At this time Lowell will again have Main Street lighting second to none. Some 30 years ago this community was one of the best lighted in the area with lines of boulevard lights, five lights to a pole in approximately the same district. This week the 44 new fluorescent lights will make this community once again a bright spot on the map,

"To the extent that the Michigan industrial base shifts and becomes more diversified, we may expect the state to enter a new phase of population growth dependent on an entirely different set of conditions. Through the mid-1950's, he notes, population migration to Michigan was exceeded only by California and Florida in the U. S. Yet in 1957-58, Michigan lost a net total of approximately 90,000 residents to other states and in 1958-59 the figure probably reached 100,000. The state's overall population continued to increase, since the natural gain from births exceeded the loss through deaths and migration.

Between 1950 and 1958, Goldberg estimates, 47 of the state's 83 counties experienced a net loss of migrants. But only 20 had an actual decline in total population.

Southern Michigan gained nearly five persons through migration for every 100 residents in 1950. Part of this gain probably came from the northern portions of the state. As a result, Goldberg estimates, approximately 91 per cent of the state's total population lived in the lower half of the Lower Peninsula in 1958.

We believe that Jesus Christ was conceived by the Holy Spirit, born of the virgin Mary. The Bible says so. We worship Christ, the Son
