## ing and Loan relations Leading Mortgage Money Source

Michigan savings and loan assoclations gained more than \$160 million in savings during the year ending June 30th, according to a news release by the Michigan Savings and Loan League, This increase brings the total savings held by the 73 institutions to more than \$1.391 billion and represents over 683,000 savers.

In the recent report of the Lowell Building and Loan Association showed assets of \$1,303,627.65. The association, Lowell's leading source of mortgage loans now has first mortgage loans totaling \$1,232,150. man building has been completed, and is first among all Michigan Mr. Venema will assume the duassociations in operating economies and earnings.

Savings and loan associations continue to be the nation's number one home mortgage lender, according to Grant H. Longnecker, Executive Vice President of the Michigan Savings and Loan League, financing more than 39 percent of homes built or sold here in America, In Michigan in the past year these institutions made 38,644 loans for better than \$356 million, thus bringing their total mortgage loan portfolio to a top record of over \$1.249 billion, as of June 30. At present 182,348 homes are being financed in Michigan by savings

and loan associations In releasing this mid-year report, Mr. Longenecker stated that more than \$38 million was paid in divi- stroke. Mrs. Hadley said she had dends to savers last year, which is an increase of \$5 million over the previous year.

## **Graduates From Aeronautics School**

Aired A. Weigeie, ID. son of Mr. and Mrs. Christian Weigele, of 206 N. Jackson, Lowell, has been placed with Northwest Airlines, St. Paul, Minnesota, to fill a position as Reservation Agent.

Weigele, a 1958 Lowell High the Midwestern United Life Insurs c.h o o l graduate, completed a course of study at the National School of Aeronautics in Kansas City on August 7 this year.

While at Lowell High Weigele participated in track for four years being held at Castle In The Clouds, and archery for two years. He was class treasurer. Junior Rotarian. and in the play cast all in his senior year. Weigele was also a tatives for the Company in this member of the FFA for two years.

"They would not admit with any villingness what I am assertingthat Michigan is a collapsing state Schools Seek under the dying regime of Mennen Williams who, as it seems today. More Artists

has won his last gubernatorial elec-

As Educators The columnist said he was informed by a source close to the Governor that Williams plans to go to the Democratic National Convention next year with a sackful of delegates and barter them for appointment as Attorney General of the United States, Williams hopes to use that cabinet post as the way in the columnist said he was informed by a source close to the Governor that Williams in teaching will expand enormously in the next decade or so, predicts Charles Sawyer, director of The University of Michigan Art Museum.

Here's why, he explains: "First there is the much published as the property of the columnist said he was informed by a source close to the Governor that Williams in teaching will expand enormously in the next decade or so, predicts Charles Sawyer, director of the University of Michigan Art Museum.

Here's why, he explains: "First there is the much published as the columnist of the columnist said here is the columnist said here is the columnist said here."

of the United States, Williams hopes to use that cabinet post as a step toward the Supreme Court, he said.

The story might well be true. The idol of Gov. Williams was the late Frank Murphy, who gave Soapy his first political job and who went from the Governorship to the Attorney Generalship and thence to the nation's highest court.

Unlike most Michigan newspaper writers, Alexander severely criticized the Governor's veto of the act to permit delegates to county and Congressional District political conventions to vote by secret ballot.

Williams vetoed the hill because

conventions to vote by secret ballot.

Williams vetoed the bill because the UAW might lose control of the party if the delegates did not have to stand and be counted. The union will not harbor defiance at any time, and particularly at the conventions next spring when delegates will be selected to cast Michigan's votes for a nominee for President.

pears to be a limitless opportunity ahead for the craftsman.

"While teaching in moderate quantities is a fruitful experience for many artists, it is equally essential to get away from it at intervals. An artist-craftsman who gets embroiled in all the usual academic process es ses—committees, chairmanships, student consultations—soon ceases to be producing craftsman and loses thereby his craftsman and loses thereby his

The act vetoed was sponsored by Rep. E. D. O'Brien, a Detroit Sawyer feels it's a mistake for institutions to lure their faculty in-to a 30-hour week or a year around "None of this is written in ill teaching schedule with the entice will or ridicule. Few enough of us in middle years still have the is human, but obviously against same bounce to the ounce or can its own long range best interests. point to fulfilled ambitions. But It is equally incumbent on the Mennen Williams is a national fig-ure. He is a postwar political rev-olutionist who tried to found a Dem-Laborite party in this country where we abhor class vs. mass

"Today the collapse of Williams and the sinking star of the Dem-Laborites is one of the top stories thing constructive about the situation. "In the first place, they have been willing to measure the artist-

now in its last act. The play is moving toward a very melancholy (tragic is too overbig and overused a term) finale.

"But such is the unfailing irony of these historical dramas, both large and small, that the Governor's downfall commenced during the ascendency of the Democratic Party which he himself had started on the upward path, "It is a situation of twilight power where symptoms of decay most often appear."

After writing that the people of Michigan admit that twilliams is Walter Reuther's underling, and cringe at the state's hostility to industry, Alexander continued:

"They would not admit with any" is played a herbara Jean Krebs.

Nature's Wheel of Life - The Water Cycle

Directly or indirectly, every phase of our lives revolves around nature's never-ending water cycle. Evaporation, condensation and precipitation are the major cogs in this wheel of water anovement. Through the process of evaporation, the atmosphere is continually absorbing water from the surface of oceans, lakes, atreams, the soil, and leaves of trees and other vegetation. As the air is cooled, this moisture condenses into clouds preparing for its return journey to the earth. When precipitation falls as rain, part of it seeps into the ground. Soon this water may become contaminated. Another part of rainfall runs off the ground to lakes, streams or other surface outlets. A portion is drawn from the seil by the roots of vegetation. A portion constantly returns to the atmosphere in the form of vapor.

We're all looking for a miracle fabric—one that doesn't soil, shrink is in the offing. Tell him why and fade—is cool in summer, warm in let him help in the planning. fade—is cool in summer, warm in winter, doesn't wrinkle, doesn't need ironing and washes itself. We're getting closer all the time, but so far even the newest and best fall short in some respects. Actually each fabric has its advantages and disadvantages.

For instance; synthetics such as Dacron, Orlon, and Nylon have low absorbency. That's why they dry quickly and can often be drip dried with little or no ironing. "Nice," you say but, this same

dried with little or no ironing.
"Nice," you say but, this same low absorbency makes them cold to touch and since they don't absorb moisture from the body, they can be hot and uncomfortable in summer.

Many synthetic fabrics are crease resistant, meaning they require only a small amount of ironing. That's fine, but this same crease resistance can be a headache to the home sewer when she tries to press

home sewer when she tries to press Calvin Coolidge took the oath of Let us recommend a plan to Most synthetics do not shrink. Office as president at 2:30 a.m. on Wonderful wash day, but when Aug. 3, 1923, at the home of his they're ready for college,

the home sewer tries to shrink father. the fullness at the top of a sleeve she's just plain frustrated. So you see they are not miracles after the term "convict" refers only to a all, but if you are aware of these person found guilty by a jury. 835 W. Main haracteristics, you can avoid some of the pitfalls.

For instance, if you are planning dress of one of these fabrics, select a pattern with simple lines, few ieces and raglan sleeves. Use well-sharpened shears, dress-maker pins, and finer needles when sewing on them. These fabrics tend to dull needles and dull pins may

### REQUIREMENTS FOR GRADUATION

1. Two years of Physical Education will be required, Senior Band 9th or 10th grades, may count as a year of Physical Education. Athletics also counts as Physical Education credit, 2. All subjects in capitals are required. A course in Algebra or Business Mathematics is required.

3. Sixteen credits are required; a credit is given for the successful completion of one subject for one year. Not more than 2 credits in music, or 2 credits in shop will be allowed towards graduation, that is, not more will be counted as part of the 16 credits, 4. No credit for academic courses is given unless courses are completed in a satisfactory manner. Any one year subject is a unit

course. Two years of a foreign language is a unit course. Students

SUGGESTIONS TO STUDENTS IN ELECTING COURSES 1. We believe that the purpose of the high school is two-fold: (1) to offer something of interest to those who will not complete the four years of work and for those who will not continue their education upon graduation, and (2) to act as a college preparatory school.

Students and parents should plan courses accordingly. 2. No student can take more than four subjects without permission. 3. All election are subject to the approval of the superintendent or

4. Students should elect their subjects according to the number of years they have been in high school, 5. Students who are not enrolled in the commercial course may take

a subject in this course if the class is not too large. 6. It is recommended that students who have completed one year of Algebra should complete one year of Geometry. Those who plan to take Chemistry or Physics should take Algebra and Geometry. 7. It is recommended that all boys take at least one year of shop

and girls at least one year of home economics,

8. All students who plan on attending college should complete four years of English. 9. Those interested in Engineering should plan to complete the following credits: English 3 or more, laboratory science 2 or more and all mathematics, (Language recommended). Three majors and one minor are desirable.

credits: English 3 or more, laboratory science 2 or more. Typewriting is desirable. (Language recommended). 11. Those interested in medicine or dentistry should plan to complete 2 years of Latin, 2 years of another foreign language, Chemistry, Physics and Biology.

12.Students who plan to enter college should attempt to determine just what courses they will pursue at college and they should learn just what the college will demand of them for entrance.

10. Those interested in nursing should plan to complete the following

## COLLEGE ENTRANCE REQUIREMENTS

Many colleges require sixteen credits including two major and two minor sequences for entrance and at least a "C" average". A major sequence consists of three credits in any one academic field, and a minor sequence consists of two credits in any one academic field. Only the following subjects count as sequences:

9th Gr. 10th Gr. 11th Gr. 12th Gr. English English English Mathematics ...... Algebra Geometry Alg. 3 Social Science . Eur. Hist. U. S. Hist. \*Ec'nomics Biology Chemistry Physics Language\*\* ..... Latin Latin French

Some colleges will accept credits in World Geography, Social Problems or World Civics as part of the sequence, \*\*Some colleges will accept only one language sequence.

"Some colleges no longer demand the sequences, but insist on certain academic courses and better than average grades.

and Mrs. Marvin Huver are Electric Fencers Can Cause Fires

> guests Monday burner to work for you?
>
> R. A. Witten- It's possible, if your electric fencer isn't approved by the Underwriters' Laboratories, warns Richard Pfister, agricultural engineering safety specialist at Michi-

gan State University.

During the past year, barn fires resulting from overpowered fencers have increased, he says. And during ate summer, when fence posts, hay, fence rows, barn walls, and even pastures are likely to be dry, the fencer is more likely than ever

onditions, it can cause a sparl states Pfister.

If the fencer is UL approved, the likelihood of starting a fire much less. the UL approved fencer. If there

is too much current, as in home made fencers, it's possible to alec-trocute a person. UL fencers are much safer. Pfister advises that if you have a high-powered fencer, you'd better make sure your wiring near the barn is insulated. If it is a potential burner, take all the pre-

cautions you can to keep your barr standing, he concludes.

It makes good sense to shop where you are sure of getting the most for your food dollar.
