FACTS.

It is an undisputed fact that our trade so far this season has been beyond the standard; in fact, far exceeding our most sanguine expectations. Especially was this the case during the month of October. We have no cause for complaint of trade during that or any other month of this season, as have some of our competitors. Our prices during the present season have been down low enough to be maintained during the entire season. A customer buying now gets the same kind of a deal as one purchasing earlier in the season; i. e., A SQUARE ONE; paying the same price, no more, no less. We believe in making prices at the beginning of a season low enough to be maintained through it, thereby making it unnecessary to mark down in order to move stock that a close discerning public have found to be marked too high.

We deem it the best, as well as the most honorable policy to deal squarely with our customers, treating all alike, in making prices the same to each and every one at any time during the trade season.

Being manufacturers of our goods, thereby saving large profits paid by our competitors to others who make our goods, we are in a position to, and do, make prices on our goods that force some of our would-be competitors to mark down their high-priced clothing in the height of the season; thus acknowledging the fact, that they expected to, by spacious advertising and other shoddy devices to pull the public into purchasing inferior goods at inflated prices.

Now, in conclusion, we ask, which is the better way—SQUARE DEALING at all times and under all circumstances, or vice versa? We also ask you to trade with

NEIGHBORHOOD NOTES.

Clarksville.

Perhaps it would be just as well if parents were to keep their children off the streets more, especially after dark, for they are not only annoying to many but do harm to themselves. The parents ought to have something that will amuse the boys these long winter evenings so that they will not care to be away from home.

John Fletcher's house is fast nearing completion.

G. E. Marvin our enterprising hardware dealer has given up his project of entering the employ of Foster, Stevens and Co., at Newaygo, and will remain at his old stand ready to deal fairly and honestly with all.

Ed. Whitlock will soon move onto his farm and G. E. Marvin will occupy his house in Clarksville.

Thirty-nine numbers were sold at the dancing party last Friday evening. A very pleasant time is reported. This is the first of a series of six club dances that will be held at this place to occur every two weeks.

The school at this place is progressing nicely under the efficient management of Miss Alice Peterson. Nearly sixty are enrolled. Parents see that their children are as regular in their attendance as possible, for I have seen so many idling away their time around the corners.

Not much sickness here—about as present.

Ezra Post conceived of a plan where by they could not only remind him that he had reached another mile-post in the journey of life but to meet in social union and to leave behind their reminiscences of the scenes in which he had lived. The evening was spent in feasting on good things prepared for the occasion and dancing. All went to their homes feeling that they were pleased to add to the enjoyment of others. Mr. P. was presented with a gold watch, chain and charm, and other reminders from the relatives and friends present.

The number of men employed at "section" has been reduced to three on each section, during the winter, so I have been informed.

Not a house to rent in this place and several applicants have been turned away. What the place needs is more dwelling houses, more men to push forward the work of making this one of the best markets.

The Eastman Seminary is an established institution. The plans are now being drawn up by one of Detroit's best architects, men are about to begin hauling stone, the site having been selected on A. McCormick's farm, and a most beautiful location it is. Nearly all the material to be put on the ground is coming winter and just as soon as the weather will permit in the spring work will be begun and pushed to completion. It is hoped that it will be ready for opening by Sept. 1st. This school is going to supply the long felt need of such an institution established in this section of the country. Neither money, time nor pains will be spared, it is hoped, to make it a success. Everything is in favor of a successful school here, pure air, the best of water and situated as it is, away from the influence of our large cities, and so easily accessible, too.

M. Shanks has just completed the work of putting in, aside from preparing his lead and well pipes to his barn, a large cistern having a capacity of upward of eighty barrels in which water is pumped direct from the well, and so arranged that water is supplied from it to his barn without any work on the part of man. This is well worth an inspection, and farmers who are so situated would find it a great saving of time to pattern.
