At present we are located in the mountains one and one-half mile from the sea and one thousand feet above it. The climate is cool and we enjoy both sea breezes and mountain air. We would like to have our Lowell friends visit us in our tropical home, but as distance will not permit, we are thankful for the weekly visits of The Ledger.

Wishing you success, I am yours respectfully, Jay J. Eyans.

Where left him for the observation of passers by.

Duche, a resident minister of Philadelphia. In this room rest the same chairs that were used by the cabinet at that session but are partitioned off in one corner for exhibition only; but the chairs and settees used by the other members of that first Congress are ranged around the room and I suppose all visitors are tired when they see these anciedt relics and must of course rest a while. At any rate we were taken with a tired feeling and so rested our weary bodies where our forefathers rested.

I am yours respectfully, Jay J. Eyans.

TO THE VILLAGE TRUSTEES

Gentlemen:-Your committee, to whom was referred the applications for electric road franchises, respectfully beg leave to submit to your honorable

body, the following report.

Believing that this question is of vital importance to future welfare of our citizens, we deemed best to get all possible information bearing on the subject, especially the influence of electric roads on the commercial welfare of villages and cities adjacent to larger cities. To that end your committee thought best to make personal investigation along that line and induced one of your number, Mr. VanDyke, to investigate the situation in that section of Michigan and Ohio where such roads have been in operation for some years. Mr. VanDyke made following reports of the facts bearing on

the situation as learned by him.

Obtained following information in reference to Pontiac, Michigan, through a gentleman who had lived in Pontiac all his life, been in business there for years, and who is now a real estate owner in Pontiac stated business in Pontiac very dull-attributed dullness to inone-fourth since building electric to the commercial interests of the road, while the population had city. doubled.
