### EDITORIAL COMMENT.

In a few weeks our Mr. Comstock begins to work for the Fifth District at Washington. He works two years for \$3,000 a year and "finds himself." While there he will have a chance to see a great many prominent men. By virtue of his office he will be entitled to a seat in the House of Representatives, where he will see how they make laws and such things. It will be a change for Mr. Comstock and that is what most folks need, after a life of toil and care. Mr. Comstock's many friends wish him a pleasant sojourn in the capital city and a safe return at the close of his present engagement. Should he want any favors in the way of appointments or legislation he can readily communicate with Don M. Dickinson & Co. of Detroit who will give his petitions due consideration and very likely give him letters of introduction to some of the public men in Washington.

The greenback organ of western Michigan (Grand Rapids Leader) is evidently suspected of if not directly charged with political heresy, by its greenback contemporaries. The Chicago Sentinel (straight greenback) closely catches the Leader in regard to the benefits of fusion, and other greenback organs want to know, you know, how the Leader proposes to stand—if it does stand—on the irredeemable doctrine. Some day the Leader may have to admit that it is what it is—a democratic paper with greenback trimmings.

Don M. Dickinson has his best eye "set" on a seat in the United States Senate. He desires to succeed Senator Conger. He is to-day the tallest cornstalk in the field of Michigan democracy and is all tassel out in his best political bib and tucker. The only thing to prevent his calling and election sure is the uncomfortable fact confronting him that the next legislature of this state is not yet democratic. Not just yet.

Hon. Perry Hannah, having been favorably mentioned in connection with several high positions of trust, announces that he will not be a candidate for any office. He proposes to spend the winter in Europe. Mr. Hannah is one of Michigan's best men and if the people make a draft on him politically he will have to honor it, we reckon.

Riel was hanged near Regina, N. W. T., last Monday morning, for high treason against the Queen of Great Britain. He went to the scaffold with a firm step and died without showing any signs of dread or fear. Thus ends the earthly career of Louis David Riel but it does not necessarily end the trouble in Riel's realm.

Congressman Maybury of Detroit is really a bright fellow but somehow or other his sun has been under a Don Dickinson eclipse ever since the new administration rolled up its sleeves, and the poor fellow can't shed a little bit of light anywhere. But he can take it easy and draw his salary.

The Detroit Journal heads an editorial "Political Sniveling." Mentioned no names but we'll bet Boss Wheaton was mad when he read it.

Eli Perkins is going to visit Michigan again. Can't he be induced to visit Montreal first?

The Lowell Creamery closed business for the season last Saturday. It will be reopened next spring as early as practicable and judging from what the farmers say about it the Creamery will no doubt have a much larger business next season than it has done during the season just

closed. It has been clearly demonstrated to the minds of many who were at first in doubt, that the Creamery saves labor and makes money for those who patronize it.

Some days ago while hunting, Ed. Clark found a satchel in the woods near John Maynard's containing some gents' collars, painters' material, &c. The find was at once associated with the story of a tramp who came here a few weeks ago with a badly cut head and who claimed to have been assaulted by a fellow who walked from Saranac with him down the river road to within a mile or so of this village. Parties have been over there in search of further light on the subject but have not yet discovered the owner of the satchel or any thing leading to a solution of the "mystery."

Following the custom of recent years, Harper's Magazine for December is especially a Christmas Number. It may fairly be said to be the most brilliant number ever issued. Among its contributors are George William Curtis, Charles Dudley Warner, W. D. Howells, Constance Fenimore Woolson, Charles Egbert Craddock, Elizabeth Stuart Phelps, Edwin Arnold, William Black, R. D. Blackmore, George H. Boughton, Brander Matthews, G. P. Cranch and W. H. Gibson, and the illustrations are from such artists as Abbey, Reinhardt, Boughton, Gibson, Calderon, Pyle, Fredericks, Dielman and Smoldley. The number contains nineteen full-page engravings.

The "Chalk-Talk" entertainment at Music Hall Tuesday evening was a success. A large audience was present and Mr. Rollo Bryan, the chalk manipulator, proved his ability as an artist to the entire satisfaction, we believe, of all who sat before him. He gives an entertainment that instructs as well as amuses. Half the net proceeds will be expended for the benefit of the schools here, in the purchase of necessary apparatus. Prof. Shuart devised this plan of procuring funds, he said to his credit, and while the receipts were satisfactory the amount needed for the purpose indicated is of course insufficient. The school board will no doubt act wisely in regard to the matter and see that the school is supplied with all that it needs in the way of apparatus. Let us keep up with the times.

Some newspaper censors think it absurd that a paper should chronicle a fall of snow, or other incidents, when everybody knows all about it as well as the reporter. A change in the weather is not published as news, but as a matter of record to which it may be of use to refer at some future day. A single note of this kind has been known to settle an important disputed point years after the event, and confagurations, or the result of an election, or the death of a president might be disregarded and omitted with just as much reason as local events of minor importance. Nor is this all. There is not a newspaper in this country that has not its friends or patrons far away from the place where it is published, and upon its daily and weekly visits they look for the state of the weather in their old homes as anxiously as for any other local news.—Ovid Union.

**LOWELL JOURNAL.**

Lowell, Mich., Nov. 20, 1885.  
Why Hens Eat Their Feathers.  
In long, close winters, unless one is careful to feed sulphur each week, to give meat freely, and has large quarters and a hay-rick for the hens to run to, they will stand and pull the feathers from off their companions. This is accident at first, and generally starts with one hen. The new feathers that come out to take the place of those pulled, are full of blood, and become tempting bits of blood and meat, and the evil increases till the whole flock become feather eaters. When first discovered take the smooth birds out of the flock. Feed sulphur and liver till gorged. Put a rick of hay into the poultry house; rake the feed (oats, wheat and corn) into the chaff and make the flock scratch for it and you will divert them from the evil. The sulphur will destroy the desire.—E.R.  
Bardette Bewildered.  
Somehow or other, my boy, this old world seems to be getting away past me. I don't seem to catch on somehow. Mr. Beecher declares himself a Cleveland Republican, then Mr. Curtis proclaims himself an Ira Davenport Democrat, and now the Rev. Mangasar Mangasarian declares that he is a Bob, Ingersoll Presbyterian. I am just waiting day by day for old Garrison to get out of his grave long enough to declare himself a pro-slavery abolitionist, and then I am going to join the Roman Catholic order of American Protestants and see if the Irish-Americans can't do something for the American-Irish in English prisons. I tell you my son, these are stirring times and a man must be blind if he cannot feel the low mutterings of distant thunder that smells to heaven in the gloomy darkness of its glaring polyglotery. I suppose it's all right, my son, but I don't understand it at all, and I'm thankful that I don't desire to understand it, "for in much wisdom is much grief, and he that increaseth knowledge increaseth sorrow."

But the article is not a specific merely for the various forms of malarial disease, it endows the system with a degree of vigor, and reforms its irregularities with a certainty that constitutes its best defense against disorders of the stomach, liver and bowels, specially rife where the atmosphere and water are miasm tainted. Fever and ague, bilious remittent, dumb ague and some other miasm tainted, dyspepsia, rheumatism, &c. Take this medicine on the first indication that the system is out of order, and rest assured that you will be grateful for the hint.
