WERE, packed in 3,615 nimble pounds and 204.8 inches of over-all length, is the car marvel of '51.

In the few short weeks since it started to roll off the assembly lines, it has written bright new page in automotive history for the low-priced field.

What Buick engineers have done is come up with a brand-new high-style body-new in every contour and dimension

They've designed a brand-new, weightsaving frame, exclusively for this SPECIAL. Then they've added the power-packed

F-263 Fireball engine-which was new in the 1950 SUPER-and just wait till you see Equipment, accessories, trim and models are subject to change without notice

what that does for this nimble performer.

There's a power-to-weight ratio that spells thrill and thrift in operation-at a first cost that's just a breath away from the lowest

We'd like you to see and drive this newest Buick marvel-find out for yourself what a honey it is to handle, and what a cinch it is to buy. Why not drop in and see us the very first chance you get?
