HOW FIRE INSURANCE GIVES THEM

For years insurance engineers have been working to reduce fire and accident hazards in the nation's hospitals. In the last three years, they have surveyed over 7,000 hospitals and recommended essential safety measures. As a result of this activity, hundreds of people are living today because of fire tragedies that did not happen.

This is only one of the public services performed by car stock fire insurance - a private enterprise - of which the insurance agent is an important part. His professional advice is yours for the asking. Phone me about your insurance-for, in these high-cost days, too little insurance protection for your home and belongings can be costly.
