Who wants a TEMPORARY Memorial?

The sentiment which induces the erection of a memorial, and the very word itself, demand permanence.

That is the first quality to be considered in choosing monumental material.

The Lowell Granite & Marble Works can furnish what you wish.

Beautify the Interior of Your Home

Flat-toned walls are washable and sanitary. The beauty is permanent. Floors finished with Mar-Noc Varnish will withstand all wear and tear. They're water-proof as well. Floorlac is the all-around varnish stain. Stains and varnishes in one operation. For furniture and woodwork. A finish for every surface.

A ROUSING SUCCESS

Liberty Loan Rally Packed City Hall to Doors. Another packed house greeted the speakers at the Liberty Loan rally at the City hall last Friday evening.

S. P. Hicks presided—you know what that means—P of P, meaning plenty of punch. E. L. Quarles and Mrs. Guy Davis of Grand Rapids were the speakers; and they didn't leave much unused to inspire patriotism or to shame slakerism.

VERGENNES GRANGE MAY 3. Regular meeting of Vergennes Grange will be held Friday evening, May 3. Aside from the regular business meeting, the following program has been prepared for the lecture hour.

Roll Call, Why I am a Farmer. Song, Grange. Recitation, Edward Bennett. Surprise. Song, Six girls. Recitation, Abbie Odell. Dialogue, Fritz Wittenbach and William Roth.

KEENE GRANGE met and initiated the new candidates in the 3rd degree at their last regular meeting Friday evening, April 26, with the following program:

VERGENNES M. E. CHURCH 1:30 p. m., Sunday school. The Bible is the greatest seller in the world. Come together and study it.

METHOD CHURCH. Sunday, May 5th. 10:30 a. m., Public worship. Sermon subject, "The Soul's Value." Special male quartet music.

GERMAN NAMES
Loyal American of whatever blood can only deplore the attempt made recently on the floor of the United States senate to cast doubt on the patriotism of everyone in this country who bears a German name.

There are between ten and fifteen million Americans of German blood. Thousands of them may be classified as leading citizens in the communities in which they live.

But we need not regard them with suspicion. As a body they have proved their right again and again to be classified as true American patriots.

There's a new drive on—Michigan potato drive to utilize the bumper crop raised by our farmers last year. You are asked to act on the initiative of the Michigan Potato Association.

Hotels and restaurants should help by serving more potatoes. Return to the potato drive when crops are again demanded. Use the farmers' favor. Give them a square deal. Eat more potatoes and less bread.

A public charity solicitor asks for a third of a column publicity and assures us that the press will be glad to do it.

What Kind of Clothes are You Going to Wear?

Maybe you haven't decided what style you'll pick out; but one thing you surely have made up your mind to—the clothes you buy this spring are going to be the kind that will give unusually good service.

In these days when the high cost of everything affects all of us, there's a special reason for being particular about the quality you get.

There's more economy in buying right than in buying cheap.

Hart Schaffner & Marx Clothes are made to give you values, good style and long wear. They do it.

\$20, \$22.50, \$25, \$28, \$30, \$35
Economy figures clothes expense by the month, not by the price. Try it out.

"Dubbelblit" 20-point Boys Suits
Bully-fitting, snappy looking togs that make your boy stand out from the rest of the "bunch."

Six months' guarantee, famous "Walcloth" fabrics, doubled everywhere except in price.

Choice selection at \$8.75
All sizes in stock.

A spring overcoat serves more purposes than any other article of clothes. For chilly days, for showers, for dress-up or for the car. You ought to have one.

Spring Hats, Neckwear, Hose, Shirts, Caps, Trousers, Collars, Underwear, Night Robes, etc., etc.

Henry Ford's refusal to be the pilot of aircraft production, is a striking contrast to the eagerness of the President to get into a cockpit himself.

Lee M. Hutchins, a speaker well known to Lowell audiences, favors a public whipping post for traitors and the man who is careless with the country is at war.

LESSON...
There is no Monopoly in the packing industry.

Swift & Company, although the largest packer, handles not to exceed one-eighth of the total meat production of the United States.

The five large packers do not handle to exceed one-third of the total meat production of the United States.

Swift & Company is not in combination with any other packer packers to control prices.

There is very active competition in the buying of live-stock and equally keen competition in the sale of dressed meats and by-products.

1918 year book of interesting and instructive literature on request.

I. J. TIDD

You know, of course, that the Maxwell Motor Car is the long distance champion of the world. You have read that a "stock" Maxwell 5-passenger car ran for 44 days and nights without stopping the motor. And that, in the 44 days non-stop test, the Maxwell covered 22,022 miles, at an average speed of 25 miles per hour. But have you, up to now, realized the full significance of that performance? Do you know that no other motor car in the world has ever equalled or even approached that performance? In a word, did you take this test seriously when you heard of it? Or did you set it down as a "selling stunt" to give the publicity man something to talk about? It's worth your while to read and to study the conditions under which that test was made. You know that the American Automobile Association (familiarily known as the "A. A. A.") is the official arbiter of every automobile test and contest. But perhaps you didn't know that when a maker places his product under A. A. A. supervision he must do absolutely as told and abide by the decisions of the Board. That's why there are so few A. A. A. Official Records! This 22,000-mile Maxwell non-stop test was official from start to finish. Therein lies its value to you. It proves absolutely the quality of the car—of the very Maxwell you buy. For verily this was a "stock" Maxwell. Listen:— First: the inspectors disassembled the motor to see that no special pistons, valves, bearing-metal or other parts had been used. Every other unit was as critically inspected. Then the car was re-assembled under their own supervision. As we had much at stake and the test was made in winter (November 23 to January 5) we asked permission to take certain little precautions against accidental stoppage. Sounds reasonable, doesn't it? But they refused permission to do any such thing. For example:—They would not permit a rubber cover over the magneto—it wasn't "stock." They refused to let us tape the ignition wire terminals—they are not taped on the Maxwells we sell—so of course it wasn't "stock." Neither would they let us use a spiral coiled pipe in place of the usual straight one from tank to carburetor to guard against a breakage from the constant, unremitting vibration—it isn't "stock." Nor to use a special high priced foreign make of spark plug—the run was made on the same spark plugs with which all Maxwells are equipped. So rigid were the rules, we were unable to carry a spare tire on the rear—it wasn't "stock." A telegram to headquarters in New York finally brought a special permit to carry a spare tire. "It isn't stock!" "It isn't stock!" That was the laconic reply of those A. A. A. inspectors to every last suggestion that called for anything but the precise condition of the standard, stock model Maxwell that any customer can buy from any one of 3000 dealers anywhere. We are glad now—mighty glad—that the rules were so strict and so rigidly enforced. Any other car that ever attempts to equal that record must do it under official supervision—and comply with the same terms. And it will have to go some. For Maxwell set the standard when it performed this wonderful feat. Maxwell complied with those rules—and made good. Every drop of gasoline and oil and water was measured out and poured in by the inspectors themselves. They would not even let our man pour it in! Every four hours the car had to report at the official station for checking. And it had to be there on the minute. And every minute there was an inspector beside the driver on the front seat—two more men in the rear. One got out only to let another in—day and night for 44 days and nights! There was one technical stop. It is interesting to know the circumstances. Dead of night—a driving storm—a cloudburst—suddenly another car appeared in the road ahead. In his effort to avoid a collision the Maxwell driver stalled his motor. At least the observers thought it stopped and so reported. The car did not stop, however, so its momentum again started the motor (if it had indeed stalled) when the clutch was let in. The contest board exonerated our driver on grounds that his action was necessary to save life. That shows you how rigid were the rules—how conscientiously applied by the observers. You who have owned and driven motor cars—you who know how small a thing may clog a carburetor or a feed pipe; "short" a spark or stall a motor—will realize what a wonderfully well made car this must be to go through that test under those conditions—44 days—22,022 miles without stopping. The exact amount of gasoline, of oil, of water used; the tire mileage, tire troubles, tire changes; the distance and the routes are matters of official record, attested under oath and guaranteed by the A. A. A. (By the way, the average was nearly 10,000 miles per tire.) Any Maxwell owner—or anyone interested may see those records. And—here's the most wonderful part—though no attempt was or could be made for economy; the Maxwell averaged 22 miles per gallon of gasoline. Some other car may, some time, equal some one of those performances. But to equal them all in the same test—that car must be a Maxwell.
