## George Welsh Makes Bad Mistake

By F. M. Johnson

Announcement Tuesday morning that George Welsh, former lieutenant governor, will contest with Governor Fred W. Green for the Republican nomination for governor of Michigan, strikes this writer as poor politics, poor statesmanship and poor citizenship, to say nothing of poor judgment in general.

If ever a Michigan governor deserved at the hands of his state a unanimous re-nomination and re-election, that man is Fred W. Green. Submitted without argument because undeniably true.

Alex Groesbeck, his predecessor, had THREE terms and wanted more. To deny Governor Green the TWO terms he asks to vindicate and complete his patriotic purposes, would be the rankest of injustice, unworthy of a great state, whose four-square people will never sanction or forget such an attempt.

Mr. Welsh is a young man, who has been well treated by his district and state and is still favorably regarded. To sanction the proposed political chicanery at the instance of a disgruntled faction that has never played fair with Fred Green, will be the political mistake of his life. He will sacrifice the loyal friendships of a life-time and get nothing better than a bad taste, like the dog that snatched at the shadow in the brook and lost the meat in his mouth. Don't do it, George!

Tested

Rockford, July 13.—All marl beds in the state should be tested and analyzed by Michigan State college before the lime deposit is mined and applied upon fields to be seeded to alfalfa or sweet clover, John W. Sims, soils specialist, / reported Thursday at a meeting of farmers on Clayton Davies farm near Bostwick lake.

In the state, is a tall, handsome plant with large tuberous roots. There is perhaps no other plant in which life and death are more strangely blended. Cattle get fat on the leaves and stalks, while the roots ground into pulp make faring from which a bread is baked. We eat cassava in the form of taploca, yet the raw juice of the root is a deadly poison, 35 drops of which will kill the strongest man in five or six minutes. This juice, however, fermented and boiled, forms a drink which is refreshing, and not unwholesome.—London Mail. There is not enough lime in some marl deposits to pay the cost of min-

ing and hauling, Sims warned. All is not marl that looks like marl cither, he said.

Both nitrogen and helium are inert gases, without chemical action or other substances and they would er, he said.

At the morning meeting in Vergennes township Sims said a farmer brought in a sample that looked like marl. It was tested at the college's traveling laboratory, now touring Kent county, and it was found to be conjugated by the classical state of the conjugate of th er, he said. only white clay.

Leguminous crops offer Michigan farmers one way to cut their components for him to be separated from atmospheric nitroren by passing it over heated magnesium, or from liquid air by means of fractional distillation.

mercial feed bills 50 per cent, Sims declared. Only about an eighth of the crop land in Kent county now is growing alfalfa, sweet clover and clover, he reported. He believed it would prove more profitable to farmers if one-fourth of their farms was put into leguminous crops. Kent county's commercial feed bill was estimated at \$626,570 a year.

County Agent K. K. Vining reported 90 per cent of the farm land in Kent county needs to be treated with declared. Only about an eighth of Kent county needs to be treated with lime before it will be safe to attempt

TRY TO BUY PAINT AT ANY PRICE THAT WILL COMPARE WITH WOLVERINE

PROMISES YOU THE FOLLOWING FACTS 1. GREATER BRILLIANCY OF COLOR The tinted shades are clear-toned, free from muddiness, bringing out their full natural color, not offset by pigments which hide natural color beauty.

GREATER PERMANENCE OF COLOR Because of the unusual density or hiding power of the pigments in WOLVERINE the tinted SHADES require unusual larger amounts of color pigment. This guarantees greater permanence of color, remaining fast without fading. 3. GREATER COVERING POWER

The combined pigments in WOLVERINE have an average of 45% more hiding or covering power than LEAD CARBONATE. 4. HEAVY IN PIGMENT BODY

WOLVERINE is heavy in pigment body, not a thin paint. This allows for the large reducing with additional linseed as explained above. WHITER PIGMENT BASE
WOLVERINE is made from the whitest pigment base known in the paint world today, well known and scientifically produced, SUPER-WHITE the WHITEST of WHITES. 6. CONTAINS ONLY PURE LINSEED OIL
WOLVERINE OUTSIDE WHITE contains only ALINCO WATER-WHITE LINSEED. AL

INCO has no foots, color or moisture, quality undisputed. The tinted shades contain only pure RAW LINSEED OIL produced by the AMERICAN LINSEED CO. WOLVERINE TINTED SHADES are made from the same white pigment base as WOLVER-INE OUTSIDE WHITE, with the addition of the necessary color pigments for tinting.

WOLVERINE is unusually LOW IN PRICE TO THE CONSUMER because we sell ONLY THROUGH THE DEALER, eliminating ANY JOBBING PROFIT. WE claim no competitive manufacturer is producing WOLVERINE QUALITY to the CONSUMER at WOLVERINE PRICES.

WOLVERINE is manufactured in our own factory at Belding, Michigan, from the best materials money can buy, ground in the finest BURR STONE MILLS and produced under the most accurate and exacting conditions.
