NCREASE YOUR CORN YIELD 15 to 30 BUSHELS

MANCO Anhydrous Ammonia

BEST and Costs LESS per pound of nitrogen than ANY OTHER COMMERCIAL SOURCE EXTRA! - EXTRA!

Adequate fertilization with nitrogen will increase protein content of corn from 331/3 to 75%. After the corn plant has produced all the grain it can produce (being limited by some factor other than nitrogen), then additional nitrogen in the soil will go into the protein content. Raising protein content from 71/2 to 10% on a 50 bu. yield of corn will equal the protein contained in about 160 lbs. of 44% soybean oil meal. This alone will usually pay for the entire cost of Anhydrous Am-

Notice OF SPECIAL MEETING **Woodland Mutual Fire Insurance**

At the Community Rooms over Woodland Fire

Monday, June 22, 1953, at 1:30 P. M.

A special meeting of the policy holders of the Woodland Mutual Fire Insurance Co. was called by the Board of Directors at a meeting held April 2, 1953, to consider the question of amending the Company's Charter to accept the provisions of the General Mutual Law.

Because of the increase in population in various towns and the writing of insurance on certain properties of possible commercial classification, it is necessary that the Company cancel some of the policies it now holds, or amend its Charter to comply with the State Law.

Amendment of the Charter enabling the Company to act under the General Mutual Law would make it possible to more completly serve the insurance needs of this area, issue a non-assessable policy, write a "one package policy" if deemed desirable, and in many ways give a much broader coverage. This change would involve a cost of at least \$1.00 per policy to the Company, but is a step considered necessary by the majority of the Directors to keep the Company in line with the changing insurance needs of the policy holders.
