Mrs John Lease has returned from Traverse.

T. P. Coaling, our former watchman at the junction, made calls on some of his friends last week, then went to Brighton to visit his wife.

It looks to a man out here that Lowell people might think their stars that for once they were prepared for a fire, water works must have done it. Now if the City Fathers will take charge of the building of bondfire within the city limits, it seems to us that last Friday's experience may be averted for a long time.

Corn is mostly planted and some of it is waiting for the later rain and warm weather.

We examined cherry trees Monday that did not appear to be damaged at all and peach trees that were literally covered with good, healthy looking, early peaches. Strawberries are just in bloom and are undoubtedly badly hurt.

The weather is very dry. It is an excellent time to burn up rubbish, it is also an excellent time to be very careful that one does not burn more than he intends to.

The farm house of the late John McNaughton was burned to the ground Monday, May 4, with most of the contents. It is thought to have taken fire from a spark, which caught in the roof of the kitchen. The family worked heroically, but only succeeded in saving part of the things from the parlor and bedroom. There was some insurance on the property, but we do not know how much; but we do know that no amount of money can repay the loss of keepsakes that are of value to the family. Attention Farmers!

And owners of horses who contemplate breeding, this spring, for roadsters and carriage horses, with chances of getting 250 performers, Forman and Aldrich have one of the strongest bred stallions ever brought into Kent Co. That is, he is the strongest bred in trotting blood lines, being from producing families on both sides back to the 5th generation, service free for sire being \$250, he having 22 250 performers and 65 others who have trotted from 81 to 46, and one two-year old with a record of 2:49, he has also sired 15 sons and 12 daughters that have produced in 250 list, and our horse, McGruff, is the best bred entire son of Swigert, running back through the days of the very best and most fashionable strains of the Hambletonian family, such as Almost (23), and Alexander's Abdallah (15), being strains with which every horseman are familiar, and aside from his strong breeding he has size and color being dark mahogany bay, standing 16 1/2 hands high, and weighing over 1500 pounds. He is a nice open gaited mover and we think is very speedy for a young and green horse who has never been handled. We cordially invite all farmers and others that wish to improve their stock to come and see our horse before breeding elsewhere, and remember that they are standard bred and registered for four and five generations back, both on the sire and dam side. We don't ask you to take our word, but will show the registration certificate from headquarters, which you ought to demand of every horseman that tells you he has a standard bred horse. For further particulars enquire at "Bos barn, where you will find Mr Ed. A. Forman, who will give you all necessary information desired. There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure it with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney
