THE discovery that the United States has been feeding the German army by exports to Holland and Scandinavia, will lead to restriction of trade with those countries. Feeding our enemies while the poor people of America suffer from high prices, is hardly the proper thing.

Does the picture appeal? Then be sure the real thing will. You can make one this way if you use.

The ambition to make the best shortcake your family ever ate is a laudible one and it doesn't take any longer to make the best one than the poorest one. It requires good judgment and planning, that's all.

DODGE BROTHERS MOTOR CAR

There is a very pronounced and definite public opinion now in this country concerning Dodge

Nearly every man or woman you meet has clean-cut idea of the kind of a car it is. How friendly and how favorable that idea is you probably know so well that it is not necessary to go into details.

It is not over-stating the case to say that the very large production of the first two years did not develop a single serious fault.

This notable achievement surely justifies public confidence in Dodge Brothers as close and careful manufacturers.

It will pay you to visit us and examine this ear. The gasoline consumption is unusually low. The tire mileage is unusually high.
