GAS IT'S HARD TO BELIEVE THAT January this year was one of the coldest we've had i

Throughout most of the month gas appliances worked harder than usual. Your gas furnace worked overtime-maintaining the steady, even, comfortable temperatures that you and your family have come to demand and enjoy. The gas water heater was busier too, because the water coming into the home was colder than normal. More hot meals and beverages were prepared for cold weather menus.

This helps explain why your gas bill for January was higher than usual. It really is easy to forget how cold it has been when you let automatic gas heat take over your heating worries.
