Kent to Assure Adequate Supply Gamma Globulin

Polio increased sharply in Michigan last week according to the State Health Department. There were 29 new cases reported compared with five the previous week. Ninety-one cases are listed to date this year as compared to 72 in the same period in 1952.

Kent County's opportunity to assure an adequate supply of gamma globulin serum for inoculation of persons exposed to polio will come this month in connection with the July blood donor clinic of the Kent County Red Cross Chapter and the Michigan Department of Health.

The gamma globulin serum is one of several blood products made from the blood donations. Call the Red Cross, GL 6-8661, in Grand Rapids for appointment for blood donations. Kent county must maintain a level of donations sufficiently high to assure the supply of gamma globulin for individual cases of polio prevention.

Soil Testing Is Made Easier for Kent Farmers

Dates have been set for Kent County fall soil testing tour as follows: Thursday, July 23, Bergy Bros., Alto; Monday, July 27, King Milling Co., Lowell; Wednesday, July 29, Caledonia Farmers' Elevator, Thursday, July 30, Rockford Co-op; and Friday, July 31, Byron Center Co-op.

Halfway production on poor starved soils has no place in modern day agriculture with high production and machinery costs. Fertile soils are required for high yields to help lower costs and increase profits.

The summer and fall months are the ideal times to collect soil samples since the ground is dry and one can usually get delivery on lime and fertilizer if ordered early. Sample should be representative of the areas to be tested.

Mark Samples Mark a field number on each jar or paper bag containing a composite sample. If more than one soil sample is taken from the same field, label as follows: 1A, 1B, 1C, etc.

Your Farm Bureau and the soil technician, Marvin DeYoung with the cooperation of the dealers in the county are going to give you an added service. Mr. DeYoung will pick up the samples from the dealers the following Saturdays:

King Milling Co., Lowell; C. H. Runckman & Co., Lowell; Kleinhackel's, McCords; Bergy Bros., Alto, July 11, August 1, August 22, and September 12th.

Testing Laboratory Available Kent County farmers are fortunate to have the services of a modern soil testing laboratory available to determine the fertility levels of their soils. This service has been made available through the efforts of the Farm Bureau in cooperation with the fertilizer dealers, Calvin College and the Extension Service.

The soil testing includes a PH test, phosphorus, potassium, calcium, and in addition magnesium, and soluble salts can be run on special occasions. With this information together with soil history the lime requirements, and fertilizers needed to restore soil fertility can be determined.

Grace Before Me...
Anyone who has seen hard, dry wheat strewn on a Michigan field, sprout into golden grain, and then transformed into life-giving bread must believe in God.

It was probably with such a thought in mind that some members of the Texas Restaurant Association have decided to place on their table cards which bear the following before-meals prayers of the Catholic, Jewish and Protestant faiths.
In a great many homes, especially where there are small children, the matter of saying "Grace" is a family rite. But few people say Grace when they go to restaurants.

Comedy Team Reappears on Showboat

Two brothers, who had not seen each other for five years, were reunited at Yokota Monday, June 24th. Darrell and Ronald Dalstra, of Lowell, Michigan, had their first chance to talk over old times when Darrell flew up from a base in Southern Japan to visit his younger brother, Ronald, who is assigned to the 61st Main Squadron in the Sheet Metal Shop.

Both boys are Air Force career men with 13 years service between them. Ronald is a TSgt. with five years' service while his older brother, Darrell, is a S/Sgt. with over eight years' service.

While stationed in the States the Dalstras were stationed far apart and couldn't seem to get home on their leaves to see each other. Ronald was stationed at Williams AFB, Arizona, almost 2,000 miles from Stewart AFB, N. Y., Darrell's station.

Both of the Dalstras are married and Ronald has two boys who are living with their mother. One younger brother, Roger, is presently serving in the Navy while another brother, Raiford spent a tour of duty with the Army in Korea before being transferred to Yokota.

Ronald arrived at Yokota in November of 1952 and Darrell arrived at his base in southern Japan in January of this year.

The two Dalstras are the sons of Mr. and Mrs. John A. Dalstra, who have three other children. One younger brother, Roger, is presently serving in the Navy while another brother, Raiford spent a tour of duty with the Army in Korea before being transferred to Yokota.

Ronald is a glazier and an eye specialist. He is also a singer. When asked how it felt to see each other again after such a long separation, the Dalstras said: "It's really good to get acquainted again." Darrell assigned to the 51st Maintenance and Supply Group, said that he "sure don't like to find a way to be transferred to Yokota."

Ten Army Units Play Major Role In Korean War

SEoul—Hundreds of thousands of United States Army soldiers served in Korea during the past three years.

Nearly one-half million American soldiers have been transferred out of that country. These include soldiers rotated to the United States, medical evacuees, men transferred to other areas, and those discharged from the Army.

As a result of these changes, three Eighth Armies have fought in Korea—the original one, units of which first entered the war in July, 1950; another which began to replace the first in April, 1951; and the Army which is there now.

Ten units of the Eighth Army have replaced a major role in the Korean war.

First Cavalry Division (Infantry) and the 18th Regimental Combat Team also took part in the fierce early battles in Korea and have since returned to Japan.

Major General John B. Church then took over the division which fought valiantly against the enemy until Feb. 4, 1952, when it was ordered back to Japan.

Lamps Placed Right

Will Yield Most Light. Don't expect your floor and table lamps to serve as anything when you place them in the wrong positions, says Mary E. Webber, General Electric home lighting specialist.

Every homemaker is interested in placing her lamps where they will look best. However, when there is a serious seeing job to be done, lamps should be no more than 24 to 30 inches from your work for best lighting results.

Don't place a table lamp, for instance, in the center of a large table and then expect it to light a chair located several feet away.

FRESH TOMATO TIME

Did you know more tomatoes are canned at home than any other vegetable and that they are the easiest vegetable to can? Did you know that they are among the most important sources of vitamins C? That one medium-sized tomato will give you nearly half your day's quota of vitamin C plus a generous amount of vitamin A? It's all true, according to the U.S. Department of Agriculture. What more, single copies of a leaflet on ways to use tomatoes — "Tomatoes on Your Table" Leaflet 278 — are free on request to the Office of Information, U.S. Department of Agriculture.

Junior Rotarian Hartley And Exchange Students Make Glowing Reports

At last Wednesday's meeting of the Lowell Rotary Club Douglas Hartley gave an interesting report on his visit to Camp Emory, Chuck Hill, program chairman, in his introduction explained that Douglas was chosen by the Junior Rotarians of Lowell to attend this annual camp meeting which is sponsored by the Rotary Clubs of this district.

Prominent speakers addressed this select group of Junior Rotarians and stressed the importance of international cooperation and understanding. Several exchange pupils were on the program and they gave a glowing report on their experience in this country and the benefits they derive from their contacts during their stay here.

In closing, young Hartley gave the Rotarians an idea of some of his impressions when he described the Statue of Liberty in New York harbor. He said "The Statue of Liberty was built in Italy, sold to the French who presented it to the United States to welcome the Irish."

Some of our Rotarians are beginning to return from their vacations and they are full of interesting stories. Jack Robson spoke of his trip to Texas, and points South. Cary Stiff spoke of Eisenhower's visit to Dartmouth College in New Hampshire and if there had been more time we would have had a complete travelogue of his trip East.

I'LL TELL YOU WHY WE SELL 4-SQUARE LUMBER!

Confidence is one of the greatest assets in business. It's the important element which influences you in deciding where you prefer to trade—where you are sure of getting the best value.

The right kind of lumber is important to you because good lumber is important to sound, durable, economical building.

...but you can't be expected to know all there is to know about lumber any more than you can know all there is to know about many of the other things you buy. We all buy pretty much on faith—faith in the dealer and faith in the manufacturer.
