trical wires underground-where they'll be safe and out of sight. To lay these wires underground, much new equipment had to be developed; for example, an entirely new kind of plow that would cut a single furrow deep enough so that the wires could be "planted." The Common Trenches are now being used experimentally in several suburbs across our state. It's just one of the ways we're looking ahead to bring you continually improving telephone service.

> IF YOU STARTED a business making "widgits" and you wanted lots 7 / of people to come to your shop, how would you advertise? Skywriting? No, it wouldn't work in rainy
