WEED-KILLING "BLAN-KET" IN ACTION! All celery planted same time. Only difference: celery at left was band sprayed once with Vegadex at planting. Results like this, last year, saved commercial growers from \$20 to \$90 an acre on

## THIS NEW WEED-KILLING "BLANKET" CAN SAVE YOU \$20 TO \$90 PER ACRE IN VEGETABLE CROPS

Vegadex adds extra profits to every acre of vegetables lime beens, seybeans, garden beets

It's Vegadex,® and it kills weeds for you in a new way. You spray it only once-at planting time. Vegadex forms an invisible chemical blanket over your soil that smothers weeds. Pesky annual grasses-even tough weeds like purslane and henbit-sprout, touch the "blanket," and die. Because weeds seldom appear, Vegadex can cut labor costs for hand weeding as much as \$90 per acre. Your vegetables come through unharmed, with no weeds to fight them for sunlight, water and plant food. And Vegadex won't "build up" in your soil, even if you spray each time you plant.

Before you plant your next erop, drop by your nearest
