LOWELL LEDGER LANSING NOTES

Senator Straight was unable to muster 22 votes in support of his proposed amendment to the constitution to permit state institutions to do their own printing when so directed by an act of the legislature. The amendment was beaten by a vote of Maynard 16 to 13. Senator Straight's object in introducing the bill was to permit Jackson prison to publish its reports, but other state institutions owning printing outfits could have been accorded the same privilege under the provisions of Straight's amendment. Senator Verdier, in opposing the passage of the amendment, declared that it was simpl a step in favor of convict labor. It is true that the adoption of such an amendment to the constitution would be a hardship on some of the union printers of the state.

Lansing, Mich.-The appointment of James W. Helme as dairy and food commissioner that was made by Governor Ferris several weeks ago, will not be confirmed by the senate. Although the senate went into executive session Tuesday afternoon and confirmed another list of appointments from the executive office, no action was taken on the appointment of the dairy and food commissioner. Opposition to the confirmation of Helme is so strong in the senate that the committee on executive business refuses to report out his name. However, as Helme's term automatically expires when Governor Ferris leaves office December 31, 1916, it apparently makes little differences whether the senate confirms him or not.

James K. McNaughton of Calumet and his wounds. William Kelly of Vulcan as members were also in the list confirmed by tember.

days ago, was referred to the finance habit of carrying firearms. Specialty: Eye, Ear. Nose and Throat. and appropriations committee where Office: McCarty Blk, Lowell, Mich. it was immediately reported out and state ORDER IS REVERSED the total number 14 instead of 13, the tee of the whole Tuesday afternoon the senate voiced its approval of his appropriation and it will pass on third Physician and Surgeon reading with an immediate effect clause attached. Just what will happen to this bill when it reaches the house is a question. So far this session the house has been the reactionery branch of the legislative body and House, 113 a number of really meritorious measures have been slaughtered by the representatives for apparently no rea-

Opinion of Court Is Lengthy and Shows Great Study of Case of

New York-Harry K. Thaw won a victory Friday in his fight to keep from being returned to Mattewan when Justice Hendrick, in the supreme court, granted a motion for a trial by jury to determine Thaw's sanity. Thaw was jubilant and said he would come out entirely victorious. The trial was set by Justice Hend-

rick for May 17. This was followed by & motion by John B. Stanchfield, attorney for Thaw, asking that the jurors be drawn from the regular panel instead of a special one, which was granted. Mr. Stanchfield said he will probably call ten witnesses, of whom probably three will be experts. Wellman, a farmer, October 5, 1910, The trial, he said, probably would not last more than a week.

In announcing his decision, Justice Hendrick made it clear that the jury accord with the evidence and with jus- and Central American republics. tice." The court, he said, could disreown decision.

Justice Hendrick's opinion was a of whose members are expected to FREDERICK SEWARD IS DEAD lengthy one and showed he had made play a prominent part in the confera careful study of Thaw's case and ence. authorities and he decided to exercise state department.

Attorney-General Woodbury Friday night said he would appeal from Justice Hendrick's decision granting

"It is the opinion of the attorneygeneral's office," Woodbury said, "that the court is without discretionary powers to grant a jury trial upon the return of a writ of habeas corpus to test the sanity of Mr. Thaw. I shall Mrs. Emma Garland, of Bay City, ask for a stay on the execution of heard by the appellate courts."

FOR RELIABLE WHITE BREAD

Advantage in Mixing the Dough Early In the Morning-Then It Will Not Rise Too Much.

The best time to mix bread is early in the morning. This gives an opportunity to see that the dough does not rise too much. Overrising is one of the principal causes of failure in bread baking. This is often the case when mixed in the evening and allowed to rise all night. With an even temperature the dough should be raised and ready for the pans in three hours. and in less than five hours from the time of mixing the rounded, shapely loaves should be out of the oven rest-

ing on the "cooler." Dissolve one whole yeast cake in onehalf cupful of warm water, scald 11/2 cupfuls of milk, to which add butter the size of an egg, one tablespoonful of sugar and one tablespoonful salt. When the butter is dissolved and milk lukewarm, add the dissolved yeast cake and stir all into six coffee cupfuls of bread flour, add warm water to make stiff enough to mold.

Turn out on a well-floured molding board and knead ten or fifteen minutes, or until smooth (it should be mixed so stiff that it will take up no more flour). Return to the mixing bowl, which should be well buttered: cover, and set in a warm place to rise. When risen to the top of the bowl stir down, pour out on the molding board again; it should now only require a little flour for handling. Knead well, divide into four parts, putting two of the sections into each well-buttered baking pan. The pans should be about half full, as the dough will double its bulk in rising. Raise to the tops of the pans and bake three-quarters of

This is for two good-sized loaves, and if properly baked will be white. light and feathery.

RHUBARB IN THE SPRING Enthusiast Classes Vegetable as Composite of Early Sunshine and the

Song of the Robin.

There are many "rhubarb recipes for spring days." They are for fritters and pie. And their very sounds put a smile on life. There are some ple defraud themselves. They revel in their own prejudices. Rhubarb is the very essence of spring, a happy composite of the early sunshine and the song of the robin. Of course, hard hearts cannot see it thus, for rhubarb

was made for gentle souls. But the fritters and the pie are not so much the melody of spring as the ward, twice assistant secretary of sauce, when brought forth by a grace, state, son of the noted Civil war sec- a smile and a sweet thought. It is start the birds to singing. Prejudice and vanity will never do it. That ruddy glow in the sauce is the reflection of Auburn, N. Y., at whose residence ser- heart is not in it. Oh, there be rhuvices were held prior to interment barb sauces that are an insult to in the family lot at Fort Hill ceme. spring and make the appetite hanker for kraut and turnips, but the real Frederick W. Seward was the last sauce, from which the spirit of the survivor, it is believed, of those who opening year sings its song of faith and love-that is the sauce that turns rugged life into tender sentiment and changes hunger into delight .- Columbus Journal.

When Mayonnaise Curdles.

No matter what the cause mayonnaise is found to curdle almost as often as it stays smooth. There is no reason to despair, however, for by beating the yolk of a fresh egg quite smooth and stirring it into the curdled mayonnaise the dressing will be united

A precaution which every cook will which is more than eight hours old in summer or twelve hours old in winfrom curdling. Otherwise if she tries to boil milk left over night she may.

Princess Sherbet.

Take a cupful of the sirup from a jar of raspberry preserves and the same amount of juice from a can of pineapple: add two tablespoonfuls of lemon juice and a sirup made by boiling together a pint of water and a cupful of sugar. When cold add four tablespoonfuls of orange juice and freeze. When stiff, open the freezer and add the white of an egg, beaten stiff, with a teaspoonful of powdered

Little Pucks.

Cut some mutton into strips about three inches long and an inch and a half wide, without fat. Season with pepper and salt, roll up and put in a skewer to fasten. Put in a pan with just enough water to barely cover, and bake for about half an hour. Take out, put on a platter and thicken the gravy. Serve with mashed potatoes.

Indian Croquettes. Mix to a paste five teaspoonfuls cornmeal, six tablespoonfuls wheat flour, butter size of an egg, four tablespoonfuls granulated sugar and a litthin, cut into forms and bake in a greased pan (bake sheet) in a reasonably quick oven. Serve, if liked, with sirup or powJered sugar.

Emergency Descert. Mix together one-half cupful bread flour, one-fourth teaspoonful salt and one teaspoonful baking powder, Moisten to a soft dough with milk. Drop a spoonful in each mold, well buttered, place a small piece of preserved fruit on top, cover with another spoonful of dough and steam ten minutes.

NEW DEVICE ENDS PERILS OF THE RAIL

by ROBERT H. MOULTON

senger cars on the railroads having been the means of saving hundreds of lives, the interstate commerce commission now proposes to find some device that will make derailment. collisions and wrecks impossible. A nation-wide

search is being conducted under congressional order, and to Anatol Gollos, a Chicagoan, has fallen the honor of being the first inventor in the country to procure an official investigation. the reward coming after three years of work on an automatic train control and recorder. Tests are made by the government only after the preliminary inquiry has shown that the device is practical.

The tests of Mr. Gollos' invention will be made on the main branch of the Chicago, Burlington & Quincy railroad, a stretch of six miles of track having been equipped for the purpose. They will be held under the personal direction of H. J. Lyon, inspector of safety appliances for the commission, who has reached Chicago prepared for a six months' study of the subject.

The Gollos automatic train stop device consists of a charged third rail, about one hundred feet long, placed at every block. The energized track comes into contact with a shoe fastened on the tender of the engine which is susceptible to the slightest influence. If there is another train within a radius of one mile and a half, if there is a break in the track, or anything wrong at all, warning is given to the engineer by a shrill whistle placed near his seat. If he does not slow down his train at this warning, the air brakes automatically set. This air is applied quickly, but in a way that stops the train gradually. At private tests given by Mr. Gollos recently trains of all weights and speed were stopped in 150 to

Aside from the fact that the demonstrations already given have proved the practicability of the devices, the inventor claims that they are

more economical than automatic installations made according to present practice. In addition, they have the advantages of, first, train control; second, visible and audible signals; third, automatic record to check engineers, thereby holding them to a close observation of signals

An important feature of the system is that it is so constructed, on a closed circuit principle. disarrangement of any part of the main track or contact rail connections, or the failure of the electric current, or any disarrangement of the locomotive attachments, will cause the most restrictive indication, when the train will be brought to a stop, until corrections or re-

pairs are made, when it can proceed, but under control and at a predetermined speed only. The wiring is specially constructed so that any crosses or grounds will cause a danger condition. If repairs cannot be made immediately by the engincer, he may cut out the instruments, when the train can proceed, but if this is done a record

Another feature of the device is its elasticity and adaptability to the movement of any and all kinds of trains, irrespective of their motive power or frequency. The system will work equally well on trains operated by steam, electricity, gasoline, or compressed air, and whether such application is direct or by means of the trolley, third rail or storage battery methods.

The initial purpose is to promote the safety of railway operation and to eliminate all danger from lapses of memory on the part of the engineers or others connected with the operation of railways, and to make such a record as will provide an exhibit of proper or improper operation and observance of signals and orders.

The control of the movement of trains is in the hands of the engineers just as long as they observe the restricting signals provided for their guidance, but any failure to do so immediately and automatically relieves them of said control. As soon as the conditions permit of safely doing so, the control is again and automatically restored to the engineer.

The system is of the intermittent contact rail type, with the engine apparatus clear or inoperative while running between points of indication. When the engine shoe makes contact with the contact rail, the engine apparatus is still held clear or inoperative, provided the contact rail is energized. If it is desired to make the control of the speed of the train continuous, instead of intermittent, particularly in congested terminals, the desired object is accomplished by making the contact rail continuous. Both the contact rail and the shoe on the engine are so constructed as to keep them within the limits of the safety clearance requirements, and personal contact with the contact rail is not injurious.

The manner in which the purpose of the system is carried out is as follows:

When a train is standing at a terminal, or at any other point, the automatic apparatus is in such condition that the train can only proceed at a predetermined reduced speed. When the engineer opens the throttle to proceed, it automatically starts a whistle in the cab. This whistle continues to sound and the reduced speed regulation continues until the train contact shoe engages with a clear contact rail. This rail being fully energized supplies a current which sets the control in position to permit the train to proceed at full speed, and also stops the whistle. The contact with this shoe is recorded by a recording apparatus and the contact also causes the lighting of a signal lamp in the cab. The passage of this rail is acknowledged by the engineer, who presses a button which puts out the

ishness.

SHOWING SHOE WHICH IS ATTACHED TO THE SIDE GOVERNOR WHICH CONTROLS SPEED OF THE TRAIN IN CAUTION TERRITORY OF LOCOMOTIVE

lamp and this acknowledgment is also recorded

by the recording apparatus.

TESTING GOLLOS AUTOMATIC TRAIN CONTROL

OPEN CABINET OF AUTOMATIC TRAIN CONTROL

The next action which may be described, is when the contact shoe engages with a partially energized contact rail, which indicates a caution condition. When this occurs, the engine apparatus is again set for reduced speed as when starting out, and the whistle blows continuously. If, in the meantime, the train in the advance block has moved on, or any other obstruction has been removed, so that the next contact rail is in "clear" condition, the cab system will be automatically returned to normal, full speed condition when it passes such contact rail, and the

On the other hand, if the danger condition continues and the contact rail is de-energized, denoting danger, the train will be automatically stopped when its contact shoe comes in contact with this de-energized rail. This stopping will also be recorded, and at the same time a chime of two whistles will be sounded to warn the engineer that this is a stop application.

If the engineer desires to proceed, he must press a button on the cabinet door, which resets the automatic apparatus to caution or slow speed condition. Having reset the instruments he may now proceed as in the first instance, at controlled reduced speed.

If the engineer has observed a danger signal and stops his train before the contact shoe comes in contact with the de-energized rail, he may, if necessary, in an emergency, pass the de-energized rail. In order to pass the de-energized rail a separate and distinctive switch is provided, which must be held down continuously while passing the rail. The pressing of this switch is also recorded. However, if he should attempt to pass a rail by pressing on this switch before the train has stopped, he would cause a stop application. After passing the de-energized rail, as before described, the train may proceed under caution operation at a predetermined, controlled,

While an automatic control system has many advantages, some of these advantages would be lost, if the system could be freely manipulated, unless such irregularity is automatically detected and recorded. In order to insure the proper operation of this system, and to record the action thereof, as well as to record whether the engineer is properly observing his signals, certain portions of the system are inclosed in a box or cabinet. This box or cabinet is made to contain the valves, magnets, relays, clock and recording mechanism, and is provided with a lock and a special door. The cabinet is about eighteen inches square and six inches deep and may be mounted in any convenient place in the cab.

This system is intended to actuate or co-operate with any suitable form of mechanism on the car or locomotive which is used for stopping the same, such as brake actuating mechanism, and it is particularly adapted to actuate or co-operate

branches, crowding onward, when appeared in the boiling water,

The inventor, Anatol Gollos, was born in 1877. Early in life he showed a marked interest in mechanical subjects, and after a general education was sent to a manual training school. There he studied for six years. Electricity, though then in its infancy, had attracted much attention and Gollos dropped all other subjects for a special course in electrical engineering.

employed for this .purpose

After serving a rigid apprenticeship, Gollos went to Germany. There he stayed for four years, during which time he superintended several big government jobs. In 1903 he came to America, and the following year found him in charge of the main switchboard at the Louisiana exposition in St.

Louis. Opportunities in Mexico attracted him and, after the close of the exposition, he went to Mexico City. There he remained for a year, serving as superintendent on various electrical installations. He was in charge of the electrical installation in

the new Northwestern passenger terminal in Chicago and other important works.

TRICKS THAT BULLETS PLAY

Life Saved by the Hook of a British Officer's

Helmet Chain.

It has been truly said that, once you fire a bullet from a modern rifle, none can forecast what

it will do or where it will ultimately come to rest. Even when a bullet has an uninterrupted course, says Frank Scudamore in the London Globe, it is capable of upsetting all known calculations of its flight and range. Before the battle of Omdurman a sick officer was taken across the Nile and placed under an awning at least 5,500 yards from the nearest point of possible fire. This should have insured him an ample margin of safety, but none the less a stray bullet ate up the intervening three miles of desert, struck him in the head, and killed him.

Shortly before the battle of Giniss, in the Sudan, Gen. Sir Archibald Hunter, Colonel Hacket-Thompson, C. B., and another officer whose name escapes me, were reconnoitering through an opening in the wall of a disused sakeeyeh, or waterwheel. The hole in the wall was so small that the officers had to stand one behind the other its used by Caillot as well as by other er to see anything. The officer whose name I houses. forget was in front using a pair of binoculars, while Sir Archibald Hunter was in the rear. The glint caused by the setting sun shining on the glass of the binoculars attracted the attention of distressingly ugly. Cheruit and some a dervish who, together with others, was retiring of her followers almost discard the along the Nile. He stopped, took aim, and fired. It was a very good shot, for it sped through one frocks well up on the chest. The lens of the binoculars, through the brain of the officer holding them, killing him on the spot, smart. through the shoulder of Colonel Hacket-Thompson, and finally lodged in the breast of Sir Archibald Hunter, where, I believe, it remains to this

The vagaries of a bullet when it touches the human frame are almost beyond belief. During another Sudan battle I saw an officer, a friend FROCKS OF COLORED LINEN of mine, go down apparently shot through the head. To my surprise and relief I met him walking about after the battle apparently none the worse, save that his head was bandaged. Then he showed me how a bullet, striking and deflected by one of the hooks of his helmet chain. had run right round his forehead, cutting a groove under the skin, and had then glanced off the helmet hook on the other side.

'TWIXT BULL AND BEAR

NE'NEST GOWNS DEVOID OF COM-PLICATED DRAPERY.

Picot Edge Much Used Instead of Hem-Jet Retains Its Popularity -Organdie Embroidered in Colors a Feature.

Simplicity in line is a strong feature, and it shows the straight path along which the winds are blowing. There is no complicated drapery or ornamentation. Naturally, the French designer uses more skill in the manipulation of material and effects are usually simpler than the methods when the American sewing woman goes to copy them. One of the well-known Fifth ave-

nue importing houses in New York said that it was no easy matter to rush out new gowns these days. The trick they turned in other times of taking an order for a frock on Saturday afternoon and delivering it on Wednesday morning was too difficult to contemplate now.

The fashion for putting a picot edge everywhere has gained in importance, and when there are yards and yards of it on one frock time must be allowed for such work. And yet this trick of putting the tiny pointed edge instead of a hem contributes to the seeming simplicity of a frock.

Jet is used in quantities, as everyone expected. Jenny likes it well and puts it under tulle more than she does over it. There is a strong feeling for the styles of 1840 and 1870, both of which call for quantities of

Thus evil may be said to do God's work (ch. 4:1) "to be sent from Jehovah."

IV. Summary. All who envy are murderers at heart (Matt, 27:18; I John 3:12, 15). The present day murderers hurl their javelins of slander, lying and vituperation against the reputation of the men whom they hate. Or else they hurl unfair and unjust business methods at others that they may perpetuate their power or else build themselves up upon the ruins of those whom they envy. Saul missed David but he was no less a murderer. Satan always overshoots the mark when he assails one of God's anointed, chosen ones. Saul could not harm David though he wished to ever so much (Ps. 37:32, 33; Isa. 54:17; Luke 4:30; 10:39). Saul's hatred stopped not even at the threshold of David's house but invaded the sacred precincts of his home. Envy is blind, it assails all that a man has, spares none with whom he is connected and colors every act and relation of life even to the relations of father and child. Saul was frustrated by his own children, Jonathan and Michal. David's danger

Linen frocks of more or less severity are made up in the very soft linen and in lovely colors. Very frequently the linen is used only for a skirt and an overblouse of some kind, while the long-sleeved underbody is of finest cotton voile or sheerest white linen. Russian blouse lines reappear insistently in these overblouses and in silk There are many little plaited overblouses belted a trifle high, with very short frill peplums, among the twixt season models in crepe and soft silks and a popular little frock of this type is rose crepe. Its overblouse and skirt are entirely plaited in narrow box plaits, except where the fullness One of the New Shapes With a High

TWENTY-SECOND YEAR Under one management

Subscription by Mail, Postpaid SIX MONTHS..... THREE MONTHS..... Entered at the postoffice at Lowell, Michigan as second class matter.

STOP! LOOK! LISTEN!

As before mentioned in this paper, Superintendent Frazee is quoted as saying that:

"The high school is to be equipped with a print shop and that the new branch of printing will be added to the course next year. An experienced printer will be employed to give instruction."

Now that the statement is printed in the Ledger, the people of Lowell will have an opportunity to read it and it will not take Mr. Frazee long to discover that his proposal is a mistake and one that the publie will not "stand for," at the present time at least.

To non-taxpayers and transients, it may appear a joke that the citizens of Lowell, on top of their already burdensome taxes, must pay principal and interest on an investment of \$50,000 for a new Central building, practically mortgaging every home in the district for thirty or more years; but to those who must stay here and bear the burden, the further proposal at this time to enter new fields and to incur new and unknown expenses in adventures foreign to the legitimate purposes of our public schools, is an outrage, which if persisted in will bring unpleasant consequences.

Common sense and justice demand that no new expenses be incurred nor no new frills added to our already over-large curriculum, until we learn how well our taxpayers can bear up under the heavy burden already planned to be laid upon them, and how well we can do the things already undertaken. Not, How much? but How well? is the vital question?

The Ledger is an advocate of education and has been slow to criticize the management of our public schools. It regrets to do so now; but feels that it would be false to its trust as a public servant, were it to keep silent longer.

We kindly but firmly warn Mr. Frazee that the speech of Dr. M. C. Greene at the City hall school meeting and the letter of Mr. L. B. Rogers in our People's Column April 15, in many respects truly represent the most earnest feelings of a large, intelligent and respectable body of our citizenship; and we submit that as a matter of right and correct pubpublic policy, the people who must pay the bills should have been consulted before making such a cock-sure announcement as that credited to Mr. Frazee.

"Look before you leap." The modern version is: "Stop! Look! Listen!" "A word to the wise is suf

HORRIBLE TRAGEDY MARKS OPENING OF DOLLAR DAY

TED SNYDER OF GRAND RAPIDS ELECTROCUTED

Went to Ionia with Balloonist Climbed Pole and Burned to Death on Electric Wires.

The opening of Dollar Day was marked by a horrible tragedy when Ted Snyder, a young man business authority. That may aged about 30 years, was electro-cuted on a pole in the rear of Austin & Darling's creamery. The pole was one used by the Electric Light company to run its high tension wires west from the sub-station and the wires of thirteen different building con of thirteen different building con carried 6250 volts of juice. Sny-tractors, bidders on the job of by everybody with sluggish bows der, who climbed up into the building the new Central building. wires and to the top of the pole At noon the matter had simto attach a pulley, struck the wires after he had attached the pulley and was instantly killed. A column of fire shot up from the wires and attracted the attention of averyone within a block of the closed up to-night (Thursday.)

At noon the matter had simmered down to a question between Mr. Soule of Alma and Warner & Kelley of Grand Rapids, and the matter will probably be closed up to-night (Thursday.)

FOR SALE of everyone within a block of the place, and the unfortunate man was wrapped in flames. Words From Home

Statements That May Be Investigated. Testimony of Lowell Citizens.

When a Lowell citizen comes to the joyed the beautiful Sabbath by either front, telling his friends and neighgoing motoring or entertaining bors of his experience, you can rely friends. on his sincerity. The statements of people residing in far away places do not command your confidence. Home endorsement is the kind that backs Doan's Kidney Pills. Such testimony is convincing. Investigation proves it true. Below is a statement of a Lowell resident. No stronger

proof of merit can be had. C. W. Barber, Washington St. Lowell, Mich., says: "I had rheumatic pains and lumbago. The kidney secretions passed too frequently and caused pain and annoyance I used different kinds of medicine, but without being helped until I tried Doan's Kidney Pills. They regulated Rapids motored here to attend Ma- the action of my kidneys and stopped the pains. Doan's Kidney Pills are the best kidney medicine I know of and I am glad to tell others about them."

> Price 50c, at all dealers. Don't simply ask for a kidney remedy-get Doan's Kidney Pills-the same that Mr. Barber had. Foster-Milburn

Cannonebarg.

A Sluggish Liver Needs Attention

Let your liver get torpid and you are in for a spell of misery. Every-Mrs. Geo. Rector of Cedar Springs spent over Sunday with her aunt Mrs. D. A. Wood.

Now about speed and endurance—

You can own an exact duplicate of "Wild Bill"

Turner's or Billy Carlson's record-breaking Maxwells

Think of owning one of these same Maxwells-think of driving it wherever you want to-

The Wonder Car'

here are some recent Maxwell Racing Car records:-Barney Oldfield in a Maxwell Racing Car broke the world's non-stop

record at Corona, California, for 300 miles, averaging 86.3 miles per hour. Think of it-not a stop made!

Then, right on top of this marvelous motor record, along came "Billy"

over any kind of roads-up any kind of hills, wherever four wheels can go, the same car for \$695. Carlson in his Maxwell Racer and made still another 300 miles non-stop record in the San Diego race. Again a Maxwell Racer ran 300 miles with-

> These Maxwell Racing Cars are built by the same Designers, the same Chief Engineer, that build the regular Maxwell Cars; and the same Maxwell Laboratory Tested Steel is used in them that is used in the regular stock Maxwell Touring Cars.

But, aside from hill-climbing and speed, power and endurance records, here are some of the facts about Maxwell comfort, -Maxwell special features, -Maxwell beauty and Maxwell service.

Read This List of Expensive Features. The 1915 Maxwell Has These Features And Many Others.				
Attractive Streamline Body Pure streamline body; graceful crown fenders, with all rivets concealed. All the grace, style and "snap" that you will find in any of the highest priced cars. A High-Tension Magazo Nearly all the ligh priced cars have high fension magnetos. A high tension magneto gives possive ignition. The Snams magazoto, with which the Maxwell is equipped, is recognized as one of the best magnetos made. Left Side Drive-Central Control Left side steer with gear shifting levers in center of driving compartment—center control—has been accepted by leading makers of expensive automobiles as the safest and most comfortable for the driver; that is why the Maxwell has it. The Maxwell is so easy to drive and control that a child can handle it. Three-Speed Sliding Gear Transmission All high priced cars have a sliding gear transmission. It is costly to make, but it is the best, if the motor has the power, sliding gears will	proof, it is the expensive deather shell type and has couple cooling capacity. The radiator is mounted to the frame by means of a shock absorbing device on each side, which relieves the radiator of all twists and distortions of the frame, caused by roughness of the road. The shock absorbing device also minimizes the possibility of radiator leaks. The Roomy Full 5-Passenger Body Adjustable Front Seat The 1915 Maxwell has a full grown 5-passenger body. The front seat is adjustable, you can move it three inches forward or backward. This makes the car really comfortable for the driver. No cramped less for tall people or unconstitable reaching for short people. Mort drivers seat are	Irreversible Steering Gear	One Since of Tire - Anti-Skids on Rear The Markell of the year are resented of the high est prired fundamental and a fifth of their cost. U. B. Williams

SYNOPSIS -5-

In the New York home of James Brood Dawes and Riggs, his two old pensioners and comrades, await the coming of Brood's son Frederic to learn the contents after reading, throws it into the fire and eaves the room without a word. Frederic tells Lydia Desmond, his flancee, that the message announces his father's marriage and orders the house prepared for an im-mediate homecoming. Mrs. Desmond, the housekeeper and Lydia's mother, tries to cool Frederic's temper at the impending changes. Brood and his bride arrive. She wins Frederic's liking at first meeting Brood shows dislike and veiled hostility to Brood snows dislike and vened hosting to his son. Lydia and Mrs. Brood meet in the jade-room, where Lydia works as Brood's Secretary. The room, dominated by a great gold Buddha, Brood's father confessor, is furnished in oriental mag-nificence. Mrs. Brood, after a talk with Lydia, which leaves the latter puzzled, is disturbed by the appearance of Ranjab, the Hindu servant of Brood. Mrs. Brood makes changes in the household and gains her husband's consent to send Mrs. gains her husband's consent to send Mrs. nd and Lydia away. She tries fathom the mystery of Brood's separation from his first wife, and his dislike of his son, but fails. Mrs. Brood fascinates Frederic. They visit Lydia and her mothbegins to fear Ranjab in his uncanny ap-pearances and disappearances and Fred-eric, remembering his father's East Indian stories and firm belief in magic, fears unknown evil. Ranjab performs feats of magic for Dawes and Riggs.

CHAPTER VII-Continued.

Then, before their startled, horrorstruck eyes, the Hindu coolly plunged the glittering blade into his breast, driving it in to the hilt! "Good Lord!" shouted the two old

Ranjab serenely replaced the sword

in its scabbard. "It is not always the knife that finds the heart," said he, so slowly, so full of meaning, that even the old men grasped the significance of the cryptic remark.

"A feller can be fooled, no matter how closely he watches," said Mr. Dawes, and he was not referring to the amazing sword trick.

woman.

The old spell of the Orient had fallen upon the ancients. They were "Is this the way to reward me?" they had heard them years ago in the his plea for forgiveness. mystic silences of the East.

closed noiselessly behind him and the Yvonne. I adore you. You are every- face slowly gave way to a steady glare into his ear that caused him to look old men were alone, blinking at each thing in the world to me. I-" other. There was no sound from the hall. They waited, watching the curtained door. At last they heard footsteps on the stairs, quick footsteps of the look of triumph that swept across to you. You may join us upstairs later and she repeated her remark.

Frederick strode rapidly into the

CHAPTER VIII.

"He Killed a Woman." His face was livid with rage. For

a moment he glowered upon the two old men, his fingers working spasmodically, his chest heaving with the volcanic emotions he was trying so hard to subdue. Then he whirled about, to glare into the hall. "In God's name, Freddy, boy, what's

happened?" cried old Mr. Riggs, all

Some minutes passed before he could trust himself to speak. Ugly veins stood out on his pale temples, as he paced the floor in front of them. Eventually Mr. Dawes ventured the vital question, in a somewhat hushed voice. "Have you-quarreled with your father, Freddy?"

The young man threw up his arms in a gesture of despair. There was a wail of misery in his voice as he

"In the name of God, why should he hate me as he does? What have I done? Am I not a good son to him?" "Hush!" implored Mr. Dawes, nervously. "He'll hear you."

"Hear me!" cried Frederic, and laughed aloud in his recklessness. "Why shouldn't he hear me? By God, I'll not stand it a day longer. He wouldn't think of treating a dog as he treats me. God, I-I, why, he is to the spot, blushing with shame and actually forcing me to hate him. I dismay. do hate him! I swear to heaven, it "Where are you going? To tell sharply. was in my heart to kill him down him?" he gasped.

sobbing like a little child. The old men, distressed beyond the red lips were parted. power of speech, mumbled incoherent "That is as it should be," she was for a present victory over his father. weeks.

There was always an ugly, wriggly no matter how deeply he probed. kris in those dreams of hers, and a brown hand that was forever fascinather husband's shoulder in the terror of fury. He could not trust himself at her in utter amazement. It was so of a dream, and he had soothed her "Get up!" she cried out sharply. He to speak. "I regret exceedingly that astounding that he could not believe with the comfort of his strong arms. She was like a little child "afraid of not your own. It's—it's quite un-

Her influence alone prevented the young man from carrying out his threat. At first he was as firm as a rock in his determination. He was in his room when she tapped on his door. After a while he abandoned the task and followed her rather dazedly to the boudoir, promising to listen to reason. For an hour she argued and pleaded with him, and in the end he agreed to give up what she was pleased to call his preposterous plan. "Now, that being settled," she said, with a sigh of relief, "let us go and talk it all over with Lydia."

He started guiltily. "I'd-I'd rather not, Yvonne," he said. "There's no use worrying her with the thing now. As a matter of fact, I'd prefer that she-er-well, somehow I don't like the idea of explaining matters to her." She was watching him narrowly, "It has seemed to me of late, Frederic, that you and Lydia are not quite sowhat shall I say?-so enamored of each other. What has happened?" she inquired so innocently, so naively, that he looked at her in astonishment. "I am sure you fairly live at her house. You are there nearly every day, and yet-well, I can feel rather than see

the change in both of you. I hope-" "I've been behaving like an infernal sneak. Yvonne," cried he, consciencegirl in all this world, and I've been treating her shamefully."

"Dear me! In what way, may I inquire?" "Why we used to-oh, but why go

into all that? It would only amuse she doesn't deserve to be treated as She laughed softly. "I'm afraid you is coming to?"

His eyes narrowed. "You've made middle-aged gentlemen, again consult- of us over—the house as well. I am "Why—why, he'd starve!' cried the more milk or water from time to time,

carry you away from here." "Wait and see." had mapped out his campaign. Fair overnight. play from either of these men was not was a coward. They would not hesitate at any means to defeat him. And

their hands-disfigurement, probably. "Will you take a shilling for your fifty quid?" jeered Craig. He was going to enjoy this, for he had not the least doubt as to the outcome. Mallow was without superior in a rough and tumble fight.

Warrington did not reply. He walked cautiously toward Mallow. This maneuver brought Craig within reach. It was not a fair blow, but Warrington delivered it without the least compunction. It struck Craig squarely on the jaw. Lightly as a cat Warrington jumped back. Craig's knees doubled under him and he toppled forward on his face.

"Now, Mallow, you and I alone, with no one to jump on my back when I'm looking elsewhere!"

Mallow, appreciating the trick. swore foully, and rushed. Warrington tabbed with his left and sidestepped. One thing he must do and that was to keep Mallow from getting into close quarters. The copra grower was more than his match in the knowledge of those oriental devices that usually cripple a man for life. He must wear him down scientifically; he must depend upon his ring generalship. In his youth Warrington had been a skillskill with rugged health and a blow that had a hundred and eighty pounds behind it.

From ordinary rage Mallow fell into a frenzy; and frenzy never won a ring battle. Time after time he endeavored to grapple, but always that left stopped him. Warrington played for his face, and to each jab he added a taunt. "That for the little Singalese!" "Count that one for Wheedon's broken knees!" "And wouldn't San admire that? Remember her? The little Japanese girl whose thumbs you broke?" "Here's one for me!" It was not dignified, but Warrington stubbornly refused to look back upon this day she confessed. either with shame or regret. Jab-jab. cut and slash! went the left. There was no more mercy in the mind back of it than might be found in the sleek felines who stalked the jungles north. Doggedly Mallow fought on, hoping for his chance. He tried every trick he knew, but he could only get so near. The ring was as wide as the world; there were no corners to make grappling a possibility.

Some of his desperate blows got through. The bezel of his ring laid pen Warrington's forehead. He was brave enough, but he began to realise that this was not the same man he had turned out into the night four years ago. And the pain and ignominy he had forced upon others was now being returned to him. Warrington would have prolonged the battle had he not seen Craig getting distily to his feet. It was time to end it. He home, he no longer felt. feinted swiftly. Mallow, expecting a body blow, dropped his guard. War- Knowing your brother as I do, who rington, as he struck, felt the bones in his hand crack. Bringing Sunshine to the Darkest Day

land that white instead of black be worn in memory of its soldier dead appeals to the modern mind as a startling innovation, yet as a matter of face it is but a revival of an old custom. White was the accepted mourning color of the greater part of Europe, as it has always been of China, until the latter part of the fifteenth century.

The distinction of having first worn black to express grief belongs to Queen Anne of Brittany, the spouse of two successive monarchs of France. It was 417 years ago, on April 7, 1498, that her first husband, King Charles VIII of France joined the great majority, and his widow set all the tongues of France a-wagging by appearing in public clad entirely in black, instead of the conventional white, usually worn by bereaved widows. After the first excitement had ach and intestinal ailments for years. died down, however, it was generally Year after year he spent endless time agreed that Queen Anne had shown good taste, inasmuch as black is more sedate and melancholy, and so more expressive of grief than white. The innovation of Queen Anne was taken up by all the court, and soon spread among the people, and from France to other lands, until in the course of a century black had supplanted white as the color expressive of mourning throughout the civilized world. About the only exception is Turkey-which where violet is the mourning color.

Representative Gardner, discussing the question of armaments at a Wash-

ington banquet, said, with a smile: "The public is astonishingly igno rant of warfare and everything pertaining to warfare. The public in this mat ter, indeed, is but little more enlightened than old Cornelius Husk. "Husk and a group of his cronies were talking war on a fresh April evening round the red-hot stove in the

geenral store. "'Wall,' said an old fellow with white bonnet-string whiskers running from ear to ear under his chin-'wall, it seems that now the Germans, or Boches, as the French calls 'em-it seems that now the Boches are a-go-

in' to commence guerrilla warfare.' "'Oh, my!' said Corn Husk. 'I hope not. I certainly do hope not. Them there gorillas are altogether too strong and savage to put up against white men."

Polarine

You Always Have That Film of Oil

Lubrication begins the instant the motor starts if you use POLARINE. POLARINE flows at zero, and maintains the cor-

rect lubricating body at any motor speed or tempera-

Last year (1914) American motorists used 6,929,614 gallons of POLARINE -2309 carloads! Conclusive evidence that drivers get service and save motoring trouble by using POLARINE. Buy it in barrels or half barrels and cut down up-keep cost. You can make a big saving. POLARINE is made by the Standard Oil Company, the great service organization. Standard Oil Company (AN INDIANA CORPORATION Use RED CROWN Gaseline, Extra heat units in every gallon mean extra power, speed and mileage. (350)

WAITING FOR YOU VADA Yes, waiting for every farmer or farmer's son — any industrious American who is

anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is higher but her farm land just as cheap and in the provinces of Manitoba, Saskatchewan and Alberta

160 Acre Homesteads are Actually Free to Settlers and Other Land at From \$15 to \$20 per Acre

The people of European countries as well as the American continent must be fed—thus an even greater demand for Canadian Wheat will keep up the price. Any farmer who can buy land at \$15.00 to \$30.00 per acre -get a dollar for wheat and raise 20 to 45 bushels to the acre is bot make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming is fully as profitable an industry as grain raising. The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, markets convenient, climate excellent.

Military service is not compulsory in Canada but there is an unusual demand for farm labor to replace the many young men who have volunteered for service in the war. Write for literature and particulars as to reduced railway rates to Superintendent Immigration, Ottawa, Canada; or to M. V. MacINNES 176 Jefferson Ave., Detroit, Mich.

By Order of United Sales Co., Toledo, Ohio

The entire stock of Men's, and Young Men's Clothing and Furnishing Goods to be closed out at once by the United Sales Co. Sale starts Thursday, April 29th, for 10 days.

R. J. MERRILL, sell the entire stock in the next 10 days. All over the United States the UNITED SALES Co.'s bargains are looked forward to with great interest. The Sales Co.'s own representative makes the prices and sells the goods at cost and less. Positively nothing reserved. Look for the Big Yellow Sign at the R. J. Merrill Store, successor to H. J. Taylor, Lowell, Mich. This is the greatest message the residents of Kent county and vicinity ever heard of

Remember, the Sale Starts Thursday, April 29th, 1915

"My protection of you is my duty," says R. J. Merrill. "Having been in business here for one year, I have had at stake two interests-mine first and yours second. I am not fussing about it because in having done reasonably well I am sure you have been satisfied by the way you have stood by this store the past year. Now the United Sales Co. is all in your favor as these people are known as price wreckers of dependable merchandise. In commending to the people these genuine bargains it is done with the utmost confidence and a personal pride that I have never before experienced, knowing the reputation of the United Sales Co., which would naturally inspire confidence in the most skeptical. In conclusion I wish to express my thanks and appreciation for past patronage."

R. J. MERRILL.

Statement by United Sales Co.

In our vast experience in handling stocks we have never come in contact with a proposition that appeals to us as this one does. We find this stock one of the cleanest we have had to contend with for some time. Mr. Merrill has put this entire stock in our hands and sell we will because we have prices that will move the goods quickly. The features of this sale will be the unique arrangement of stock and the facilities for handling the crowds without any confusion. Plenty of salespeople have been engaged and your trading will be a pleasure as well as a benefit.
