READ THIS.

All subscribers in arrears can easily learn the amount they owe us by referring to the printed label on their JOURNAL (or on the wrapper, if so sent). Figured at \$1.00 per year, or 84 cents per month, from the date on the label to the present date will give the correct result. Let every subscriber look at said label this week and, if in arrears, forward the amount due to the JOURNAL at once. The amount due from each delinquent is small, but the aggregate of these small amounts is large. The publisher trusts that every delinquent will respond at once to this call which is certainly reasonable. One dollar will pay for the JOURNAL another year.

To Our Patrons.

During the greater portion of the month of March the editor of the JOURNAL will be away from home. In his absence all correspondence, orders sent by mail for advertising, job work, etc., should be addressed to "THE JOURNAL," and not to the publisher personally. E. L. Craw, foreman of the JOURNAL office, is authorized to take all the cash offered, giving receipts therefor in the name of the publisher. Competent aids have kindly volunteered to furnish local news items for the JOURNAL and such items will be gratefully received from other sources. Subscribers and others in arrears are each cordially invited to call and persuade the foreman to write up for him one of those finely embellished receipts.

From D. O. Ball.
EDITOR LOWELL JOURNAL.—I have been in this "land of the lost cause" about ten days and can hardly realize the change, not only in climate but in almost every respect. This is a busy time among the farmers as they are plowing if plowing you call it, for spring crops. Many plow with one mule with ears long enough to furnish shade to walk in could you be directly under that important appendage and the work done corresponds to the amount of strength or power represented by the mule. As to the man who follows the plow, he cuts but a small figure save that he always follows the aforesaid animal. I have examined a great many Tenn. farms and observed their mode of farming, by the way is the most difficult to describe as well as to imitate by those who follow that important vocation in the northern States. Were I to attempt an illustration so as to bring it vividly before you I would turn into one of your ten acre fields about forty long snouted swine unhampered and unfed, and in the course of forty eight hours you would have before you the most striking representation of a field here, after plowing.
That there are rapid improvements being made especially by those who come here from the north is manifest. But with all the improvements yet made it does not yet appear that there is the same pains taken and industry manifest in any department of agriculture as in the north. The lands are unquestionably poorer than in the north, the soil with some exception is thin, rocky and of a redish cast looking as though it were mineralized. The river bottoms of course are rich and productive, but these lands are higher than the best farms in Michigan. The usual farm buildings would be about as valuable all told, as some of our Mich. sheep sheds. With some, their surroundings seem to comport with their highest aspirations, hence they are happy.
Chattanooga and Knoxville are rival cities of about equal size, viz. twenty five thousand souls. Here are representatives from almost all lands. The high, the low, the rich, the poor, the white and all colors, a mixed multitude indeed. The stranger is noticed, weighed and measured, and the usual incentives are held out to induce him to join the people of "the Gods" and cast in his lot as a representative of his own religion, being careful not to disturb their institutions nor the faith of the "Fathers." With these prudential requisites I think any one could glide along in business relations with the inhabitants of the cities without serious collision. My advice however to a young man contemplating confederation with the people of the south in business relations would be that he button up his coat collar and study their methods without inquiry till he is infused with a just appreciation of their ability to practically illustrate their intricate projects.
The Mountains of Tenn. abound in iron, coal, zinc and copper. Several nail factories are in operation and compare favorably with those of older states. Many other industries I would speak of but fear your patience will be exhausted. I have visited many places of interest and historic fame where lie the sleeping thousands, slain in battle, and I confess to strange sensations in contemplating the terrible sacrifice for the redemption of this land and the perpetuation of the life of this nation.
