, full of much humilia-tion."

made by the Republican and Democratic State Committees have been published. The Republican canvass claims a majority of 25,335 for the Republicans. The Democratic canvass claims 19,220 majority for the democrats. The difference of opinion is rather striking, but will not long remain one of the unsetted questions. October will decide it, that is, if the parties get out a full vote.

Oakey Hall's Ad. Speaking of papers reminds me, re-marks the "Man About Town" in the Brooklyn Eagle, of a neat game Oakey Hall, the editor of Truth, played upon a confiding lager beer saloonkeeper, next to the New York approach to the East River bridge. Everybody crossing the bridge must pass within a few feet of the beer saloonkeeper's building. Oakey Hall went to this confiding German a few days ago and said he would like to move Truth's office up into his top story. An agreement was made at a rent of, I think, \$1,000 or \$1,500 a year. Then Oakey Hall moved up, and, as soon as he had planted his desk, started hurriedly out into the street. A short time afterward he reappeared with a gang of painters, who swung a scaffold from Mr. Hall's windows and began to paint the wall of the building which opened directly on the bridge. They painted this a dead white first, and then began to put in gigantic letters the word "Truth." The German saw what a tre mendous advertisement this would be for the paper, and rushed over to the City Hall to restrain the editor of Truth from advertising on his building with-out pay, but he found ex-mayor Oakey
