And man! What that does HOTTEST BUICK IN HISTORY

his is for sure . . .

There's never been anything in your cardriving experience like the feel of Buick's new Variable Pitch Dynaflow* - because there's never been anything like it in a car

for Dynaflow !!

In a modern plane, yes. For this is the principle of variable pitch propellers used on airplanes. Their propeller blades change "pitch" for quick take-off - then change to another "pitch" for better gas mileage in cruising aloft.

Now you can do the same thing on the ground-in a 1955 Buick.

Twenty propeller blades have been ingeniously engineered into the Dynaflow unit. They pivot - one way for a big boost in gas mileage while cruising - another way for brilliant new performance.

You switch the pitch for instantaneous

acceleration just by pressing the pedal way down. Then it happens ... A build-up of momentum as smooth as oil-

How about you trying it?

That way you can also look into the sizzling new horsepowers, the fresh new styling, the envied ever-level ride, the eye-opening low prices - all of which are making the 1955 Buick the hottest seller in all history. Come in this week, won't you?
