MAN'S BEST FRIEND

Light 12-ounces per shoe. Bouncy crepe sole, steel shank support. Resists dirt, repels water. Brushing cleans, restores leather, 7 colors.

That's a 6303 medium-duty Chevrolet powered by a 283-cu.-in. V8. But there's sure nothing mediumduty about the load. Mr. J. E. Blankinship, Arkansas logging contractor, says both of his torsion-spring 6303's "move along at 40 to 50 miles per hour with 55,000 pounds gross weight and naintain a 5-trip-a-day schedule with no trouble at all." Figure the money you save when you've got a medium-duty truck that can over 30,000 back-country miles a year with a high-tonnage load!

We've never seen anything like the mount of praise truck owners are heaping on Chevy's new torsion spring suspension. Owners like the act the truck handles a whole lot easier, can move faster off the road without beating the driver to death and shaking loose all the sheet metal They like the idea of extra thousands of miles before trade-in! . . . Drive a '60 Chevy just once. It's a whole new experience. Chevy middleweight averages 200 miles of back roads a day dogging timber out of the woods and delivering it to the mill at Crossett, Arkansas.

WORTH MORE BECAUSE THEY WORK MORE! CHEVROLET STURDI-BILT TRUCKS
