VOLUME XXIII.

LOWELL, MICHIGAN, THURSDAY, JULY 12, 1887.

NUMBER 3.

J. Q. LOOK,

Wishes to call the attention of the public to his stock of

Paints, Oils, Wall Paper, Window Shades, &c.

We are Agents for the Alston Mfg. Co's

LINSEED OIL,

Which we guarantee to be Strictly Pure. Buying direct from the Manufacturers we know we can furnish our customers with Pure Oil.

The Sherwin Williams Paints.

These Paints we can recommend to be Pure. They contain nothing but

STRICTLY PURE LEAD, ZINC, AND PURE LINSEED OIL.

"What shall I do with the outside of my house?" is a question often asked by those who wish to paint.

In exterior decoration, the surroundings should be taken into consideration, and the building treated in such a way as to harmonize as nearly as possible with them; especially should this be the case in suburban residences, as there is nothing that so effectively destroys the beauty of a landscape as to see a house painted in colors that are in discord with objects about it.

This subject has become so important, we have naturally taken a great interest in it and have given it no little study. We shall be pleased to answer any specific questions that may be addressed to us.

ATTENTION is called to the fact that nearly all other manufacturers of mixed paints are obliged to give a rule for the covering capacity of their paints, requiring from 15 to 25 per cent. more than this, simply because THE SHERWIN-WILLIAMS PAINT is properly made and of pure materials, and therefore admits of being rubbed out under the brush like any pure lead, zinc and oil paint, not requiring to be "flowed on," as the manufacturers of cheap paints direct their products to be used.

OUR STOCK OF WALL PAPER

has been selected with great care, and to meet the demands for first class interior decorations. OUR STOCK OF WINDOW SHADES IS COMPLETE.

CARRIAGE PAINTS.

Our Stock of these goods comprise all the leading colors. Call and examine them.

PAINTS IN SMALL CANS

for family use, we have them in all colors and sizes of cans.

PAINT BRUSHES.

In This Line of Goods we can Suit You Both in Quality and Price.

Drugs & Medicines.

Our stock of Drugs will be found complete and composed of Pure Goods. Our stock of Patent Medicines comprises nearly every article in the market. Our prices will be found as low as consistent for good goods. Thanking the Public for their Liberal Patronage and hoping to merit a Continuance of the Same.

We are Respectfully Your Obedient Servant,

J. Q. LOOK,

Lyon Block,

Lowell, Mich.

HUMANITY IN FLAMES.

FAILURE OF THE AIR-BRAKES CAUSES A TERRIBLE CALAMITY.

A Heavily Loaded Passenger Train Runs into a Freight, and Explodes an Oil Tank.

Blazing Oil Scattered Over Dozens of Victims—Nineteen Dead and Forty Wounded—Scenes at the Wreck—A Careless Engineer Furnishes Another Similar Case with but Two or Three Casualties—A Minnesota Town Destroyed by Fire.

St. Thomas, Ont., July 10.—One of the most appalling disasters which has ever happened in western Ontario occurred at 7:15 Friday evening at the crossing of the Michigan Central and the London & Port Stanley railway, resulting in the

LOSS OF NINETEEN LIVES and the injury of over forty other persons, three or four fatally. A special eastbound Michigan Central freight train was pulling out of the yard as the regular excursion train from Port Stanley approached with ten coaches, literally packed with residents of this city and London. Engineer Harry Donnelly was in charge of the Port Stanley train, and as he was crossing the bridge he noticed, as the fireman states, that the semaphore was closed against him. As he approached Wellington street he applied the air-brakes, but they refused to work. He then tried for brakes on a reverse I. work engine, but as the train was moving as "scree lever," some time was occupied in reversing it.

From Wellington street to the crossing the train ran with engine reversed. The violent whistling had alarmed the pedestrians and passengers alike, and a collision was unavoidable as evident. The passengers commenced emerging from car windows, and every available means of egress was taken advantage of. The majority of the passengers in the car next to the engine had got out

when the engine plunged into the Michigan Central freight train, and as the trains came together, Engineer Donnelly could be seen in the cab with his hand on the lever still endeavoring to make the air-brakes work. As if fate were linked to add

ADDITIONAL HORROR to an already sufficiently appalling affair, the section of the freight train into which the engine of the passenger train plowed consisted of two cars containing tanks filled with crude oil and one car loaded with barrels of refined oil, and almost before the passengers heard the crash of the collision, it was followed by a tremendous explosion which could be heard for miles.

When the collision occurred the engine bent, swayed, and surged for a moment, and finally, turning partially over, fell to the ground on the other side of the car. Then shot up

A COLUMN OF FLAME through the black smoke and chasers, that was visible twenty-five miles away, accompanied by a roar overpowering all other sounds. The burning partially over, fell in all directions, setting fire to Griffin's coal and salt warehouse, J. L. Campbell's dwelling and warehouse, and other structures in the vicinity, destroying all of these and causing a loss of about \$50,000. Herman Ponsford, of the fire department, was severely injured by the flames, and when the smoke cleared away it was seen that from head to foot he was a living mass of flames. He was promptly wrapped in clothes and the flaming remnants of his vest and trousers were torn from his blazing body.

EXTENSIVE WILK COOKED FLESH.—His injuries are of a horrible nature and he can not recover. Chief Wabourne was seriously burned about the head and face. John McKellan was burned badly about the face and hands; W. Jeffers, face and hands; Nelson Gadsley, ears and head; F. Read, badly burned on the face and arms; Ed Moore, burned on the face and hands; Engineer Joyce, of the Grand Trunk road, was a mass of flames, his clothing was stripped from his body by willing hands, and he was taken home in a cab. The 8-year-old son of R. C. Cathey was run from head to foot; he can not recover. Charles Chisholm, R. Hutson, John Sterling, Allie and Archie Norworthy, Thomas Johnson, Thomas Doherty, D. McCallum, Martha Lamery, Frank Queen, Charles Duke, J. A. Merman, and scores of others were painfully burned by the blazing oil, many of them fatally. Hon. A. Francis, United States consul, was struck by a hose and terribly injured; his recovery is doubtful.

BODIES RECOGNIZED.—The following bodies have been recognized: H. Donnelly, engineer of the excursion train; J. Smith, wife and daughter; A. Zealand and daughter.

Mrs. W. H. King, who with three children was in the car next to the engine, tells a vivid story of the wreck. This was only car wrecked and it was consequently in this car that the victims who were incinerated were running. Mrs. King states that the train was moving unusually fast from Port Stanley, a lady who was in the car stating that the time occupied was but fifteen minutes. At Wellington street Mrs. King noticed that the train slackened speed somewhat, but it was not until the train was opposite Elizabeth street that she suspected anything wrong. She was looking out of the window and observed the Michigan Central freight train. For a moment she thought the train had been passed to allow the passenger train to pass through, but on looking out of the opposite window she saw that her first impression was incorrect, and that a collision was about to take place. About as soon as she realized this fact

THE CRASH CAME. The engine of the passenger train parted the freight, and the rear section of the latter crashed into the passenger train. The utmost confusion at once arose, and the shrieks of the women and children were heard. A moment later flames broke out. Mr. A. B. Remy and Mr. A. A. Drake at once rescued Mrs. King and Mrs. Wray and their children through the windows and others

chambered through the remaining windows, before the accident occurred. Mrs. King, Mrs. Zealand and Mrs. Smith were seated together in the second seat from the forward end of the car. Mrs. Zealand had her 3-months-old babe in her arms on the left hand side, Mrs. Fraine being seated opposite her. Mr. Zealand, with his 3-months-old babe was seated on the opposite side. There were also two large-sized men sitting a seat or two behind Mrs. Zealand and Mrs. Smith. She did not recognize who they were. Of the eight, but one, Mrs. Zealand, is known to have escaped.

A LATER DISPATCH.

St. Thomas, Ont., July 10.—The work of removing bodies from the wreck was continued all night. So far 14 bodies have been taken from the ruins. The names of the dead so far as recognized, are: Mrs. Samuel Fraine and child; Mrs. J. W. Baynes, London, and two children, Ethel and infant; Henry Donnelly, London; Mr. Zealand and child; Mrs. J. Smith and child; Herman Ponsford, the fireman, who was terribly burned by the flying oil, in rescuing passengers, died at 7 o'clock. It is said that engineer Donnelly was intoxicated at the time of the accident. The track is clear and traffic has been resumed. The number of injured is said to foot up 50 or 60 but such is the excitement that the names and extent of their injuries are unobtainable at present. The loss to the railroad Company will amount to \$100,000 and the loss by fire \$100,000. The blame all rests on the London and Port Stanley company.

The total number of casualties reported so far is fully 100. No further deaths yet. Many seriously injured by the explosion are lying at their homes or those of friends. It is almost impossible to learn their condition. An investigation will be held as to the cause of the accident, and upon whose shoulders the blame rests. It is reported that the engineer had been drinking, but it is also claimed that the main cause was the failure of the air-brakes. The track is now clear and the wires will be working shortly.

The Engineer Was Careless.

Lincoln, Neb., July 10.—The regular freight train from the east crashed into an extra stock train bound for Omaha at 1 o'clock Friday morning, on a bridge near Haystack. Thirteen cars were smashed up and took fire and were totally destroyed. One of the cars contained the goods and persons of Dr. Max Randall and his son Charles, from Roseville, Ohio. Both are seriously hurt. It is regarded as certain that some unknown person tampered with the air-brakes. The fire reached two oil tank cars, which were loaded with oil, and both exploded with terrific force, spreading the burning fluid in all directions and setting fire to many other cars loaded with merchandise. Engineer Bowser's carelessness was the cause of the accident. Some of the trainmen were asleep at the time of the accident.

Another Town Destroyed by Fire.

Deloit, Minn., July 10.—Northern Pacific Junction, a town of 1,200 population, twenty-seven miles from Duluth, has been destroyed by a fire which started in the Paine Lumber company's mill Friday night. Engines were sent from here. Meagre details have been received so far.

FOUR YEARS AND FIVE THOUSAND.

Jacob Sharp Sentenced to State's Prison—A Stay Granted.

New York, July 10.—The boss bootler, Jacob Sharp, was sentenced Thursday by Judge Barrett to four years in the penitentiary and a fine of \$5,000. In passing the sentence the judge said he could see no reason for mercy in the case. Sharp was clearly guilty, and the fact that he was old and ill could not be urged in extenuation of his crime or mitigation of the penalty. A motion for a new trial was promptly denied and a stay of proceedings refused, the judge saying that he could not justify a stay on the facts in the case.

Sharp was very weak and listless. He had slept poorly during the night, and his dejected wife had hardly slept at all, remaining awake by his bedside to minister to his wants when he awoke, as he did frequently. Mrs. Sharp was very much affected during the judge's remarks and when the sentence was pronounced. There was a great crowd present and an attempt was made when the judge had passed sentence on the prisoner, but the applause was promptly checked. The judge, however, gave vent to its approval in a ringing cheer when the sentence was announced.

Sharp was taken back to jail, his weakness requiring his assistance by two men as he tottered along.

New York, July 10.—The argument of the order to show cause why a permanent stay of execution of the sentence of Jacob Sharp should not be granted was not heard Monday. The district attorney informed Sharp's counsel that he was not prepared to go on. A former motion to postpone was made before Judge Potter, of the supreme court chambers, and the hearing was put off until next Friday by consent of both sides.

The Business College Men.

Milwaukee, Wis., July 10.—Tuesday morning the ninth annual meeting of the Business Educators of America was called to order by President Stadler, of Baltimore. Hundreds of delegates were present from all parts of the United States, and the meeting will last four days. Among the delegates are four sons of Platt R. Spencer, of Ohio, who originated the Spencerian system of writing. The meetings of the society are being held in a large tent, pitched on the shores of Lake Michigan. Ira Mayhew, of Detroit, who attended a similar educational meeting in this city forty years ago, one of the most venerable educators in the country, is also present.

LANDS THAT WOMEN CAN ENTER.

WASHINGTON CITY, July 10.—Acting Secretary Mulford, of the interior department, Monday rendered a decision according to married women the right to enter and purchase land under the law governing the sale of such lands in the states of Mississippi, Louisiana, California, Nevada, Oregon, and Washington territory. This law allows the sale of lands obviously unfitted for agricultural purposes at a minimum price of \$2.50 per acre in tracts of not to exceed 160 acres to any one person or association.

BUSINESS NOTES.

Large numbers of men are being sent to the Pennsylvania coke regions by eastern labor bureaus to fill the places of the strikers.

Business failures for the week in the United States and Canada number 109, against 154 last week, and 183 for the corresponding week of 1886.

INTERESTING DECISION.

THE COMPLAINT OF DAKOTA FARMERS DISPOSED OF.

The Inter-State Commerce Commission Finds No Charge of Misconduct Against the Manitoba Road—Cause of the Complaint—Charges Against the Richmond & Danville Railroad Company.

WASHINGTON CITY, July 10.—The decision of the inter-state commission disposing of the complaints of the Dakota farmers against the Manitoba railroad company has been made of record. It is of general interest as showing the course of the commission in respect to many of the matters which come before it in other but strictly legal form, but which nevertheless appear to have merit and to be brought in good faith. The substance of the complaint is stated to be a refusal of the company to furnish cars last fall and winter, and a fear that the course of the defendant will be similar the coming fall. The commission finds no charge of any misconduct since the passage of the inter-state act, and, having no authority to anticipate violations of law or issue mandatory process based upon suppositions or fears, it says it will with entire propriety have advised the parties to wait until it was seen whether their fears were to be realized. But, as it was quite possible that the fears might not be wholly groundless, it was deemed proper to send defendant a copy of the petition that it might have an opportunity for explanation and for giving assurances as to the future if inclined to do so. To the petition the defendant company answered, excusing its failure to furnish cars during the time specified by complainant and averring that the company had now procured an additional number of cars, so that it was believed there would hereafter be no difficulty in handling its business promptly and without delay. The complainants did not appear at the subsequent hearing, and the case was therefore dismissed.

The complaint of citizens of Hot Springs, Ark., against the Richmond & Danville Railroad company, alleging unjust discrimination and excessive passenger rates from Hot Springs to Unaka, Ark., was heard before the inter-state commission Monday.

The specific complaint in this case was that 55 cents was the fare charged from Hot Springs to Unaka, a distance of six miles. The depositions of a number of witnesses were read in support of the complaint. The railroad company, through their attorney, denied that the complaint was well founded, and insisted that if there had ever been any foundation for it, it had been corrected by this complaint was made. The Richmond & Danville road had sent out a circular on the 10th of last June reducing the rate from Hot Springs to Unaka to 35 cents, but this had not been acted upon by its connecting line, the East Tennessee, Virginia & Georgia road. Upon this statement of facts the difficulty was virtually settled at headquarters Monday by the Richmond & Danville company agreeing to refund to every person who had paid this 55-cent fare the difference between that amount and 35 cents. The commission holds the case until informed that the agreement has been carried out.

Miss Mahbitt's Murderer.

LOGANSPORT, Ind., July 10.—The two Greens, William and Amer, recently arrested in Texas, have arrived here and excitement is at fever heat. There are so many threats of lynching that the sheriff has taken extraordinary precautions and says he will prevent any of that kind of violence. If, however, a jury should prescribe less than the death penalty it will require a strong force of determined men to prevent a lynching. Mr. Mahbitt, father of the unfortunate woman, says he wants Amer to have a fair trial, and if found guilty, to be burned at the stake.

Governor Rush in Search of Health.

MADISON, Wis., July 10.—Governor Bush, accompanied by his wife, daughter Mary and son Blaine, together with Mrs. Judge Romano Bunn and son George, left here on the 8 a. m. train Monday for Nantucket, Mass., where they will remain for three or four weeks. The governor's health is not of the best, and he goes to the seashore for rest and quiet. The party will go via the St. Lawrence to Boston, thence to Nantucket.

The Illinois Printing Contract.

SPRINGFIELD, Ill., July 10.—Attorney General Hunt makes answer to the suit of Ricker & Co., who did the state printing during the recent legislature's existence, that the contract having been obtained by collusion is fraudulent and void, and the balance due on printing, for which suit is brought \$90,000 should not be paid.

To Invite Cleveland to Milwaukee.

MILWAUKEE, July 10.—The city council will invite President Cleveland and wife to pay a visit to Milwaukee during the present summer or the coming autumn. The resolution will be forwarded to President Cleveland by the mayor as soon as approved.

Had Sense Enough to Levant.

New York, July 10.—Ex-Alderman McCabe who is under indictment for robbery in the Broadway railroad matter, is believed to have gone to Canada. Though adjudged a lunatic he remained at large under bail of \$20,000.

FIRES AND OTHER ACCIDENTS.

Henry Hartman, John Wanapsky, S. Sadard, and John Stacey were killed at the Colby mine, at Bessemer, Mich., by a fall of ground.

W. J. Cunningham, deputy attorney general of Indiana, was drowned at Mt. Clemens, Mich., Wednesday night.

The fire in the Standard mine at Mt. Pleasant, Pa., which started a year ago, has been extinguished after the destruction of property worth \$100,000. It was found necessary to flood fifty acres of underground workings.

At Greenburg, Pa., Mrs. Forsythe attempted to start a fire with petroleum Friday night when an explosion took place and she was burned to death. The house and its contents were destroyed.

At the peach orchard of Argus Dean, near Dyer's Landing, Ind., Lewis Little and Robt. Baird were instantly killed and Chauncey Baird and Richard Moore were fatally injured by the breaking of a cable to which was attached a car on an incline railway in which they were descending.

A baby at Aurora, Ill., died Monday, from drinking water in which fly-paper was soaking.

Do not Stop!

Because our Thirty Day sale is over.

But Come Right Along,

as it will be our aim in the future to sell you your

DRY GOODS

at prices

Much Below All Our Competition.

This we are bound to do, and all we ask of you is to

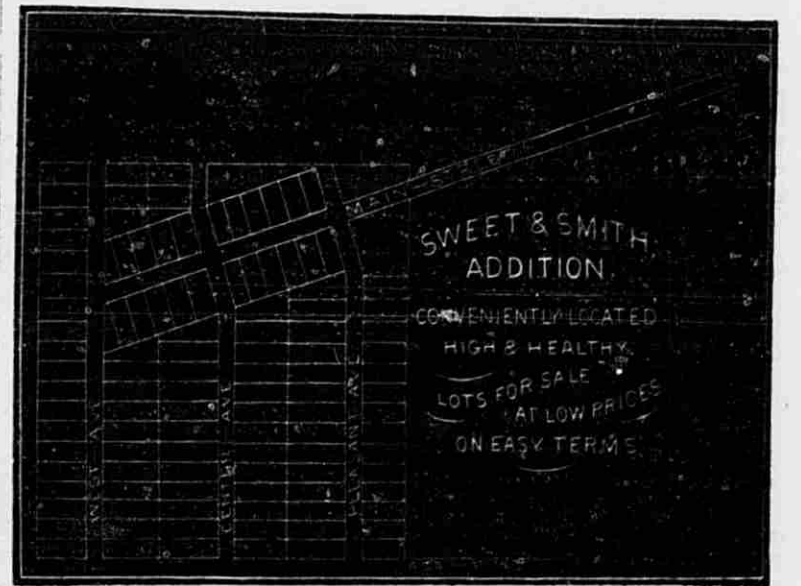

GET OUR PRICES

before you buy, and if we do not sell to you, some one will have to sell to you very low.

Will we see You Among the Number?

If not, why not?

G. W. HATCH.

If You Want a Home

now is the time to buy, as we propose to sell these lots On Terms Within Reach of Everybody, and build houses thereon if desired to suit purchasers. This addition is near the business part of town, houses all new and neatly painted. Streets are graded, sidewalks built and shaderees set out early this season. Call on W. W. Smith Mondays, Wednesdays or Fridays, at Train's Hotel or on the Addition, and get prices and have choice of lots.

For Toilet Use.

Ayer's Hair Vigor keeps the hair soft and pliant, imparts to it the lustrous and freshness of youth, causes it to grow luxuriantly, eradicates Dandruff, cures all scalp diseases, and is the most cleanly of all hair preparations.

Ayer's Hair Vigor has given me perfect satisfaction. I was nearly bald for six years, during which time I used many hair preparations, but without success. Indeed, what little hair I had, was growing thinner, until I tried Ayer's Hair Vigor. I used two bottles of the Vigor, and my hair is now well covered with a new growth of hair.—Judson B. Chapel, Peabody, Mass.

HAIR that has become weak, gray, and faded, may have new life and color restored to it by the use of Ayer's Hair Vigor. My hair was thin, faded, and dry, and fell out in large quantities. Ayer's Hair Vigor stopped the falling, and restored my hair to its original color. As a dressing for the hair, this preparation has no equal.—Mary N. Hammond, Stillwater, Minn.

VIGOR youth, and beauty, in the hair, is the result of its healthy condition. A disease of the scalp causes my hair to become harsh and dry, and to fall out freely. Nothing I tried seemed to do any good until I commenced using Ayer's Hair Vigor. Three bottles of this preparation restored my hair to a healthy condition, and it is now soft and pliant. My scalp is cured, and it is also free from dandruff.—Mrs. E. H. Foss, Milwaukee, Wis.

Ayer's Hair Vigor, Sold by Druggists and Perfumers.

PERFECT SAFETY, prompt action, and wonderful curative properties, easily place Ayer's Pills at the head of the list of popular remedies for Sick and Nervous Headaches, Constipation, and all ailments originating in a disordered Liver.

I have been a great sufferer from Headache, and Ayer's Cathartic Pills are the only medicine that has ever given me relief. One of these Pills will quickly move my bowels, and free my head from pain.—William L. Page, Richmond, Va.

Ayer's Pills, Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Dealers in Medicine.

Village Ordinance.

(Passed July 16, 1887.)
AN ORDINANCE granting permission to the Lowell Water Company, its successors and assigns, to construct and maintain water works in the village of Lowell, and to supply said village and its inhabitants with water.
WHEREAS, The Lowell Water Company, a corporation organized under the laws of the State of Michigan, and authorized to accumulate, store, conduct, sell, and furnish a supply of water for domestic, manufacturing, municipal, and other purposes, in the said village of Lowell, in the County of Kent and State of Michigan, and its inhabitants; for the purpose of constructing its works and enabling it to supply the said village and its inhabitants with wholesome and potable water, suitable for domestic and other uses, it is necessary that the said Lowell Water Company shall secure the right to lay mains, pipes, and conduits in the streets of said village; to construct aqueducts and other structures; and to make excavations in the streets of said village;
NOW, and in consideration of the premises and of the various conditions and agreements herein contained, it is hereby resolved and ordered by the Common Council of the village of Lowell, as follows, to-wit:
SECTION 1. It is hereby granted to the said Lowell Water Company, its successors and assigns, the exclusive right and privilege to construct, establish, maintain, and operate a system of water works, within and near the village of Lowell in the State of Michigan, for the term of thirty years from and after the adoption of this ordinance, and to supply the said village of Lowell and its inhabitants with water, obtained from springs, wells, or by any other means, provided the water so obtained shall be of a good and wholesome character, suitable for domestic uses, not injurious to the public health; the right to use the streets, alleys, sidewalks and public grounds, and other corporate limits, to lay, take up and repair water mains, hydrants, and other structures and devices for the service of water within the present and future limits of said village, in all streets, alleys, avenues, bridges or public grounds, which are now or may hereafter be laid out, while laying or repairing said water works, but not otherwise; to receive, store, provide, conduct, and distribute water through said village; to erect and maintain reservoirs, water towers, pump houses, and all other necessary buildings, engines, machinery, and other appliances necessary to and expedient for the proper operation of such works; to cross any stream in said village for the purpose of laying or extending the said water pipes, conduits or aqueducts, as may be necessary for the proper distribution of water through said village so as to afford an adequate supply for domestic, public, manufacturing uses, and protection to said village against fire, for the above mentioned term of thirty years.
SECTION 2. The water to be furnished as aforesaid may be drawn from springs, running streams, galleries, wells, or elsewhere, as may be most expedient in the judgment of said grantee, its successors and assigns.
SECTION 3. Pipes for mains shall be of iron and tested to three hundred pounds pressure to the square inch, and shall be of suitable size to furnish an abundant supply of water for the present and future requirements of said village. Said Lowell Water Company, or its successors or assigns, shall without expense to said village, place in connection with the pipe system to be constructed, fire hydrants, as designated upon the map submitted herewith, and made a part hereof, which said hydrants shall be of double nozzle pattern, of good standard make.
SECTION 4. During the progress of the construction of said water works, and laying the necessary pipes and conduits, the said Lowell Water Company, or its agents or assigns, shall not unnecessarily obstruct any street, alley or public ground; shall complete each part of the work commenced without unnecessary delay; and restore all streets and sidewalks that may at any time be disturbed in the work of construction or in making of repairs, to as perfect a condition as they were in before such disturbance; and when ever such streets or sidewalks shall be interfered with, or any excavations made therein or thereon, the said Lowell Water Company, its agents or assigns, shall suitably and properly guard and protect the same, so to prevent injury to persons and property.
SECTION 5. Upon notice to the said village, the proper authorities thereof shall fix and determine the grades of streets, roads or avenues, through which it is proposed to lay said pipe line.
SECTION 6. In case the said village of Lowell, through her proper authorities, shall desire the said grantee or their assigns to extend their pipe lines beyond the limits herein stipulated to be first laid by them, it shall give the said grantee, or its successors or assigns notice in writing of such desired extension, which said notice shall specify the streets, alleys, and public places, through which such extensions are desired, and shall definitely specify the number and locations of hydrants; PROVIDED HOWEVER, that there shall be at least one hydrant rented, for each and every four hundred feet of pipe order to be laid, and in no case shall said village demand an extension of less than four hundred feet on any one street. Upon the service of said notice it shall be the duty of said grantee, its successors or assigns, as soon thereafter as may be, to construct such extension, pursuant to the terms of said notice.
SECTION 7. Said village shall pay to the said grantee, or its successors or assigns, an annual rental of thirty dollars per hydrant for fifty hydrants during the entire time that said water works shall be owned and operated by said company, and for each additional hydrant set on the pipe extensions, as hereinafter provided, the sum of thirty dollars per hydrant per year, which sums shall be paid to the said grantee, or its successors or assigns, in semi annual payments; which said rental shall commence upon the completion of said works as herein provided.
SECTION 8. Fire hydrants rented by said village shall be used solely for the purpose of extinguishing fires and for practice of the fire department of said village, and the works so constructed shall at all times be capable of delivering through any three hydrants upon lines of pipe which are not located in the elevated portions of said village, at the same time, three fire streams, seventy feet high in still air, through fifty feet of two and one-half inch hose, with one-inch ring nozzles; and six fire streams delivered as aforesaid whenever the number of hydrants rented by said village shall equal or exceed sixty.
SECTION 9. The use of said fire hydrants shall be under the control of the chief engineer of the fire department of the said village or of the officer in charge thereof, who shall notify the said grantee or its successors or assigns if any hydrant shall be found out of working order, and said grantee or its successors or assigns shall cause the same to be repaired. And in case they shall fail to make such repairs upon being notified as aforesaid, then the said grantee, and its successors or assigns, shall be liable to the said village in the sum of two dollars per day for each and every day thereafter until the same is repaired. In case the works

are not operated, so as to provide the fire service as above indicated, said company or grantee or assigns shall be liable to said village for damages actually incurred.
SECTION 9. The said village of Lowell shall from time to time enact and enforce proper ordinances, protecting the water works property, and the said grantee, or its successors or assigns, in the safe and unmolested exercise of this franchise against fraud and imposition, and against injury to the property and waste of water by the consumers. And the said grantee, or its successors or assigns may make and enforce as part of the conditions upon which they supply water to all consumers, requisite and needful regulations, not inconsistent with law.
SECTION 10. The maximum rates to be charged by said Company to private consumers in the said village of Lowell, shall not be in excess of the following schedule, viz.:
SCALE OF WATER RATES.
For family use not included under extra and miscellaneous use:—
Families of three persons, per annum.....\$6 00
Families of four persons, per annum..... 7 00
Families of five or six persons, per annum..... 8 00

SECTION 11. The said grantee, or its successors or assigns, shall accept the terms and provisions of this ordinance in writing, and file such acceptance with the Clerk of the village of Lowell within thirty days after the adoption hereof, and upon the filing of such acceptance, and not until then, this ordinance shall have full force and effect.
SECTION 12. Said grantee, or its successors or assigns, shall begin the construction of said water works within three months from the acceptance of this ordinance, and shall complete the same within twelve months thereafter.
SECTION 13. From and after the expiration of five years from the adoption of this ordinance the said village of Lowell shall have the right and privilege of purchasing the property of said grantee, with all its corporate rights and privileges, at such price as may be agreed upon between the parties, and in case of disagreement, the price shall be ascertained, pursuant to the provisions of Section 84, Title XVI of Howells' Annotated Statutes of Michigan.
SECTION 14. The said grantee, and its successors and assigns, shall at all times during the existence of the rights and privileges hereby granted, be exempt from the payment of any and all taxes and assessments, at any time hereafter to be levied and collected by the said village of Lowell, for any purpose whatsoever.
SECTION 15. Upon the passage of this ordinance and the acceptance of the same by the said grantee, the same shall be and is hereby declared to be the contract between the said village of Lowell and the said Lowell Water Company, and its assigns, and shall have all the force and effect thereof; This ordinance shall take effect from and after its passage, and all interfering ordinances are hereby repealed.

ROYAL
BAKING
POWDER
Absolutely Pure.

This powder never varies. A marvel of purity strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight brands of dishonest powder. Sold only in cans. Royal Baking Powder Co. 106 Wall St. N. Y.

LOST.—A Pocket Book containing money, certificates of deposit and notes was lost in the village of Lowell, July 21st, 1887. The finder thereof upon the return of the book and its contents to the undersigned will be liberally rewarded. JAS. S. FOX.

Persons calling for these letters will please say "advertised" and give the date of this notice. J. M. MATHEWSON, P. M.

A MILLION DOLLARS.
Million of dollars would be saved annually by the invalids of every community, if, instead of calling a physician for every ailment, they were woe enough to put their trust in Golden Seal Bitters, a certain cure for all diseases arising from an impure state of the Blood and Liver, such as Scrofula in its various forms, Rheumatism, Dyspepsia, or Indigestion, Female Irregularities, Diseases of the Kidneys and Bladder, Exposure and Imprudence of Life. No person can take these Bitters according to instruction and remain long unwell, provided their bowels are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair. Golden Seal Bitters numbers on the list of cures more than any other medicine known, and have already acquired a great celebrity, being used generally as a family medicine. Sold by Hunt & Hunter and B. E. West & Co.
