# **OUR CUSTOMERS**

In the interest of protecting our customers in these days of high prices, we will continue to adhere strictly to these 7 principles:

- We, as building material dealers, agree to continue to make every effort to reduce our operating costs and, at all times, to ask prices reflecting only a fair return.
- We pledge our support to the program of fighting the rack-eteer building material market.
- We pledge our support to the program of seeing that those veterans desiring to build or remodel have first opportunity to obtain the building materials available.
- We believe that the only way that we can protect our mar-ket today and for the future is to continue to use our influence to keep the cost of housing down to a minimum, and we pledge that we will exert every effort against the threat of inflation caused by the shortage of materials and the shortage of skilled labor.
- We pledge that we will continue to follow a policy of frankly representing to our customers the quality of the products we are able to offer in these times when there is such a shortage of standard materials.
- We, as retail merchants, assume the responsibility of keeping constantly abreast of new developments in building materials to provide greater economies and better livability in the building and remodeling of homes.
- We pledge that we will continue to work with reputable manufacturers to accomplish these basic objectives in the interests of our customers and for the general welfare of our community.
