TWO MORE COUPLES MADE HAPPY.

Big Hail Story by a Former Lowell Boy.

A LOWELL BOY FORCES TO THE FRONT.

The End of the Diptheria Scourge.

A SAD ACCIDENT AT GRAND RAPIDS.

Matters and Things about Home.

MISSING LIVERY RIG.

On Monday in the afternoon, Chas. Vansize hired a livery rig of J. E. Fallas for a twelve mile drive, to return that night. Three days and nights went by and the rig was finally found at Ada, at which place it was delivered by a boy whom Vansize had hired for the purpose. The horse showed rough usage. Mr. Fallas has received a letter from the missing man, dated at Englishville, in which he explains by saying he has "been on a drunk," and promises to come to Lowell soon and settle.

THE ANNUAL SCHOOL MEETING.

The annual school meeting of District No. 1, takes place at the Central school house next Monday evening for the election of officers. All ladies who believe in equal political rights for both sexes should be present. One of the greatest obstacles in the direction of securing equal rights has been the apparent indifference of the women themselves. With the advanced step taken by the last legislature, complete equal suffrage is assured in the near future if present opportunities are improved.

NOTES OF THE COUNCIL MEET.

At the council meeting Monday night, the Marshal was instructed to notify property owners to remove all obnoxious weeds, or to order it done at owners expense. It was also decided to stop the riding of bicycles on the sidewalks between Hudson and Jefferson streets. A petition was presented asking for a sidewalk on the north side of Kent street between Jefferson and Washington streets, and same was granted. A petition for the construction of a sewer was also presented: same was described as follows: From corner of North Washington street along Washington to Bridge street, thence to Flat or Grand river. The petition was ordered placed on file. The assessor reported the total valuation of real estate and personal property at \$433,235 and the rate per cent. was fixed at 1 1/2 per cent.

AN AFFLICTED FAMILY.

Bennie, the little five-year-old son of Benjamin Boles, whose sudden death was recorded in last weeks LEDGER, had the misfortune to break his hip bone on Monday, July 3. Dr. Greene attended to his needs. Thus it is again shown that "troubles seldom come singly."

BRACE OF ACCIDENTS.

O. B. Harris, of Keene, fell from a mowing machine and broke two ribs, Wednesday.

Wm. Pants, of Lowell township, fell from a wagon and broke a leg. Dr. Brooks attended both cases.

MATRIMONIAL.

Married, at the home of Mr. and Mrs. Hubble, south of Lowell, Wm. Davis, son of Geo. Davis, formerly of this place, but now of Detroit, to Miss Mary Wherle, of Detroit. Rev. E. H. Shanks was master of ceremonies.

Married, at the home of the bride's parents, Monday evening, July 3, Frank Horner and Lena Mueller. Pastor E. H. Shanks tied the knot. The happy couple have gone to Chicago, their future home.

A BIG HAIL STORY.

Bracy Edmonds writing to his father, S. F. Edmonds, of this place, from Oak, Nuckolls county, Nebraska, under date of July 2, says:

"This is a nice day. Rained a little this morning, but no hail this time. It rained Decoration day as hard as I ever saw it rain, and hail fell until it piled up in one ravine fifteen feet high. There was ice cream made with the hail one week ago last Sunday. That sounds big, but it is a fact. Saturday evening, it rained here and hailed south-east of here, and the river is higher than in two years before. We celebrate this year at Oak."

LOWELL BOY TO THE FRONT.

Henry L., son of A. H. Peckham, a former Lowell boy and now only twenty years old, who has been employed as book keeper by the National bank of Cortland, N. Y., has been appointed assistant cashier with all the powers of cashier, and the president commends him to the fullest confidence of the bank's patrons.

THE CLOUDS DISPERSE.

Charles Blakeslee and family were reunited last Tuesday, after a separation of three weeks, caused by diptheria in the family, seven of whom have had the disease, and all recovered under the skillful treatment of Dr. Greene. Mr. Blakeslee, being on public duty, has been compelled to stay away from the house during the scourge. He has reason to be thankful that there is no vacant chair. This case terminates the reign of the disease in this community.

SAD ACCIDENT.

There were but few accidents at Grand Rapids, during the celebration, the worst one taking place on the night of the third, of which the Evening Press says:

Charles L. Delnaay, aged 23 years, a finisher at McCord & Bradfield's furniture factory, and residing at 198 Oakland avenue, will remember that date as long as he lives, for at 10:30 on the evening of that day he held a giant firecracker in his hand and the explosion of it mangled the member in such a frightful manner that amputation at the wrist had to be resorted to. Delnaay and other young men had congregated on Canal street near Lyon, and the crowd was engaged in exploding all kinds of fireworks. The unfortunate man, wishing to display more patriotism than the rest, went to near by stand and procured the largest cannon cracker on sale. He returned to where the crowd was and lighting the fuse held the cracker in his hand, intending when it burned close to the body to throw it in the air, but he held it a moment too long, as it exploded in his hand, as before stated. He was stunned by the shock and for an instant did not realize that he was injured, but when he held up his ragged right hand and beheld the fingers torn from the hand the latter split clear to the wrist he started on a run down the street. He was caught by Patrolman Smith and the ambulance being hastily summoned he was

conveyed to St. Mark's hospital, where Dr. Freeman and the house surgeon amputated the hand.

SOME GOOD SUBSCRIBERS.

While in Grand Rapids, Wednesday the LEDGER added to its list of subscribers: Ex-Sheriff John McQueen, County Treasurer Stebbins, Judge Adsit, Congressman Geo. F. Richardson, Maurice Houseman, Turner & Carroll, C. L. Fitch and Andy Fyfe, of the government building, Senator Doran and President Thomas Hefferan of the Peoples' Savings Bank.

ARRESTED AND FINED.

Frank Carr and Clifford Bartholomew, of Keene, were arrested on our streets, Monday, last, for fast driving and drunkenness. They pleaded guilty before Justice Hunter and were fined \$3 each and costs.

HOME NEWS

Rev. Jas. Provan is expected to occupy his pulpit as usual next Sunday.

Rev. A. P. Moors preached at Coldwater, a former pastorate, last Sunday.

Hereafter, Miss Hattie Wilson will sing soprano in the Congregational choir.

Mrs. Joel Aldrich and children, of Grand Rapids, visited at A. R. Buck's on Wednesday.

Lawrence McGugin and Bert Johnson, of Kalamazoo, are the guests of Ernest McCarty this week.

Miss Ella Thompson, of Grand Rapids, who has been visiting Mrs. I. A. Anderson, has returned home.

Martin Brothers, of Grand Rapids, have opened a merchant tailoring establishment in Train's opera house block.

The Lowell & Hastings carried over one thousand passengers to Freeport, 450 being from Lowell, for the Fourth.

T. J. Potter, daughter, Miss Violet, and son, Ellis, of Greenville, visited the former's parents, Mr. and Mrs. W. T. Potter, Wednesday.

Supervisor Bergin reports that Mrs. Crathus is in a critical condition from dropsy, at the home of her daughter, Mrs. Sterling.

There will be a lawn social, given by the L. A. S. of the M. E. church, at R. Quick's, Wednesday evening, July 12. Ice cream and cake will be served.

Mrs. E. A. Coddington, of this township, has been adjudged by physicians to be insane and will probably be taken to an asylum as soon as application is made.

F. M. Johnson, recently publisher of the Mayville Monitor, has begun the publication of an eight-page Democratic weekly in Lowell called the LOWELL LEDGER.—[Detroit Free Press.

Quite a number of people contemplate spending the summer at the northern resorts, but as their plans are not definitely settled, the LEDGER refrains from publishing their names for the present.

Rain interfered with the program at Freeport on the Fourth, disappointing the large crowd in attendance. The balloon ascension and ball game were among the spoiled features. Fourth of July rains seem to prove Prof. Dryden's theory that the heavy concussions of gun firing gather the rain clouds.

The following letter is self explanatory: Mr. F. M. Johnson, Lowell, Mich., Dear Sir—I am in receipt of your initial number of the LOWELL LEDGER. I am glad to note the entry of the LEDGER in the field of democratic newspapers, and I trust that it may meet with a full share of prosperity. I remain, very truly yours,
DANIEL J. CAMPAU.

LOWELL, MICH.

PEOPLE are now attracting attention to themselves by going to the world's fair by all methods of transportation. Some go on horseback, some on muleback, some on bicycles, some walk and we may expect soon to hear of balloon excursions to Chicago. But the good, old-fashioned palce car method still continues the easiest way to get to the fair.

The car of Russia professes to be very much obliged for that extradition treaty. Nevertheless no refugee will ever be sent back to the tender mercies of St. Petersburg under any trumped up charges of attempted assassination. The people mean to have their emphatic veto, if it ever comes to an actual revival in practice of the methods of fugitive slave law times in our courts.

The reported invention of a new gun in France which can pierce the thickest armor plate is another indication that the rivalry between the offensive and the defensive in warfare is not to end until we reach the interesting possibility of being able to hurl an irresistible force against an immovable and impenetrable body. Then, perhaps, the universal peace societies may disband.

One of the unfolding ways to work the normal temperature of the body up to the melting point in this kind of an atmosphere is to think about, talk about, and fret about the weather. Ask every man you meet if it is hot enough for him, and then smile over your original wit. The effort at smiling at such a remark ought to cause enough friction to raise the temperature a half dozen degrees.

To the bright country lad who wants to rise in the world, the only avenue of progress seems to be a good education. The great men of his community are the doctors, the lawyers and the ministers—all probably college-bred, or at least with a degree of culture obviously above that of their neighbors. If this country boy has a soul about the gatherings at the village corner store, he finds no use for his time but in reading such books as his surroundings afford.

During the summer the American boundary commission proposes to establish definitely the line of demarcation between Alaska and the adjoining Canadian territory—an important work that has been too long neglected. Valuable mineral deposits lie within the disputed territory near the head waters of the Yukon river, and these cannot be developed until the boundary line shall have been definitely established. It is worthy of note that as far as possible, the photographic method of survey will be employed by the party assigned to the inland work.

ATTACHING an electric motor to the bicycle so as to serve human muscle is the latest novelty proposed. It would do away with the objection of the Irishman to this mode of locomotion, that he had "no left walk after an ride shut." But to would-be purchasers of bicycles the improvement most needed is a great reduction in price. Considering the material in them, bicycles cost more than almost any other vehicle. There is competition in carriage making that has brought down the price. It is time that competition among bicycle manufacturers did as much for the wheel.

SUPPOSE the person on trial for the murder of the Bordens had been of the masculine gender, would not Massachusetts have been moved by an emotion that would have left New York's crazy efforts to save the murderer of Helen Potts in dismal shade. Would not hacks have been needed to carry away the bouquets which simpering femininity deluged to bestow on murderers? But the accused was only a young woman, and no one but her old pastor sent her a message to tell her that she was not utterly lost. If she had been confirmed the moral of this would be, if you are a woman and want to murder, be a man.

A LADY whose husband had been murdered was trying upon the witness stand to tell as much about the affair as lawyers would permit. She described one incident as having occupied a quarter of a second of time. The lawyer demonstrated that it must have occupied four seconds, and then a halo of triumph might have been observed hanging fondly to the bulge of his brow. Supposing the lady had said "a jiffy," or "an instant," or "a little while," she would doubtless have meant exactly what she wished to convey when she said a quarter of a second. Women whose husbands are murdered can hardly be expected to hold a stopwatch during the episode.

FARM AND HOUSEHOLD.

BEST TOOLS WORTHLESS IN WRONG MAN'S HANDS.

The Farmer Must Improve Himself.—The Planning Board—Good Hogs—Horticultural Hints and Household Hints.

Not the Bread But the Man. No enterprising farmer will neglect getting the best stock possible. All will avail him nothing if he have not in himself the required characteristics to not merely maintain but to improve. Farm stock is never stationary. It is either getting better or worse, and the best-bred stock in the hands of a slow and easy farmer runs out so quickly that he gets little if any good of it. There are millions of such farmers who own and raise the finest animals world of no real good. What such men need is to keep their scrubs and breed them up to better quality, at the same time giving more regular feeding and other care to improve their condition. In this way farmers work a certain degree of improvement into themselves, which, after all, is the most important point to be gained.

An incident from actual life occurring within the past year best illustrates what we mean. A farmer of the slowest and easiest kind a year ago took a strong fancy to poultry-raising, and more especially for a flock of "pure Black Spanish" fowls which he had seen advertised to be sold at a farmer's auction. The farmer had never himself had any fowls except the unprofitable mongrels that he was always burdened with. He had said over and over again that poultry did not pay him. It was wholly true too from his standpoint. But if he could get the pure Black Spanish fowl, one of the best layers in the world, his fortune would be made. By the way, the fowls were not pure bred, for in the flock were two or three Plymouth Rock hens and a fine Plymouth Rock rooster, all of which were sold with the rest at what seemed to the farmer the highest price he had ever paid for hens.

The old stock of mongrels had filled the hen house with vermin, but into this filthy, uncleaned building the new, pure Black Spanish fowls were placed to keep them separate from the Plymouth Rock and the mongrels. The eggs produced in the lousy hen house were carefully saved for setting. Pretty soon egg production inside of the hen house or two high-priced, pure bred birds as was inevitable from confinement of a roving brood under such conditions in midsummer. Then they were let out, though several more died during the fall.

What any wide-awake business man should have done would be first of all to thoroughly destroy all vermin in the hen house, kill off the mongrel fowls, especially the "handsome" Plymouth Rock rooster. In such a flock his only worth was for the pot. When these things had been done, and not before, was time to bring home the new flock. A thorough cleaning of the hen house should have been purchased to breed with the hens. If this had been done the fowls would doubtless have paid for their cost many times over, and there would have been an exceedingly valuable increase in their numbers. It is now there are few chickens that have so far escaped ravages of lice and disease. But their future will be a hard one. They are all speckled, or nearly all, only a young Black Spanish rooster having been saved, and he all the time over-masted by the "handsome" old Plymouth Rock.

The mongrelization of a valuable flock has thus been wholly completed in a single year, and simply neglected. Had a man set to work at a study value of set purpose he could scarcely have accomplished more. That a man who could thus mismanage should find poultry breeding profitable requires that he be made entirely over again and on a wholly different model.

The amusing part of this experiment is that the slow, easy-going farmer does not blame himself in the least for his fabled failure. He made a mistake about the Black Spanish. They have "poor constitutions" and succumb too easily to the attacks of disease. Whether he had a brood strong enough constitutions to thrive and lay in a lousy hen house may well be doubted.

Planting Hedges in Setting Trees. A piece of six or eight inch weather-boarding, eight feet long, with an inch and a half hole in each end and another exactly in the center, has been one of the most convenient appliances we have ever used in setting out trees. Before laying out the orchard, a lot of wooden pins a foot long, an inch in diameter and pointed at one end, are provided. As the rows are measured off, one of the pins is stuck where each tree is to be planted.

When ready to dig the holes, the center hole is cut clear out to one edge, to admit the tree when planting. This center hole is placed over the pin which has been inserted to mark the place of the tree, the board lying in an convenient position, then a pin is stuck in the ground through each of the two end holes. The board is now moved, making it four or five inches larger every way than the roots will extend when spread out (as they should be) in their natural position. A line ready to plant the planting board is placed over the two pins left in the ground at the center shows the exact place for the tree, which is then put in position. Planting then proceeds in the usual way setting the tree an inch or so deeper than it stood in the nursery and working the finest and best soil firmly in among all the roots with the hands; removing the board as soon as it ceases to be of any use—generally before the tree is half planted.

"MAMMA, KISS HIM."

Regardful of a Pretty Girl to the Servant Who Saved Her Life.

"Our lives are full of disappointments," remarked my friend, the surgeon, who is famous for his ability to joke with patients of any nationality in his own language and make them forget their misery for the time, says a writer in the New York Herald, "and I thought up to last week that I had had my full share of them."

"Now I believe that I am way over on my allowance. See if you do not agree with me."

"Early last summer," he began, "a charming young lady was brought to my office from a Western state in a pitiable condition. She had dislocated her ankle some months before, and from unskillful treatment it had become so badly swollen that I had to be put in such a shape that I thought it necessary. She was wasted away to seventy-five pounds, and a mere wreck of her former self."

"I was luckily able to save the foot and bring her back to perfect health, and the blood needed into one of the prettiest girls I have ever seen. She and her mother called on me to say 'good-by' last Tuesday, and she was in the highest of spirits. She danced around the room to prove that her ankle was perfectly strong again, and gave me this handsome silver incipendant for a remembrance. As I incipendant them to the step she paused on the upper step and took my hand again. 'Doctor,' she said, 'beyond the check which papa will send you and the eternal gratitude from mamma and myself, I feel that you deserve no further reward. Learning towards me she went on, 'I had said over and over again that poultry did not pay him. It was wholly true too from his standpoint. But if he could get the pure Black Spanish fowl, one of the best layers in the world, his fortune would be made. By the way, the fowls were not pure bred, for in the flock were two or three Plymouth Rock hens and a fine Plymouth Rock rooster, all of which were sold with the rest at what seemed to the farmer the highest price he had ever paid for hens.'"

The keeping of pigs may be made very profitable where home dairying is carried on, says John Gould in Practical Farmer, but there should be as much judgment and method in the matter, as in the selection and care of cows. To get the best results, milk and butter-milk should be fed in conjunction with grain. The taking off of the cream has the milk so much as to deprive the animal of an agency of quick digestion. With the corn meal and shorts fed with the milk, there should be some oil meal which takes the place of the missing fat and makes the cheese of the milk easily digested. The swill milk should be cleaned out as often as every two days, and scalded. The "bitter water" of very sour milk is poison to a hog. Where much grain is fed with the milk, the latter should never be allowed to become sour. A new change of milk-lactin—may be all right with grain, but never should be allowed to get very sour. Young pigs should always have the skim milk and oil meal, etc., fed to them, and the whole of the milk and no grain, thousands of small pigs with dysentery, and then it is charged up to bad luck.

Let the hogs have access to wood sheds. They will prevent worms. Corn, oats and middlings make a good ration for the sow that is suckling pigs. A New York farmer says an acre of Hubbard squash will fatten ten hogs more than an acre of corn. A hog raiser of experience says he believes a brood sow reaches her limit of usefulness at the age of seven years. Mad is one of the means which the hog employs to defend itself from flies. A mud puddle in the hog pasture pays. The work team should be kept strong. They need a variety of food. Besides being palatable, it aids digestion and preserves a good appetite.

A New York dairyman warns his barn in winter with a hot air furnace. Foolish expense. Barns can be made warm enough by proper construction for all practical purposes. Household Hints. Dry the tin dishes before putting away. A few drops of salad oil on tar stains will remove them. Add a pinch of salt to the whites of eggs to make them beat up quickly. Vinegar will remove the disagreeable odor of kerosene from tinware. Preserved ginger is being fashionably handed around with the ice course. Vinegar and salt will clean the black crust off sheet-iron frying pans, but they should be thoroughly scoured afterward with sand and soap or any good scouring soap. There is a scoop for the purpose of dishing ice cream which serves it in a perfectly round, symmetrical form. It costs but 25 cents and can be found at any shop supplying bakers' and confectioners' utensils. scallopped codfish is made with alternate layers of the salt fish, fresh-oned and shredded and stewed tender with bread crumbs. Have bread crumbs for a top layer, and just before putting in to bake, pour over half a cup of plain drawn butter sauce. Any fanciful and pretty accessory for milady's writing-table is always welcome; and this year's novelty comes in the shape of lovely gray and brown undressed lid penwipers, with bunches of perfumed violets or lilies of the valley fastened on the outside leaf with a silver pin.

HIS DREAM LOVE.

At the Found of Her Name the Jolly Crowd Removeth Their Hats.

They were a jolly lot of traveling men and they had been out on a lark, and returning to their room found their friend Dolliver sitting in a chair waiting for them and sound asleep. He did not even hear them come in. He was dreaming, and a smile disturbed the corners of his bearded mouth, and his breathing rose and fell in a regular beat as if it were keeping time of the passing moments in a rhythmic record, says the Detroit Free Press.

"He's a good-looking fellow, considering he's asleep," said one of his shams, admiring the strong man's unbroken repose.

"Must have been a clear conscience to sleep like that in such a racket," interposed another.

"I'll bet he's dreaming of some woman," said another; "these jolly old bachelors have their little bouts with Cupid even if they don't get caught."

"Here, Dolliver, wake up. Stetson says you're dreaming about some woman," said one of the men, roughly riving the sleeping man a shake.

But he was loth to let the vision of his dream go, and he awoke. How the same in supplication, but so softly that her ear could not be heard. "Here's a go," said one; "won't it be sport to tell him whom he was dreaming of when he awakes. How the fellow does sleep!"

Again he breathed her name, and the smile came back to his face as his spirit seemed withdrawn from a recognition of present surroundings. But at that name his rough, noisy comrades started and a look of surprise, each other's faces with shame and regret, of yearning, almost of pain. And as again the lips of the sleeping man uttered the name they all knew well, their hands stole to their heads to remove reverently the hats they were still wearing, and then they withdrew silently and left their hearts in his dreaming.

For the name he had unconsciously breathed each one bore deep in his heart; it was the sacred name of "mother."

PIG'S CURE FOR CONSUMPTION.

Consumption and people who have weak lungs or asthma, should use Pig's Cure for Consumption. It has cured thousands. It has saved thousands. It has not injured thousands. It has not injured thousands. It has not injured thousands.

"German Syrup"

Regis. Leblanc is a French Canadian store keeper at Notre Dame de Stanbridge, Quebec, Can., who was cured of a severe attack of Consumption of the Lungs by Bosche's German Syrup. He has sold many a bottle of German Syrup on his personal recommendation. If you drop him a line he'll give you the full facts of the case direct, as he did us, and that Bosche's German Syrup brought him through nicely. It is always well. It is a good medicine and thorough in its work.

FRANCE'S EXHIBIT.

FEATURES OF GOVERNMENT DISPLAYED AT CHICAGO.

The Great Building of the State Republic—The Bertillon System for Identification of Criminals—Street Cleaning, Sewage and Fire Protection.

Every branch of the municipal government of Paris has its place in the exhibit, that of the police taking the most space and attracting the greatest attention. It occupies the greatest part of two of the three rooms. The Bertillon system for identifying criminals is the principal feature of the section devoted to the Prefecture of Police. Large photographs arranged in proper sequence show the operation of the system from the time the man is brought into the measuring room until the complete record with photograph is filed. The measuring appliances are so slender and there is a wonderfully life-like wax figure, seated in a chair facing the camera, which not only takes the photograph, but certain measurements at the same time.

IN EVERY Receipt that calls for baking powder use the "Royal." It will make the food lighter, sweeter, of finer flavor, more digestible and wholesome.

"We recommend the Royal Baking Powder as superior to all others."—United Cooks and Pastry Cooks' Association of the United States.

Paris has sent a large collection of models of its street-cleaning machinery. In it is a cart with a hand-elevating device for raising garbage receptacles, and a hand-operated tailboard of the cart. Street-sweepers, sweeping machines, hand-barrows, wheel barrows, brooms, loading devices and other appliances complete the exhibit. The fire department is represented by a number of photographs of engines, hose carts, trucks and life-savers.

A large map of Paris in 1893 is shown, as well as a profile map, and tinted cross sections of the noted sewers of Paris show their construction and use. In this connection is a section of a large dwelling house, showing the sanitary appliances and sewer connections required by the Parisian health bureau. Around the curved galleries a large number of all paintings and large photographs of Parisian scenes are hung.

There is a certain embarrassment experienced by the spectator who is not a linguist, for all the explanatory matter is neatly printed in French, and a vast deal of what is interesting is lost to visitors.

St. John Gilbert's Gift to England. Since Turner bequeathed his water colors to England the fashion has grown. After George F. Watts came the venerable Sir John Gilbert, who presents a large accumulation of oils and water colors to the art gallery of London, Liverpool and Manchester. Sir John Gilbert is a romantic and indeed a medieval painter so far as his subjects are concerned, but his technical powers are so slender that his pictures would not be tolerated in the United States. He is a royal academical and president of the Royal Society of Water Colors.

The Canadian Architect, suggests that in building brick houses where they are not protected by surrounding property, not to forget that hollow walls will add greatly to the convenience of the occupants. They will render the house cooler in summer and warmer in the winter, and will save in materially lessening the heat loss. The cost of hollow walls is only very little higher than that of walls built solid.

If you are constipated, bilious or troubled with sick headache, Beecham's Pills afford immediate relief. Of druggists, 25 cents.

The coast survey of the United States was begun in 1817.

Shiloh's Consumption Cure is sold on a guarantee. It cures Bronchitis, Croup, Whooping Cough, Asthma, etc. It is the best cough cure. 25 cents. Beecham's Pills afford immediate relief. Of druggists, 25 cents.

THE WORLD'S FAIR FAVORITE.

Lowell Ledger.

Published every Saturday morning, at the office on East Bridge Street. Subscription, \$1.00 per year, in advance. Three months on trial, 25c. Advertising rates moderate.

F. M. JOHNSON, Publisher.

LOWELL, MICH.

A YOUNG man in Grand Rapids had his right hand blown off while firing off a fourteen-inch cracker Monday night. Crippled for life, by utter foolishness! Will others take warning?

The Workman of Grand Rapids, charges that there is more crime among preachers than among musicians. Brother Mills is simply guessing at what he doesn't know. The Ledger guesses that preachers as a class compare very favorably with any other body of men on the foot stool.

Our esteemed contemporary, the Journal, starts out this week on the twenty-ninth year of its existence. That is a long life for a country newspaper, when the average is considered and in this case proves the old law of the survival of the fittest. The Ledger hopes that the Journal will live for twenty-eight years more.

ATTENTION is called to the article in "Among our Exchanges," relating to the conduct of a mother superior of a Marquette convent in burning a public library book. If the facts are as stated, the woman should be treated as a criminal. Such bigotry reminds one of the days when bibles were read in fear and trembling, and when the sacred books were burned time and again by the order of zealots and fanatics. Such conduct was had enough centuries ago; today it is a double-edged disgrace. We may congratulate ourselves that in this day of presses and types all the zealots this side of the moon cannot obliterate one good book. A few volumes may go, but the world moves just the same.

The terrible mistake made by a lynching mob in a sister state recently, which selected for its victim a man perfectly innocent of the crime charged, amply illustrates the danger to every member of society, should mob law continue to spread. The next innocent victim may be our neighbor, or a member of our own household. Justice should be swift and sure, and the strong arm of the law must be reached out to punish as well as to protect. When the days of fool juries shall have passed and when before the bar of Justice, the poor stand an equal chance with the rich, and long delays and successive adjournments are no longer possible, then Judge Lynch will cease to hold his sessions in our midst. In the meantime, it will be safer for all "best citizens" to stay in the house when an avenging mob is abroad.

With a short time two multi-millionaires have left this sphere of action, and judging from the comments of the press, the souls of the two will not go to the same future life. Jay Gould's life made it impossible for men to say of him, "the world is better for his having lived in it," consequently, in spite of his stolen wealth, his life was a miserable failure. Who ever heard of Jay Gould's doing anything but betray, grab, steal and freeze onto? If there is anything in the idea of spiritual remorse, Jay Gould is worse off to-day than the veriest pauper that ever lived. It is said that Gould's relatives would have given a million dollars for favorable press comments on the old man's life. It is everlastingly too late. A few acts of generosity, a few thousands for charity and comment would have been more favorable. While Gould was stacking up his useless, incomprehensible wealth, widows and orphans starved to death, and the man who hoarded millions and sees his neighbors perish for want of food is a murderer. Ex-Governor Leonard Stanford was said to be worth

sixty millions; but he has left a monument that will honor his memory for long years after Jay Gould's name and carcass have disappeared forever. The Palo Alto university endowed with twenty millions of Stanford's wealth will reflect lasting honor upon the founder. Would that all our millionaires would pattern after Stanford. Perhaps there would be less bitterness among the poor toward the holders of extreme wealth.

The Grand Rapids Eagle says that four months of Democratic administration has brought this country to "the verge of industrial wreck." The Eagle proceeds on the theory that its readers have short memories. Who does not know that when Benjamin Harrison took the reins of government he found a treasury overflowing with wealth? Who does not know that when Grover Cleveland resumed the presidency he found a bankrupt treasury, and the key thrown away? Is the Eagle so blindly partisan that it cannot tell the truth? Or has it forgotten that President Harrison forbade Secretary of the Treasury Foster to attend the meeting of the Michigan club, at which he had engaged to speak, on account of the then precarious condition of the public finances, and before the wicked Democrats got their fingers in the pie at all? After four years of republican rule, the republican president dared not trust his financial secretary out of Washington for a three days' jaunt, and now comes the Eagle and talks about the ruin the democrats are bringing upon the country. General Russel A. Alger in an interview the other day declared that the Sherman silver law was the cause of all the trouble. Was that a democratic measure? Which is mistaken, Gen. Alger, or the Eagle? The former says it is the Sherman law, and the latter declares "it's the wicked democrats." Mr. Eagle, a careful pilot may, under adverse circumstances, run his boat aground; but the pilot who strands his boat and then lays the blame upon his passengers is meaner than "pussley."

Running a Newspaper. Jim Jones, he was an editor; that is he tried to be. He bought himself a hand press, and he started to do it. He had a few lines of type, but when he was round, some fifteen hundred editors in that same town he found. They all knew more about it than Jones could hope to know. "You must run her, Jones, 'jes' so an' so an' so." Be sure an' boom the Baptist, they're bound to help you out. Give every man a notice; be sure and put it down. Whenever Major Jinks is sent to preambulate Pat in a few free locals for all the stores; an' give 'em a free subscription, if you want your sheet to live! Well, Jones, he done 'jes' as they said, for fear they make a row; but the more he tried to please 'em all, the more they told him how. Until at last he took his book an' laid it on the shelf; then ran the paper in the ground an' followed it himself.

On the Registers. Train's hotel: H. E. Ward, Belding; S. W. Yates, Poplarville; J. W. Watson, Grand Rapids; William Bea, Grand Rapids; D. W. Allen, Grand Rapids; J. A. Cooper, Owosso; M. E. Minor and M. R. Allen, Battle Creek; Frank Jarrett, Ionia; Frank Converse and wife, Roseconon; L. Rosenfeld, Grand Rapids; C. E. Stately, St. Louis, Mo.; Wm. D. Crooke, Grand Rapids; Jesse D. Smith, Ithaca; Roy E. Putnam, North Star; J. B. Heydlauf and E. T. Hilton, Jackson.

Davis house: E. K. Mork, Grand Rapids, R. H. Hall and Mathew McKinstry, Okemos; John S. Forbes; Manly Ausin, Okemos, Ohio; Jas. W. Hine, Amherstburg, Ont.; Geo. E. Kirby and Joe Valpin, Grand Rapids; Levi F. Tuttle and wife, Granton; F. E. Burr, Manly Jones, Perry Shurtz, Grand Rapids; H. E. Ward, Belding; B. F. Thrall, Mansfield; O. E. Brendle, Canada; R. Cortes, Clarksville; A. E. Stevens, Cleveland, O.; Peter Helms, Soldiers' Home; Ira M. Hatch and wife, Lansing; Geo. W. Clark, Kalamazoo; Thos. McLeod, Detroit; J. S. Kymmer, Grand Rapids; N. E. Gibbard, Buffalo; S. J. McPherson, St. John; F. C. Gray, Geo. W. Starritt, F. W. Leonard and D. Moran, Grand Rapids.

Gripping poverty is the widest door in the house of shame, and the fraternity that gives to the wife and daughters of a deceased member \$1,000 or more, is helping on the morals of the people and closing up houses of infamy.

SOCIETY NOTES.

What the Men of Grips and Signs are Doing.

The different lodges in town are invited to instruct their secretaries to keep the Ledger posted in regard to such matters as are of interest to the members.

Lowell lodge of Odd Fellows No. 115 has elected the following officers: J. W. Broadbent, N. G.; B. C. Smith, V. G.; Charles Alexander, Sec.; B. N. Keyser, Treas.

Court Lowell No. 1213, I. O. F., was about the busiest court in Michigan, Thursday evening. They initiated one candidate, balloted for two more and elected and installed officers as follows: C. R. Geo. Barber; V. C. R. R. Morse; R. S. F. J. Moore; F. S. L. B. Lyon; Treas., Geo. P. Coppens; Chap., O. E. Beach; S. W. Will Rogers; J. W. Henry Hiller; S. B. George Kichen; J. B. John Granger.

In a little town in southern Illinois the Farmers' Alliance is strong, and a lodge of that organization exists in the town. They meet Monday nights. There is only one lodge room in the town and Tuesday night it is occupied by the local branch of the Knights of Pythias. The president of the sub-alliance came to town one Tuesday. He had visited the town alliance, and when he saw lights in the lodge room concluded that he would go over and see the brethren. He gave the proper knock at the outer door. The wicket was raised and an ear was placed at it to hear the password. "I love—hoe—I spade," whispered the alliance man. The ear was replaced by an eye and in turn gave place to a mouth which whispered in reply: "The h—l—you do" and the wicket dropped with a bang.

The indignant farmer shortly afterward met a "brother" to whom he told his tale of woe. "Why did I blame it?" was the sharp comment of the brother, "them's Knights of Pythias, and you've given 'em our password." "Dugged if I hain't!" was the response, "but" (brightening up) "durn 'em, I've got theirs."—(New York Herk.)

SOME PLAIN TALK. When Rev. Dr. Parsons made an attack on secret societies last year, he found that he had disturbed a large and exceedingly active nest of hornets, so to speak. When he said that the societies were an influence that worked against the interests of the church, he made a very wide statement, and one not borne out by facts. If he had said that the societies militated against the attendance on church meetings during the week, and against the performance of active work by male members, he would without doubt have been right.

The energy spent in carrying on the different lodges which meet in this city is something enormous, and the amount of money collected and expended is beyond doubt very large. Both these things—the energy and money—the churches would probably like to have directed to the up-building of the particular sect to which they belong. But fortunately they are working in another and better channel than helping to perpetuate division.

In many, many cases the spirit of Christ is much better exemplified in the lodge room than in the congregational meetings, and in this statement is meant no disparagement of the church nor its work. The gospel of Christ is one of brotherhood. He came upon the earth not only to promulgate a new philosophy, but to establish a new social standard. The common people heard him gladly, because they learned from him to look for a time when they would not be outcasts, but brothers to those more favorably situated. The Pharisees cast him out because his teaching led them to fear the deprivation of special privileges.

The societies which exist to-day have been called into being from motives of self-defense, and nine out of ten of them never would have been started had the church performed its whole duty. It is not enough for the Christian to seek the salvation of the soul of his neighbor, he must take him up as the good Samaritan did, and provide for his bodily needs.

Nor is it enough to attend the needs of the body; the soul requires food as much. The perfect church of Christ, then, is one which will combine the work of the benevolent society and the churches as they exist to-day, and such a church will attract the people just as strongly as they were drawn by the early church. The opinion is hazarded that the church of the future will have all the features of the benevolent societies of to-day—life insurance, sick benefits, widows' and orphan's funds, etc., and when the development of our knowledge of the Divine has brought us to that point infidelity will have no place in our midst. For men looking upon the church "will see her good works, and glorify our Father in Heaven."—(Toronto, Ont.) News.

A. J. BOWNE, DANIEL STRIKER, M. C. GRISWOLD, President, Vice President, Cashier.

Henry Brown, of Carlisle, is taking medical treatment at Battle Creek sanitarium.

Five Orosco toughs insulted some women on the streets. Mayor Gould saw the affair, called in and slugged the five and arrested one of them.

At Diamond Lake recently an eagle swooped down on a muskaloog, when a fierce struggle ensued and the eagle was driven back to the water. The muskaloog was a fine specimen of the species, a South Bend, Ind., man, who rowed to the spot and found both dead, the eagle with his talons fixed in the bird's back. He secured the body. The eagle measured seven feet from tip to tip, while the muskaloog weighed forty pounds.—(Detroit Free Press.)

The officers of the public library at Marquette and the modern superior of the content there are having a little trouble over a volume entitled "Story of Liberty" by Charles C. Coffin. A boy drew the book from the library, but failed to return it. When asked about the volume he said the mother superior had taken it away from him. The library officers made a demand upon her for its return and she learned that she had it burned on account of a section which treats of the trouble between King John and the pope at the time of granting the Magna Charta. The volume is worth about \$3 and a lawsuit may be begun.—(Kalamazoo Telegraph.)

The Evening Press reports the following fourth of July incidents: A piece of hanging powder was rubbed in the eye of Frederick Allen, of 116 Summer street, by the fireplug a toy cannon before he was ready to let her go. Corollia Van Shover, of 486 North Prospect street had both eyes badly damaged by the explosion of a "pop" cannon. Hans Christensen of Sweet street, had one of his eyes removed by Doctor Green yesterday, the result of playing with a dynamite firecracker. A friend held the lighted cracker close to Christensen's eye when he exploded, burying a large piece of the cracker in his eye.

VERDUNES. Miss Sarah Lyon, of Grand Rapids, who has been spending her vacation with her father, J. A. Lyon.

Joseph Winger, of South Lowell, has been spending a week with his daughter, Mrs. O'Neill.

Mrs. Nellie Gould and little daughter, of Lincoln, N. Y., are visiting her parents, Mr. and Mrs. Otis Bailey.

Mr. Smith and wife, of N. Y., are visiting Wm. Scheepel and wife on their way home from the World's fair.

Mr. Charlie and family are moving into the Miller house.

O. O. Adams and wife attended the Hooker picnic at Lowell, June 28.

Miss Emma Cole, of Grand Rapids, who has been spending a couple of weeks with her friend, Mrs. E. L. Bennett, leaves Monday for Chicago to attend the World's fair.

S. Swesland, of Lowell, and J. C. Brokaw, an optician of Portland, took dinner at O. O. Adams'.

Mrs. W. L. Merriman has two cousins from Brooklyn, visiting her on their way home from Chicago.

Mrs. Lyman Chaffee's mother and sister, of Lansing, have been visiting her.

Correspondent, please call at Ledger office.—[Ed.]

SOUTH BOSTON. Chapley and May Burr spent the Fourth with their friends.

A son of James Post, of Clarkville, got into trouble very foolishly while out driving Sunday night. He ran into Will Burton's new buggy, spilled out and his best girl and ruined the new vehicle. It will cost Mr. Post a new buggy.

Mrs. Abraham Keller died, Friday, June 30, stricken down with paralysis while preparing to attend the funeral of her niece.

Mrs. Andrew Kine died, June 28, at her residence in South Boston, after a lingering illness of five or six months. Her husband left her in the morning to attend to some business at Saranac, thinking that he would find her a corpse on his return. But such is life. Her funeral was held at the Minnie church, Sunday, July 2. Rev. Curtis preached in English, followed by Rev. Schurz in German. There was a large attendance. She leaves a husband and two small children.

Miss Belle Luak entertained a party of schoolmates Friday evening, June 30. Ice cream and lemonade were the refreshments served.

The ice cream social held at South Boston (Grange) hall, last week Wednesday evening, was a success, the amount taken being about twenty dollars, which will go to the South Boston M. E. Sunday school.

All the members of a family named Bird, living in the northern part of Battle Creek, were seriously poisoned by eating "bitter" berries. The youngest son, a child of six years, who died in terrible agony.

—OF—
GRAND RAPIDS,

Have just opened a new merchant tailoring establishment here in the Train's Opera House Block, where all kinds of work will be done in our line. Prices Moderate.

FIT AND WORKMANSHIP GUARANTEED.

AROUND THE STATE.

PORT HURON RAILROAD MAN CAUGHT ROBBING MAILS

For several months past the postoffice authorities have been puzzled by the disappearance of large numbers of eastern and Canadian letters, which have been lost in view between London, Ont., and Port Huron. During all this time no clue could be found which would throw suspicion on any one, and 12 of the government's best detectives have tried in vain to discover the thief.

Of late the number of money letters lost has increased. Finally Chief Inspector Stewart, of Chicago, and Special Inspector Larrimore, of Battle Creek, began work on the case and the conclusion was reached that the loss occurred at the Port Huron end of the tunnel and a vigilant watch was kept. Suspicion fell on Charles Ford, foreman of the gang of men who inspect and repair cars in transit. In his capacity he has access to all parts of the trains at all times. The postal commissioner sent him thoroughly and paid no attention to him when he went through the car. Inspector Stewart concealed himself in a postal car on a train carrying Canadian mails. Ford soon entered the car and at once began to go through the mail bags taking bag after bag and putting the contents into a small bag. He was arrested and no less than 289 letters were found on his person. He had large pockets in his coat made purposely for carrying large parcels. He would fill his pockets with the letters and open them at his leisure. No estimate can be made of the amount of money he has obtained, but it is thought it will reach many thousands of dollars. Ford was immediately taken before United States Commissioner Harris where he admitted his guilt. His bail was fixed at \$5,000. Ford has been in the employ of the Grand Trunk Railway company for many years, has occupied a responsible position and has had the confidence of his superior officers. He has a fine family and is about 37 years of age.

John Hornley, a farmer living near Port Huron, was killed by a falling tree. While he was driving through the woods with his family a tree which a woodman had cut fell. Hornley jumped out of the wagon to turn his horse aside. The tree struck him and both man and horse were killed.

An ice house at the Harbor Point hotel, near Harbor Springs, caught fire from a barrel of lime at an early morning hour, and the hotel itself was threatened, as there is no fire protection at the resort. A hastily organized bucket brigade finally subdued the flames. Two girls employed at the hotel waded into the lake, filled the pails and passed them up the line.

Disolution of Partnership. Notice is hereby given that the partnership heretofore existing under the firm name of Moore and Carr is this day dissolved by mutual consent.

J. C. MOORE, PORTER CARR, PORTER CARR, PORTER CARR.

The undersigned will continue business at the old stand, and with the services of a competent blacksmith and a good all-around man I will always be found ready to do work on short notice and in a satisfactory manner. I will pay all bills contracted by and collect all accounts due said firm.

Respectfully, PORTER CARR. Dated Lowell, Mich., June 1, 1893.
