The hit that's changing the sales standings puts you

way ahead 3 ways

THIS year Buick has done what no other car has done in more than a generation.

This year Buick has moved into the lofty circle of America's three top sales leaders - a circle once dominated only by the so-called "low-price three." For today, Buick is outselling all other cars in the nation except two of these "low-price three." And each new month's sales figures strengthen Buick's new sales leadership.

You can't do better - if you want the best buy for your new-car money - than to look into the soaring success that is Buick today. You'll find this glamorous new-day beauty puts you way ahead in three important ways-that's for sure. So drop in on us-tomorrow at the latest-and see for yourself that Buick is the buy of the year, hands down.

Buick prices start close to the lowest—just a few dollars above those of the traditional V8 power, more ride steadiness, more solid "low-price three." But those few more durability-plus the advanced "tomorrow" dollars for a Buick get you a lot more auto-styling that has taken the country by storm.
