Last year, the Northeast and Midwest states, were accounting for 45% of the nation's population and 48% of the tax burden, had only 16% of the defense personnel and 20% of the military bases. On April 26, the Pentagon announced plans to close or couple of new items that should substantially reduce almost 1/6 of the military bases in our region. A study released this month by the Northeast-Midwest Institute, a Washington based research organization, shows that the Northeast and Midwest will be more severely hurt by closings and cutbacks than the South and West.
