FARMERS!

You Can Increase Your CORN YIELD 15 TO 30 BUSHELS Of SHELLED CORN Per Acre

A glance at the major plant nutrients used to produce 100 bushels of shelled corn per acre readily shows why nitrogen applied to corn produces such outstanding yield increases. A 100 bushel corn crop takes 150 lbs. of nitrogen, 30 lbs. of phosphorous and 110 lbs. of potash. It is very unusual to find this amount of nitrogen in the soil without adding it commercially.

Manco Anhydrous Ammonia 82% Nitrogen, is BEST and COSTS LESS Per Acre

Applied deep in the soil by a trained applicator, equally effective applied before corn is planted or as a side dress. Use 30 to 80 lbs. per acre. Costs I Ic per lb., plus \$2.50 per acre to apply. Book your order now so that we can apply while we are in your neighborhood.

NIGHT MILLER AT THE FLOUR MILL

Employed by the Company since November 18, 1946

In Charge of Mill Operations (First Night Shift)

George, in his quiet and efficient manner, takes charge of the mill operations at 4:00 P. M. every day and works until midnight. His duty is to see that the "Flow of the Mill" goes smoothly. He regulates the rolls, sifters and purifiers to keep them performing efficiently. George is another of our valuable men who constantly strive to produce high quality King flours.
