THE LOWELL TIED GE

FARM HELP

SUBSCRIBER who has had his troubles about, getting farm hands, says there isn't a better place to freeze labor than right here on American farms. There has been difficulty all over in obtaining farm labor since the hands central district of the Michigan leave the fields for factories since State Federation of Women's Clubs the industrial plants offer higher opened here this week Wednesday pay. We can talk about building morning with the Lowell Women's soldiers' bodies, keeping defense Club as host. The sessions are beworkers healthy by housewives ing held in the Congregational urged to cook wisely, stressing our Church auditorium. The counties national food economy, but the most important part of all in this food question is how to keep it calm and Ottawa. About 150 are in the name of the na mands. You need workers in the defense plants and you need farm hands in agriculture. You can't supply the country with food without help on the farms, that's sure. Neither can you suggest that farm jobs be filled by just anybody, for any farmer will set you right on this topic. Farming is skilled labor in case you didn't know. You say there is the wage scale to consider. Take into account the fact that you are more apt to be saving money living on a farm, where you aren't running into shortages in housing, high food prices and city purse pulls, and perhaps you will find that at the end of the week the incomes of factory and farm might not differ so much in size. The farmers must be assured that they will be given help in their fight to keep a nation fed. They are a stal part of our defense plan.

OUR GARDENS

THE GOOD TOWN IF YOU HEAR people talking

in or visited, they will often say that such and such a place is "a good town", and they will say that certain places are not so good. Reputation as a good town is created by several factors, prominent among which are business enterprise, willingness to try out new ideas, and high standards of maintenance. The good town does not like to be surpassed by competing cities. If it learns of some new improvement introduced elsewhere, it is likely to investigate the scheme and try it out. It holds the ideal of a "Spotlesstown". It is consider ed up to everybody to make his place shine, and create an impression of refinement and progress

CURTIS-DYKE

BROUGHT BUSINESS EFFICIENCY INTO THE DEPARTMENT OF STATE

When Harry F. Kelly first took office as Secretary of State, January 1, 1939, the department was obsolete in its methods, dilatory in its service, hog-tied with red tape! Before his first term was over, Harry F. Kelly had streamlined the entire department, upped its efficiency month after month, and brought its economy to a high point.

Today, the department, doing an annual business in excess of \$80,000,000, is a model of ably directed operation. Its 9 divisions and 170 odd branches anction with the precision of a fine watch. It operates 24 hours a day, 365 days a year, in its Registration and Title Division to benefit the police and

To Harry F. Kelly, and to him alone, goes the entire credit for this amazing transformation! You can depend on his achieving the same high degree of efficiency, in all state departments, when he is elected Governor of Michigan on November 3rd.

MSC TESTS NEW BEAN STACKER

College bean plots at East Lansing proved an ideal testing ground for a new bean stacking form invented by H. C. Rather, head of the Michigan State College farm crops department and constructed by Verne Marion, farm crops field foreman. Two men can put up an ideal seven-foot stack in 10 minutes. Details on the circular form, built in half sections, can be obtained from the college farm crops department.
