Tuesday, December 3

Dear Parents and Lowell High School Students: We are most pleased to be able to present what may possibly be the best Career Night Program in Western Michigan for this school year.

A great deal of effort has gone forth to arrange a program that would help each and everyone of our students to learn about the world of work they will very soon be facing head-on. Please take special notice of the program outlined on this

page of the newspaper. You may readily agree, we have planned "Something for Everyone" in our student body. The program is planned! Now it is up to our students and YOU AS PARENTS to make this the success and meaningful program that we confidently feel it will be for our students,

Lots of cars are in LeSabre's price class, but that's where the resemblance ends. For instance: Does anybody else in LeSabre's class treat you to that gentle Buick ride or impressive Buick performance and new gas economy? No. And who else gives you 15-

inch wheels, finned aluminum front brakes, extra cushioning for middle-seat travelers, and separate heat ducts and controls for the rear seat? Right again: Nobody in LeSabre's field but LeSabre. If all this makes you think a LeSabre would look awfully nice in your garage, you should see how nicely it fits a budget. You know who to see about it, of course: your Buick dealer. Who else? Now you see it. Now you don't. When a Chevy II does that kind of disappearing act you know without looking twice: It's a '64 with a V8 engine.

That's right. A full-grown 195-hp Turbo-Fire V8.*

It's available for the first time this year along with a choice of three other engines—the standard 4 (in 100 Series sedans), the standard 6 and a new 155-hp 6.* (And all of them maintain their high

better highways

11VOS Traffic last Labor Day weekend broke all records-yet there was not a single fatality on Michigan's entire freeway system!

Modern highways are already reducing accidents by as much as 75% when compared with the outmoded roads they replace. It is a well-proved fact: Safety-engineered, easy-to-travel roads save lives. No better way has been found to cut accidents. Yet today, nearly 50% of Michigan's roads and streets are still inadequate! This is no time to stop or curtail the state's great life-saving highway improvement program. The most effective way to further reduce Michigan's traffic toll is to improve these unsafe roads. Also contributing to improved highway safety are

long life and ability to take the heaviest traffic save taxes for every motorist. PORTLAND CEMENT ASSOCIATION
