From Small Beginnings

Your. bank account will in timespring into quite a big sum.

They say a "tall oak from little acorns grow"—just so with your bank account. You can start in a small way—\$1.00 will open an account, and then by making deposits from time to making deposits from time to time, upon which interest will accumulate, your savings will amount to a tidy sum. You should be interested in watching the figures grow. Don't you think it is about time to start?

THE CITY BANK, HILL, WATTS & CO.,

will take care of you and accept any deposit you care to make, whether it be large or small. We allow interest at the rate of 3 per cent per annum on Savings Deposits.

Window Broken with Stone and Shoes Stolen.

A. J. Howk & Son's store was "burglarized" last night and two pairs of patent-leather, No. 6 shoes were taken from the window display

ledge.

The plate glass side light, east of the front entrance, about 3ftx6 in dimensions, was smashed with a stone about the size of a man's fist, making a nearly circular hole large enough to admit an arm to the shoulder. The stone, wrapped in black, coat-lining cloth and tied with twine, was found on the ledge, furnishing a possible clue.

The sheriff has been notified and Deputy Morse is investigating.

Night-Watch Lane knew nothing of the occurrence until he came down town after his forenoon's rest. One man can not watch both sides of the town at once, but can be easily shadowed by wrong-doers and depredations committed in one end while the officer is in the other.

received during my absence in the east therefore remained unaus-wered until my return today. There is nothing especially new in railway matters. We have been delayed sev-eral weeks by reason of our failure to agree with the Grand Rapids Railway Company on a terminal contract. We have now reached a very satisfactory conclusion and the contract has gone east for President lark's signature.

The Farnham Company are now preparing to let their sub-contracts, having received bids from a great number of concerns for the various portions of work to be performed.

We cannot say definitely just when they will commence actual construction, but I do not see how they can start under thirty days and it may possibly take a couple of weeks We are not pushing them longer. any for the reason that there is am-ple time for them to complete the work before April 1, next.

From Our Point of View

A MIGHTY wail is going up from the sandy, wind-swept
Summer resorts of Northern Michigan because of a great falling off in the annual crop of resorters; and many explanations, course of study for the High School:

At a recent meeting our Board of breeding, increases as the utility of the employment, from a purely practical point of view, diminishes. A MIGHTY wail is going up from the sandy, wind-swept none of them satisfactory, are given. The fact is that at no First Semester Second Semester Summer resort can one make himself so comfortable at so little Latin cost as right at home, if that home is in village or country, Physiology with average comforts and conveniences. After all, the best part of going away from home is the final getting back. The traveler is the goose that everybody plucks; and he is mighty lucky if he has a few pinfeathers left on his return. If in the heated vacation season, people would throw off their business and household cares and devote themselves to a comfortable rest right at home, there would be less worry about next Win-Book-Keeping ter's coal bin, and no one would complain but those who make their living off the resorters. Given such natural advantages as are furnished by our rivers, lakes, parks, hills, valleys and delightful drives, certainly the people of Lowell have little need to endure the discomforts and expense of travel and exile to obtain all that Nature can furnish in peace, comfort, retirement, recreation, fresh air and rest. We've a Summer resort U. S. History and Croics of our own, thank you.

TEDDY struck the nail on the head this time. Asked to interfere in behalf of a Negro condemned to death for assaulting a little girl, he refused, and said: "It is to be regretted we do not have special provision for more summary dealing with this type of cases. The more we do what lies in us to semighted with these cases the stending with these cases the stending will probably by cure certain and swift justice in dealing with these cases the more effectively do we work against the growth of that lynching spirit which is so full of evil omen." The trouble with Studies in Italics all pupils must

ing spirit which is so full of evil omen." The trouble with the Negroes is that while they denounce lynching they fail to condemn the hideous crimes for which their fellows suffer. Booker Washington furnishes an exception to the rule; but he is indeed an exceptional Negro.

Senator Lodge will either come down from his high-protection perch and promise his constituents to work for reciprocity with Canada and Newfoundland, or fifty-thousand Massachusetts Republican business men will give him a layoff to attend to his private affairs. Partisanship is one thing and paying thirty cents a pound for beefsteak is another. At least, that's what they say down in Boston.

Seven throughout this year.

Suddes in Italics all pupils must take. Beside these, a pupil may generally elect two in each semester. This course is based upon the removal to the committee on High School course of study which was presented at the meeting of the State Association last December. It differs from the course heretofore followed here in that it offers commercial studies throughout the four years. This is a long step in advance, for it gives the student of limited means and the student whose natural interests are not so much in books as in practical matters a chance to prepare in the High School for a definite position.

Very lew pupils are mature enough

The nomination of Ferris for governor was certainly a surprise; but a good one, for all that. Prof. Ferris is a good, clean, capable, self-made man; and any one who wishes to help rebuke the Republican State machine will have to search hard for an evene for falling to do so.

for an excuse for failing to do so.

MR. STEARN'S conversion to Democracy was too sudden for many delegates to the State convention; but he will have to stick now or be a man without a party. He will, however, show the sincerity of his demands for primary reform by a loyal support of Ferris.

CANDIDATE WARNER commends his opponent and thinks there should be a "good, clean campaign." So, there should Personally, both candidates for governor are unobjectionable and any villification will recoil upon the villifier. The question is, Machine rule or popular will? Primary reform or more Atwood & Co. dodge? And, "A question is never settled until it's settled right."

That legislation has failed to destroy the liquor traffic, is one of Potter's reasons for starting a "church saloon." Legislation has also failed to abolish murder, arson, theft and assault. Following the Bishop's line of reasoning, the church should start "Christian" institutions for the "temperate" practice of these latter, crimes. To Hades with such "reforms!"

The Michigan Democrat platform is square-toed in its demands and pledges for primary reform and the election of United States Senators by direct vote of the people. All citizens who care more for the honor and welfare of our State than for petty politics, know what to do and they can do it without affecting the result of the national contest in the least.

DR. M. CLAYTON GREENE

If it were possible to print a letter without depressing a key, then perfection would be reached as far as that particular construction is concerned. To date this has not been possible, but it naturally follows that the typewriter having the shortest key depression is the nearest perfection in this respect. The key depression on the Fox Typewriter is \(\frac{1}{2}\) in. and is uniform, all keys being exactly alike; on all other typewriters the key depression is \(\frac{1}{2}\) to \(\frac{1}{2}\) of an inch and on many fully an inch, and very frequently is not uniform; the advantage the operator of a Fox typewriter has is readily apparent. The cut shows the arrangement of the key levers and the key depression.

Our Free Trial Plan enables anyone, anywhere, to give the Fox a thorough trial. Be sure and investigate it before buying.

Mrs. Pinkham Tells How Ordinary Tasks Produce Displacements. Apparently trifling incidents in woman's daily life frequently produce displacements of the womb. A glip on the stairs, lifting during menstruction, standing at a counter, running a sewing machine, or attending to the most ordinary tasks may result in displacement, and a train of serious evils is started.

The first indication of such trouble should be the signal for quick action. Don't let the condition become chronic through neglect or a mistaken idea that you can overcome it by exercise or leaving it alone.

More than a million women have regained health by the use of Lydia E.

His Little All.

It is a pity to spoil a good moral, but it is some times done when a story is excavated to its foundations This story is, however, good enough

to stand on its own leet: "When I came to town, twenty years ago," said a prosperous man of ample waistcoat, "all my earthly possessions were wrapped up in a red bandanna handkerchief."

"And now you own 300 acres of land and that factory on the edge of the town?"

"Yes." "May I ask what you carried in the red bandanna handkerchief?" "Thirty thousand dollars in cash and bonds."-London Outlook.

He Wasn't to Be Fooled by a Sign. An old fellow from one of Portland's most remote suburbs, while passing a certain hardware store in that city the other day, noticed a sign which read: "Cast Iron Sinks." The old fellow chuckled softly to himself, then, gradually, as the absurdity of it dawned upon him more forcibly, he broke into a loud guffaw. A passerby, attracted by the apparently unseemly mirth of the old man, made bold to ask what amused him so. 'Why, gol durn it," he sputtered between spasms "ef some folkses air not gettin' ter be reg'lar durn fules. The idee uv hangin' up er sign tellin' people that 'cast iron sinks.'"-Lewiston Evening Journal.

What Have You Behind You? At school, little Charlie, being one of the geography class, was deeply interested in learning the points of the compass. Said the teacher: "You have in front of you the north; on your right, the east; on your left, the west. What have you behind you?" After a moment's reflection Charlie exclaimed: "A patch on my pants." And to make the information more binding Charlie continued in a shamefaced manner: "I knew you'd see it, I told mamma you would."-Short Stories.
