Swimming Pool To Be Decided By Lowell-tp. Voters

Special Election Monday, May 2

The question of deciding the construction of a swimming pool on the east bank of Flat river and adjacent to Lowell high school grounds is to be decided by the qualified, tax-paying voters of Lowell township at a special election to be held in Lowell city hall on Monday, May 2, 1938.

The question of the construction of a swimming pool came before the Lowell town meeting on election day. On account of the closeness of the vote at that time a motion was made and carried directing the town board to call a special election in order that all qualified persons would have free opportunity for expressing themselves either for or against the proposition.

The total cost of the swimming pool would be \$20,000 and would be a WPA project, \$16,000 of which would be paid by the Federal government and \$4,000 by the township of Lowell. Plans call for a pool 35 feet in width by 75 feet in length.

Employment would be given to a large number of workmen for upwards of two months or more. Those favoring a swimming pool point out that one is badly needed as the rivers are not safe for sanitary reasons and both adults and children of the entire surrounding community would benefit and enjoy its use.

Those opposing the proposition declare that the money should not be expended by the township for a swimming pool even though the township has the money on hand. Some are also quoted as saying that if a \$20,000 WPA project is needed here that something of more general worth to the community than a swimming pool should be sought.

Notice of Special Election

Pursuant to action taken at the Annual Township election, April 4, 1938, and on petition of twelve tax payers filed with this Board April 13th, a Special Election will be held at Lowell City Hall on May 2nd, 1938, to vote on the following proposition:

"Shall the Township of Lowell within the Village of Lowell and School District No. 1, in the construction of a public Swimming Pool in the Village of Lowell, and the Township Board of said township be authorized to spend from the general funds of this township a sum not to exceed \$20,000 as its entire share in such project which is to be carried on through the W. P. A.?"

ELMER S. WHITE, Township Clerk. Dated April 14th, 1938.

Polls will open at 7 o'clock a. m. and close at 6 o'clock p. m., Eastern Standard Time. c49-50

Meeting of Rural Board Members To Discuss Transportation

The local Board of Education has called a meeting of all rural school boards for the purpose of developing a better understanding relative to problems concerning children who attend the Lowell Schools.

The main topic of discussion will be the Transportation of High School pupils but rural members will be asked to give criticisms and suggestions for the benefit of the children. A considerable sum of money has been spent in taking moving pictures of the school in session and these action pictures will be shown to those who attend the meeting.

The following letter is being sent to all rural school boards of districts from which Lowell is now receiving students. Board members from other districts are welcome.

Board of Education, Lowell, Mich. April 20, 1938

We have received many inquiries from pupils, parents and members of boards of education relative to the transportation of pupils to our school and we have decided to call a meeting for the purpose of explaining the laws that pertain to the transportation of school children. Other matters will also be discussed.

The meeting will be held in the new gymnasium, on Tuesday evening, May 3 at 8 o'clock and you and any other member or members of any school board who are interested in the transportation of pupils are invited to attend. The Lowell Board of Education is not anxious to transport any more pupils but will do so if boards of education are desirous that this be done, and provided that the outlying boards of education will make the necessary arrangements within the near future.

Usually two or three years of hard preliminary work are required to insure a "spontaneous" popular response to a new idea.

RIDING FREE

THE RAILROADS used to complain that they had to give out too many free passes, so that on some trains a good part of the passengers contributed nothing to the cost of transportation.

Some people think they can ride through life on a free pass, or without making adequate contribution for the things they get. They may say they pay taxes, directly or indirectly, which is all that can be expected of them.

THE IRON HORSE

PRESIDENT Roosevelt tells congress something needs to be done to help railroads out of their financial difficulties. Twenty five million motor vehicles whizzing all over the land, make a very hard competition for the iron horse.

The railroad used to give employment directly and indirectly to several millions of men. Hardly times for them go far to make hard times in the country. The iron horse shouldn't be so loaded up that he can't climb the hills.

THE 1938 KID PLAYS

THE TOY Manufacturers association are giving April 25 a preview of their products at an exhibit at New York when 15,000 new playthings are being shown. Miniature tools of home, farm, and industrial life seem to be the most popular things in the kid world.

When the little fellow gets his toy lawn mower, tractor, or plough, he feels like a big man as he pushes these things around. He says he is going to grow up pretty soon, and astonish the world before you know it. If he puts on the tasks of daily life in the future, the same energy he now uses to his toys, he will make a new America better than the one of to-day.

THE FAMILY DOCTOR

was never more needed than now, said the dean of Tufts college medical school to a gathering of Tufts alumni in New York. Our people should all realize the unselfish and untiring service rendered by these benefactors of humanity, and how so many lives have been saved, weaknesses cured, and problems solved, by the advice of the family physician.

When Junior gets an attack of the croup at 2 a. m., who is it that jumps from his bed where he is ruffling his sorely needed, and how so many lives have been saved, weaknesses cured, and problems solved, by the advice of the family physician.

KINDNESS TO THE ANIMALS

AS THE DUMB beasts can't speak for themselves, or at least the dog's bark, the horse's neigh, and the cat's mew express their feelings in but a limited way, kind people should speak for them. That is the purpose of Kindness to Animals week, April 24-30.

Good sportsmanship teaches people not to trample on the "under dog". When a human being is cruel to an animal or neglects the creature for which he is responsible, he thus tramples on this mal-treated creature, which is unable to protect or resent its cruelty. Animals is mostly mere thoughtlessness, and is not deliberate. But it does not help a hungry dog or horse any, to know that his master didn't mean to inflict this suffering on him.

LOOKING OVER THE HOME

IF PEOPLE want to keep nice looking home places, which will be a credit to themselves and the neighborhood, they have to be spending money on them. The satisfaction of home must be paid for, and something is always going wrong all the time. Things will wear out. Most of the substances that make up a dwelling are subject to the business concern has to reach out to these homes to get their share of the money.

When it advertises in the newspaper, it enters the homes where the people are talking about how to spend the money. That is the place to reach and convince them, not after they have decided where to go for things.

Two Down!

More than 10,000 paid admissions crowded into Wright's Hall, Lowell, Michigan, to witness a benefit ball game between Joe E. Brown's Hollywood comedians and Robert Taylor's Leading Men. During the second inning, the comedy team of Mitchell and Durant landed on coming up to bat as a combine. Durant on the shoulders of his partner Mitchell, who promptly spilled his "excess baggage" and headed for first base. What transpired at the first step, is shown below:

A DIZZY CIRCLE

We are in receipt of a long, very long list of letters from the State, and the prices thereof, which comes to us from the Legislative Council. It is interesting to see how the State is advertising its products. The more the State advertises, the more money it makes; and the more money it makes, the more it spends. It is a vicious circle, and every time you go around it the dizziness grows.

Women in Politics

"Women," says Mrs. Ellsworth Richardson of Ottumwa, Iowa, "have a definite place in politics."

She has decided to run for United States Senator on a program advocating world peace, freedom, and happiness and security. Mrs. Richardson is the first woman to be elected to the American Farm Bureau, a distinguished medal for meritorious service to agriculture in 1934. She is fifty-nine years old and has campaigned repeatedly for economic and social reform for agriculture. She is the first woman to be elected to the National Federation of Business and Professional Women's Club, Inc.

Public condemnation of convicted drunk drivers is reaching high proportions. And justly so. It is any reason under the sun why a man should be permitted to drink more liquor than he can control, step into a high-powered automobile, and drive recklessly down our highways, injuring and killing people? There is no reason.

It is regrettable that in many cities and counties throughout our State, the enforcement of laws which have been enacted to protect citizens of their communities from these drunken drivers.

Now Is the Time When Robins Attack Images This is about the season when some robin will break into the headlines by carrying on a ferocious bout with its own image in a cellar windowpane.

Speculation on a possible explanation of this futile but spectacular trait brings to life, from data in the state conservation department, the fact that birds and fish, even as dictators, set up their own special zones into which no other animal may venture without a fight.

Many species of fish, during the spawning season which comes about the time of year, make circular nests by using their tails and fins to fan away sand and silt in an attempt to uncover gravel beneath, on the bottom of the lake or stream they inhabit.

Birds, likewise will establish a territory around their nests, any invasion of which is loudly and actively resented.

Ornithologists are careful to emphasize that they do not really know the explanation and that thus far at least they can only guess about it.
