"What shall I do with the outside of my house?" is a question often asked by those who wish to paint. In exterior decoration, the surroundings should be taken into consideration

In exterior decoration, the surroundings should be taken into consideration, and the building treated in such a way as to harmonize as nearly as possible with them; especially should this be the case in suburban residences, as there is nothing that so effectually destroys the beauty of a landscape as to see a house painted in colors that are in discord with objects about it. This subject has become so important, we have naturally taken a great inter-est in it and have given it no little study. We shall be pleased to answer any spe-cific questions that may be addressed to us. ATTENTION is called to the fact that nearly all other manufacturers of mix-ed paints are obliged to give a rule for the covering capacity of their paints, re-quiring from 15 to 25 per cent. more than this, simply because THE SHERWIN-WIL-LIAMS PAINT is properly made and of pure materials, and therefore admits of be-ing rubbed out under the brush like any pure lead, zinc and oil paint, not requir-ing to be "flowed on," as the manufacturers of cheap paints direct their products to be used.
