Twenty Years of Progress

Twenty years ago the State Savings Bank was chartered by the State Banking Department of Michigan and the Federal Reserve Banking System to begin doing general banking business in Lowell.

During the twenty years since our opening date, it has been a period of steady conservative growth. We wish to take this opportunity of thanking all of our clients who have contributed so much to this growth.

The following figures, which are the figures used in the first published report as of October 17, 1934, and our last published report, as of June 30, 1954, speak more than words possibly can in showing what has been

accomplished in Lowell during the past twenty-year period. Following the figures you will find a list of the directors who first served on our Board in 1934 and a list of those who are serving today. You will also find a list of the officers as of twenty years ago and a list of those at the present time. Five of the original directors have passed on and we wish to pause at this moment to pay our deepest respects to those deceased members who contributed a very valuable service.

Once again the present directors and officers wish to take this opportunity of thanking you all for the wonderful cooperation and contribution you have made to our "Twenty Years of Progress".

Phillips was the first to make Di-isopropyl and also HF Alkylate. Until recently, their use was restricted by the U. S. Government to high performance aviation gasoline. Now authorities have removed restrictions and these powerful aviation omponents can be blended into Phillips 66 FLITE-FUEL for your car.

FLITE-FUEL provides increased power, higher anti-knock and greater fuel economy. You benefit from Phillips 66 controlled volatility and the clean burning qualities that result from natural and aviation gasoline components. Buick's biggest hit brings you a 3-way bonus

1. You get the car that's

From stem to stern, Buick today is styled a year ahead - with long low glamor lines, with the very look of tomorrow, and with that broad panoramic windshield that many other cars won't have till 1955. Equally important, you get in Buick advanced V8 power, big room, luxurious comfort, the famed Million Dollar Ride-and all for prices that start just a few dollars above those of the so-called "low-price three." Is it any wonder, then, that Buick today is outselling all other cars in America except two of these "lowprice three"?

2. You get the car that's a sure high resale value

Buicks have always had a high trade-in value. But the 1954 Buick has an extra advantage in its yearahead styling. That means your Buick will stay well up in the style parade for years to come - will stay fresh and new-looking well into the future. So you're bound to be way ahead in actual dollars when trade-in time comes.

Come see for yourself why -

3. You get a bigger allowand from our volume business

Every month's sales figures this year have firmed this fact: Buick sales are soaring; Buick is outselling all other cars in the nation, regardless of price range, except two of the "low-price three." So with this tremendous volume, we can-and do-offer higher trade-in allowances. Come in, see and drive a new Buick-then check for yourself that our volume business really does mean a far bigger allowance for you.

Canning Most Popular For Preserving Food

If families in the Lowell area ere like families in Lansing, home canning-not freezing-is the way they are preserving food

And most of the "canning famliles"-six out of ten-have no home gardens and presumably are buying the foods they can,

In the survey of 1,110 Lansing area homes it was found that 60 per cent of them are canning foods this summer. Only ten per cent of the families reported they own a home freezer and only one in 30 said they stored model in sizes 1 to 16 at Coons. frozen food in a commercial
