## BUSINESS OUTLOOK.

Some Signs of Improvement in Trade Are Noticeable.

An Important Change Thought to Re Near at Hand—The Prospects Are More Hopeful—Business Fallures for One Week.

ON THE MEND.

New York, Aug. 4.—"Bradstreet's"

New York, Aug. 4.—"Bradstreet's" says of the trade conditions:

"While little significance is attached to the moderate improvement in trade at San Francisco, Pittsburgh, Baltimore, Augusta and Alanta, when it is added that clearing-house totals for July report twenty-nine cities with arger aggregates than in July last year, contrasted with the June report, which contained only sixteen cities with aggregates larger than those in June a year ago, it is perceived that there are influences at work at the interior favoring an increase in the volume of business.

"Wool remains steady at last week's i cent advance, speculation having been stimulated by differences of opinion as to the tariff outlook for that staple. Wheat has advanced in sympathy with corn on increased orders and reports of crop damage from abroad, while corn's sharp advance is the partity to exaggerated notions of damage from drought. There is little likelihood of the corn crop being smaller than in either of the two preceding years; notwithstanding our advices of 25 per cent. damage in Kansas and 40 per cent. in Nebraska. Southern crop bros-

two preceding years, notwithstanding our advices of 25 per cent. damage in Kansas and 40 per cent. in Nebraska. Southern crop prospects generally are excellent.

"Improvement announced in general trade at San Francisco is in part based on interest manifested in the war in Asia, provision dealers particularly anticipating largely increased trade. War between China and Japan has not affected the price of tea here yet, although an increased demand is noted in New York, Boston and at Chicago," Dun & Co.'s Review.

R. G. Dun & Co.'s weekly review of trade says:

"An important change in the state of business is near at hand. Congress will act on the sarif question one way or the other in all probability within a week. If it passes the pending bill or if it falls, in either case the definite basis for future business will enable many bill or if it fails, in either case the definite basis for future business will enable many
to act who are now waiting. Whether
the one course or the other would stimulate
the greater increase it is certain that either
would give relief from present paralyzing uncertainties and cause some increase in busihess at least for a time. So much business
has been deferred during the past year and
merchandise stocks have been so reduced that
the mere approach of a decision, without
certainty what it is to be, has this
week encouraged large preparation for
increased business. In spite of outgoing gold
and sinking treasury reserves, small railroad
barnings, some injury to crops, and increased
trouble in the coke regions the tone and the
outlook are more hopeful. The injury to crops
hy hot winds and drought, if as great as some
raport, will affect all interests, but at this seation it is never easy to distinguish between lobal and general damage

"The rush of belated clothlers and dealers
to get goods for the fail trade gives most manufacturers more than they can do for a month
by so, though there seems to be no demand
whatever for spring goods, and manufacturers
are making no effort to get orders.

"Recovery in iron manufacture is hindered
by greater trouble in the coke region, where
many of the new colored hands have quit and
gone back to the south and the strikers have
decided to continue the struggle.

gnany of the new colored names have quit and gone back to the south and the strikers have decided to continue the struggle.

"Commercial liabilities thus far reported in failures during July amounted to 89.016.778, of which \$4.500.229 were of manufacturing and \$4,-281.470 of trading concerns, and the decrease for the month though great in comparison with last year, is hardly as much as has been expected. The failures this week have been 216 in the United States, against 485 last year, and 44 in Canada, against 34 last year.

> Hundreds Ask for Reinstatement-Railroad Officials Estimate That Over 7,000 of Them Will Have to Seek Work Elsewhere.

### LOST THEIR JOBS.

CHICAGO, Aug. 7.—On all roads except the Santa Fe and Eastern Illinois striking employes presented them-selves Monday as applicants for reinstatement. The great majority found that their places had been filled and were told that there was no work for them. In some instances the strikers were informed that they would not be received back under any consideration, but the roads which have adopted this policy are in the minority. Many of the old men who had walked out when the strike was ordered, and who were told that there was no work for them, were taken aside and quietly informed that in a week there would be vacancies in the yards and to call again. On information furnished by general managers, general superintendents and division superintendents of the roads with terminals in Chicago, the estimate of former em-ployes of the railroads in Chicago, who struck and who have lost their situations because new men were it is safe to say that \$100,000 brought in to take their places, who worth of pine timber alone was will be retained unless removed for consumed, beside the hundreds cause, places the number at over 7,000.

The General Managers' association has a list of the names of the men who took part in the car burning and upsetting and of the leaders of the strike. It was said by a superintendent Monday that the general managers had decided that not one of the men whose names were on the blacklist would ever again find employment on any railroad in Chicago.

About 2,000 men applying for work at the stock yards were sent away Monday. The Switchmen's association took charge of the switch engines in use about the yards, the old men be-ing placed over the new ones to give instructions to the latter.

LOSSES BY FOREST FIRES. Damage in the Vicinity of Superior, Wis, Is More Than \$100,000.

SUPERIOR, Wis., Aug. 4.-To estimate the loss caused by the late forest fires in this county would be difficult, but of cords of cedar, thousands of cords of fuel wood and large piles of valuable cedar posts. Twelve homesteaders lost their places of abode and many others lost large crops of hay. About \$10,000 worth of railroad bridges were burned and the railroads were obliged to suspend traffic over the burned districts at different times. The Northern Pacific road, which lost its \$8,000 bridge over the Amnicon river, was unable to run its trains between here and Ashland for five days. In addition to these losses the farmers of the county suffered financially to a considerable extent on account of the destruction of their market gardens and the loss of horses and cattle.

Touching Destruction of Forests. WASHINGTON, Aug. 4.-Responding to a resolution of the senate, Secretary Morton has laid before that body reply, in which he says that experiments as to arboriculture throughout the United States are very much needed. He says that the denuding of the forests is progressing at the rate of 80,000 acres a day. The distribution of pine seeds among inexperienced people, says Mr. Morton, has not proved of utility, and he recommends that young trees be bought of nurserymen instead. A DELIGHTFUL EXCURSION.

The Barunm & Bailey Greatest Show on Earth Offers Low Round Trip Rates. Some of the 1,001 Rare Sights,

The Barnum & Bailey Circus is soon to exhibit in this vicinity, and the usual crowds will doubtless avail themselves of the low excursion rates offered by the railroads for occasron. The fact of the various railroads yearly making excursion rates to these immense shows, is convincing preof of the importance of this vast amusement institution, and the crowded condition of the trains on circus day indicates a popularity attained

by no other shows. The "Greatest Show on Earth" will positively exhibit at Grand Rapids, Aug. 13th, and it is positively promised to previous exhibition ever seen under canvas. One of the principal charms of the circus this year is its educational features. The menagerie is a marvel of completeness, and containes many famous specimens never before seen outside of the jungles. Chiko and Johanna, the giant gorillas, are the main feature of the menagerie this year, when a visit will repay everone. These giants of the jungle and forest are so nearly allied to some race of human beings as to startle everyone with the remarkable similarity. These are the only two gorillaa now in capacity in the world, and the only male and female ever seen together anywhere. Standing in erect position, Chiko is nearly six feet high,
